## BRITISH SOCIETY FOR PLANT PATHOLOGY

### TRUSTEES' REPORT

---

The Trustees of the Charitable Incorporated Organisation ("the CIO") present their Annual Report and Financial Statements for the year ended 31 December 2021. The accounts are prepared in accordance with the Charities Act 2011, and with the Charities Statement of Recommended Practice applicable to charities preparing accounts in accordance with FRS102.

#### **Structure, Governance and Management**

The CIO changed its legal status from a charitable company on 2 November 2020 to a CIO. The CIO is governed by its Constitution.

#### *Appointment and induction of Trustees*

The Board of Trustees is a mixture of appointed and elected individuals. Ordinary members and the President (via the steps of Vice-President and President Elect) serve for three years and are normally elected from among the general membership through a system of nomination and secondment and, if candidates exceed vacancies, by ballot of all members. The four trustees who conduct most of the business of the Charity, and who serve typically for five years, are normally appointed by the Board after a call for volunteers. It is important that such individuals are aware of the demands of time that will be placed on them and also possess the skills necessary for the tasks concerned. The Board's policy is to maintain a majority of elected over appointed trustees at all times.

New trustees undergo an induction to brief them on their legal obligations under charity law, the content of the Constitution, the Board and the decision-making processes and the recent performance of the charity. They meet the key officers and the other trustees. Changes in legislation, for example the Charities Act 2011, and its application to the Charity, especially the public benefit requirements, have been explained to Board members and discussed at Board meetings, and Board has given due regard to the guidance issued by the Charity Commission in respect of public benefit.

#### *Description of the organisational structure*

The Charity is run by a Board of Trustees with committees which are empowered to handle specific areas. There is no executive committee and no chief executive with overall control but a Finance Committee has been established, of the President, President-elect and Treasurer, who meet occasionally to discuss financial issues. These are the key management personnel of the charity and are in charge of directing, controlling, running and operating the charity on a day to day basis. All trustees give of their time freely and no trustee received any remuneration in the year. Details of trustees' expenses and related party transactions are disclosed in Note 9 to the financial statements.

The President who, normally, serves for one year following a three-year induction period, successively as Vice-President then President-elect, and chairs meetings of the Board. The Board meets at least four times a year with an agenda and papers circulated in advance of the meeting. At the same time as one of these meetings, usually in May, the Annual Business Meeting is held to approve the accounts and deal with any other business matters. Any member may put forward items for discussion by writing to the Secretary. Decisions are reached by consensus or at least by substantial majority vote on a show of hands. Divisive issues are normally aired to the wider membership before decisions are taken.

### TRUSTEES' REPORT (continued)

---

#### *Risk assessment*

The trustees have identified the major risks to which the Charity is exposed and, as far as is possible, taken actions or put in place systems to mitigate these risks.

The Trustees consider the principal risks and uncertainties facing the charity and their plans and strategies for managing these risks to be:

- The chief risk to the Charity is the potential loss of income in the event of the Journals no longer being profitable. This risk is minimised by ensuring that relations with the Journal publishers are positive and maintaining a dialogue with the publishers to ensure that the Journals remain relevant to a significant scientific readership.
- A secondary risk to the Charity is the potential loss of income through a significant fall in membership. This risk is minimised by actively promoting the benefits of membership of the British Society for Plant Pathology via diverse channels
- A third risk to the charity is the potential reduction in reserves in the event of a severe fall in share prices. This risk is minimised by maintaining a broad investment portfolio managed by professional investment managers and by maintaining an equal sized cash-based reserve.

#### **Objectives and Activities**

The principal objective of the charity is the advancement of education by the study of plant pathology in the United Kingdom and elsewhere. Mankind is ultimately dependent on plants for its food, the majority of its fibre and increasingly for its energy supplies. In addition, plants provide the backdrop to the environment in which we live and their role in global warming is now widely recognised. In consequence the study of diseases of plants, Plant Pathology, and the dissemination of this knowledge is critical to the future well-being of everyone. The charity has as its primary function the development and acquisition of this knowledge and its use in all aspects of plant production to the ultimate benefit of the national and international communities. To achieve these aims it promotes education through the award of undergraduate student bursaries and support for higher degree research (MSc and PhD), travel grants and fellowships to permit interaction between scientists and thus progress research and by organising meetings that are open to all on various aspects of Plant Pathology. In all of these activities the charity has as its primary concern the resulting public benefit, which may be almost immediate, via more effective and sustainable methods of deploying existing methods of controlling disease, or of a longer term in developing novel methods of control or plants better able to withstand infection.

