Objectives and Activities:

OIBC's vision is a World in which wider access to scientific learning brings better health and quality of life. It seeks to realise this through educational projects for all generations and especially for the young, building greater understanding of biomedical and other scientific issues.

Its current aim is to increase the number of pupils continuing to study science at school beyond GCSEs and encourage them to consider a career in that subject.

It believes that there is an under-tapped resource of pre-GCSE students. The reason is that many lack confidence in their ability to excel because of their or their school's background. This contributes to social immobility. Other causes are dyslexia among some and ignorance of how exciting and rewarding career in science can be.

To Achieve our aim we:

- Enthuse - through direct contact with scientists at the cutting edge of new discoveries
- Educate - by explaining what careers in science and other STEM subjects exist and how they can be accessed
- Encourage - by showing that successful scientists often started out no better than the students themselves

A feature of the charity is that due to the great enthusiasm of the professional scientific community for promoting science to young people, much time is given for free, ensuring an unusually high output and benefit for every pound donated.

None of the directors take any remuneration, their total expenses for the year amounted to £nil (2021: £nil), and OIBC has but one salaried member of staff.

It is a firm principle of this charity that it sharply constrains administrative costs and ensures it expends all donations received, rather than diverting them to reserves, which it does not require for future functioning.

Public Benefit

OIBC always takes into account the Charity Commission guidance on public benefit and believes that the activities of Oxford International Biomedical Centre are in line with this guidance. This is underpinned by rigorous feedback sessions with all stakeholders and in particular the schools and colleges with which OIBC works. Their overall message is consistently one of "More please!".

Achievements and Performance

Financial Review

OIBC continues to hold firmly to its policy of deploying all its income to the benefit of young people's scientific education and thus applies a policy of not building up reserves.

Review

The OIBC annual accounts reporting period is geared to the academic year. This year was a tale of two halves. As the significant restrictions on British society imposed by the Covid-related lockdowns, including the closure of almost all schools, eased, OIBC worked hard to re-establish its Scientist in Schools and Café des Sciences programmes and its career talks. In the first half of the year schools were focussed on catching up and delivering the basic curriculum, so the period was used to re-establish contacts and lay plans for the second half of the year. Whilst many schools were still catching up, in the second half of the year two Scientists in Schools were held. These were the annual event at St Edward's School on 2 March, on 'Cutting Edge Science' and on 27 April at Didcot Girls School on Drug Development. Both events were very well received. In addition four career talks took place at Aureus School in Didcot in June and July.

Whilst last year OIBC was extremely fortunate to be able to organise a virtual Summer School for the University of Southern California (USC), in July USC returned with 27 students to Oxford for another summer school. This was very successful and USC plans to repeat it in 2023.

OIBC's showcase, the annual Anne McLaren lecture, took place on 20 May 2022 at Kellogg College and was well attended. It was delivered by Prof Liz Simpson who talked about her scientific collaboration with Dame Anne McLaren and how that led to considerable advances in *in vitro* fertilisation.

The trustees are confident that OIBC will continue to expand its activities in the future when the pandemic is over and they are delighted that OIBC enjoys a successful relationship with Oxford University from which it continues to derive benefit.

The development of OIBC continues to be underpinned by a loan from its founder and current President, Professor Charles Pasternak. The overall surplus for the year of £8,159 (2021: £25,650) has been added to the general unrestricted fund, which at the balance sheet date stood at £28,247 (2021: £20,088). The Board considers these sums entirely acceptable from both a risk and an operating viewpoint, given their modest size and the financial support on which OIBC can call.

Future Development

The charity is now developing ambitious plans to build on its earlier successes by expanding its operational activities within those areas where it already has a presence, and reaching out to additional educational institutions across the country. Board meetings always include a strategic overview component and the growth to date evidences the success of this approach.

Already for 2023 OIBC has plans for 3 career talks at Aureus School in Didcot; the annual symposium at St Edward's School; events at Cooper School in Bicester and at The Little Heath School in Reading, plus another at Didcot Girls School, in March to coincide with the Science week. It is also in talks with River Learning Trust about organising a series of events at their schools.

Preparations for another USC Summer School in 2023 are under way. USC recently also expressed interest in sending an additional group of 10-15 graduate level students for a summer course geared around its Master of Public Health syllabus. OIBC is also in talks with a University of UAE about a potential summer school for their students.

Risk Management

The trustees have a duty to identify and review the risks to which the charity is exposed and to ensure appropriate controls are in place to provide reasonable assurance against fraud and error. The trustees have examined the major strategic, business, financial and operational risks which the charity faces and confirm that systems have been established to enable regular reports to be produced so that the necessary steps can be taken to lessen these risks. It is the policy of the board to fully utilise all income received each year, but to do so prudently, and without creating significant surpluses or deficits. It does, however, regularly review the financial position, to ensure that the charity always has six months of funding available to meet its operational costs.

The trustee's report was approved by the Board of Trustees.

Oxford International Biomedical Centre Limited
Independent Examiners Report

Independent Examiner's Report to the trustees of Oxford International Biomedical Centre Limited

I report to the trustees on my examination of the accounts of Oxford International Biomedical Centre Limited for the year ended 31 August 2022 which comprise the Statement of Financial Activities, the Summary Income and Expenditure Account, the Balance sheet and the related notes.

Responsibilities and basis of report

As the trustees of the charity (and also its directors for the purposes of company law) you are responsible for the preparation of the accounts in accordance with the requirements of the Companies Act 2006 ('the 2006 Act').

Having satisfied myself that the accounts of the charity are not required to be audited under Part 16 of the 2006 Act and are eligible for independent examination, I report in respect of my examination of your charity's accounts as carried out under section 145 of the Charities Act 2011 ('the 2011 Act'). In carrying out my examination I have followed the Directions given by the Charity Commission under section 145(5)(b) of the 2011 Act.

Independent examiner's statement

I have completed my examination. I can confirm that no material matters have come to my attention in connection with the examination giving me no cause to believe that:

- accounting records were not kept in accordance with section 386 of the 2006 Act ; or
- the accounts do not accord with those records; or
- the accounts do not comply with the accounting requirements under section 396 of the 2006 Act other than any requirement that the accounts give a 'true and fair' view which is not a matter considered as part of an independent examination; or
- the accounts do not accord with those records; or

I have no concerns and have come across no other matters in connection with the examination to which attention should be drawn in this report in order to enable a proper understanding of the financial statements to be reached.

1 Accounting policies

Basis of preparation

The financial statements have been prepared in accordance with Accounting and Reporting by Charities: Statement of Recommended Practice applicable to charities preparing their accounts in accordance with the Financial Reporting Standard applicable in the UK and Republic of Ireland (FRS 102) (effective 1 January 2015) - (Charities SORP (FRS 102)), the Financial Reporting Standard applicable in the UK and Republic of Ireland (FRS 102) and the Companies Act 2006.

The charitable company has taken advantage of the provision in the SORP for charities applying FRS 102 update Bulletin 1 not to prepare a Statement of Cash Flows.

The financial statements are prepared in sterling, which is the functional currency of the charitable company. Monetary amounts in these financial statements are rounded to the nearest £.

Charitable Funds

Unrestricted funds are available for use at the discretion of the trustees in furtherance of their charitable objectives unless the funds have been designated for other purpose.

Restricted funds are subject to specific conditions by donors as to how they may be used. The purposes and uses of the restricted funds are set out in the notes to the financial statements.

Endowment funds are subject to specific conditions by donors that the capital must be maintained by the charitable company.

Incoming Resources

Endowment funds are subject to specific conditions by donors that the capital must be maintained by the charitable company.

Cash donations are recognised on receipt. Other donations are recognised once the charitable company has been notified of the donation, unless performance conditions require deferral of the amount. Income tax recoverable in relation to donations received under Gift Aid or deeds of covenant is recognised at the time of the donation.

Legacies are recognised on receipt or otherwise if the charitable company has been notified of an impending distribution, the amount is known, and receipt is expected. If the amount is not known, the legacy is treated as a contingent asset.

Assets for distributions are recognised only when distributed. Assets given for use by the charitable company are recognised when receivable. Stocks of undistributed donated goods are not valued for balance sheet purpose.

Voluntary income encompasses income from a successful residential summer school which is run to generate funds for charitable activities plus a wide range of donations from both the scientific community and the general public, augmented by general grants from a range of charitable and other bodies. Turnover is measured at the fair value of the consideration received or receivable and represents amounts receivable for goods and services provided in the normal course of business, net of discounts, VAT and other sales related taxes.

Resources expended

Liabilities are recognised as expenditure as soon as there is legal or constructive obligation committing the charity to the expenditure, it is probable that a transfer of economic benefits will be required in settlement and the amount of the obligation can be measured reliably. Expenditure is accounted for on an accruals basis and has been classified under headings that aggregate all cost related to charity. Where costs can not be directly attributed to particular heading they have been allocated to activities on a basis consistent with the use of resources.

Taxation

The charity is exempt from tax on its charitable activities.

Tangible fixed assets and depreciation

Tangible fixed assets are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives on the following bases:

Computers	25% Straight line
-----------	-------------------

The gain or loss arising on the disposal of an asset is determined as the difference between the sales proceeds and the carrying value of the asset, and is recognised in net income/ (expenditure) for the year.

Impairment of fixed assets

At each reporting end date, the charitable company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss (if any).

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, and whenever there is an indication that the assets may be impaired.

Cash and cash equivalents

Cash and cash equivalent include cash in hand, deposits held at call with banks, other short term liquid investments with original maturities of three months or less, and bank overdraft. Bank overdrafts are shown within borrowings in current liabilities.

Basic financial assets

Basic financial assets, which include debtors and cash and bank balances, are initially measured at transaction price including transaction costs and are subsequently carried at amortised cost using the effective interest method unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at market rate of interest. Financial assets classified as receivable within one year are not amortised.

Notes to the Accounts

Basic financial liabilities, including creditors and bank loans are initially recognised at transaction price unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future payments discounted at a market rate of interest. Financial liabilities classified as payable within one year are not amortised.

Debt instruments are subsequently carried at amortised cost, using the effective interest rate method.

Derecognition of financial liabilities

Financial liabilities are derecognised when the charitable company's contractual obligation expires or are discharged or cancelled.

Employee benefits

The cost of any unused holiday entitlement is recognised in the period in which the employee's services are received.

Termination benefits are recognised immediately as an expense when the charitable company is demonstrably committed to terminate the employment of an employee or to provide termination benefits.

Foreign exchange

Transactions in currencies other than pounds sterling are recorded at the rates of exchange prevailing at the dates of the transactions. At each reporting end date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing on the reporting end date. Gains and losses arising on translation are included in net income/ (expenditure) for the period.

Critical accounting estimates and judgements

In the application of the charitable company's accounting policies, the trustees are required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised where the revision affects only that period, or in the period of the revision and future periods where the revision affects both current and future periods.

2 Company Status

The company is a private company limited by guarantee and consequently does not have share capital.