To help achieve its objectives and disseminate the knowledge generated the Charity owns two scientific journals: 'Plant Pathology' and 'Molecular Plant Pathology' which are both established titles with a highly regarded reputation and which are subscribed to, and electronically accessed by libraries world-wide. 'Plant Pathology' is wholly owned by the Charity, while 'Molecular Plant Pathology' is owned jointly (50:50) with the publishers. Both journals are published on the Charity's behalf by Wiley Blackwell Publishing Limited. In addition, from 1 January 2021, New Disease Reports is being published by Wiley: New Disease Reports - Wiley Online Library

Currently the Charity relies almost exclusively on volunteer labour for its operation; by professionals in full time employment operating in their spare time and by retired professionals. As the Charity grows and employers become increasingly demanding, it is likely that, within the foreseeable future, it will become difficult to service some of the routine operations of the Charity in this way and that they will have to be done by paid employees or subcontracted out. Considering this, the Charity have employed three contracted workers to help with the society's administration, publicity and meetings.

## BRITISH SOCIETY FOR PLANT PATHOLOGY

### TRUSTEES' REPORT (continued)

---

#### *Grant making policy*

Past decisions of the Board have focused grant making activities in three main areas, fellowships (both Senior and Junior) to undertake research, student bursaries to support short term educational projects and travel awards to attend conferences, study groups and working parties. The availability of these is advertised widely to the membership and applications are reviewed by one of three committees, comprising Board members, covering each area. Decisions are based on scientific and educational merit as well as in relation to the budget available. The budgets are agreed annually by the Board on the recommendations of the Treasurer. However, only if a proposal is of good scientific quality will an award be made. Efforts are made to ensure that all high-quality projects are funded but inevitably, in some years, this is not possible.

Quality control of the applications for bursaries, travel grants and fellowships are achieved through selection committees for each category and by the submission of scientific reports which must be tendered by recipients, on completion of their project or visits, for publication in the Charity's Newsletter. More recently the Charity has provided grants for promoting plant pathology to a wider, often lay, audience.

#### **Achievements and Performance**

The Charity's total income in 2021 was £4,096 more than in 2020 while net expenditure was £55,810 (2020: Net expenditure £9,303). The society has 31 NDR editors, 38 PP editors, 51 MPP editors, 19 Honorary members and 630 subscribing members at the date of the Annual General Meeting in December 2021.

The Charity's scientific journals continued to enhance their scientific reputations, and Plant Pathology and Molecular Plant Pathology are the pre-eminent plant pathology journals published in Europe. Their impact factors, the measure by which their scientific value and contribution is most frequently measured, continue to be high. The Journals are the principal contributors to the Charity's income, with Plant Pathology being the most profitable. The treasurer has the online access to Wiley Journal Insights to monitor financial forecast and performance of both journals. Plant Pathology is made freely available to developing countries through AGORA (Access to Global Online Research in Agriculture) led by the Food and Agriculture Organisation (FAO) of the United Nations. Molecular Plant Pathology has become already an Open Access Journal. These journals are now complemented by the online format of New Disease Reports, which are free to access worldwide via the internet. Molecular Plant Pathology is currently published in 12 issues per year while Plant Pathology is published in 9 issues per year. The Charity is represented on the Journal management committees by the President, President-Elect and Treasurer as well as the Senior Editor/Editor in Chief of each journal. Communication between the Editors and publishers is frequent and good. The Board members keep a watching brief and the Board authorises any expenditure over and above budgeted requirements and are kept in touch with developments that affect our journals and scientific publishing more widely. Much of the publishing of the two journals is now online and Board members remain alert to the possible financial implications for the charity into the future.

Charitable expenditure for the year was £538,453 (2020: £258,998). The makeup of this is detailed in Note 2 to the accounts.

## BRITISH SOCIETY FOR PLANT PATHOLOGY

### TRUSTEES' REPORT (continued)

---

#### **Financial Review**

The Charity has reserves in investments and bank balances, of £1,630,106 comprising quoted stock market securities and bank deposits, and a UK Government bond. The bulk of these reserves have been accumulated over the past 12 years with a view to:

- (a) enabling increased educational expenditure - currently achieved through student bursaries, fellowships, conference support, travel fund and outreach activities,
- (b) as a buffer against financial turbulence in the stock market and the uncertainties, into the future, of scientific publishing, especially open access, and
- (c) as preparation for the future need of using paid rather than volunteer labour for at least some of the tasks of running the Charity.

#### *Reserves policy*

The Board considers that the current levels of reserves are reasonable. The reserves are sufficient to enable the British Society for Plant Pathology to continue all of its charitable activities for seven years in the complete absence of income. Such a situation is extremely unlikely to occur as membership is expected to be maintained for the foreseeable future and the structuring of the journal income through the publishers should buffer against any significant decline in the area of research pertinent to the journals. The stock market has been performing well in the last year and the Board are taking advice informed decision making on the reserves.

Changes in our journal configuration, with increased numbers of issues for Molecular Plant Pathology, increased page allocations for Plant Pathology and the development of New Disease Reports, has led to increased overall expenditure and the Board is balancing this with the importance of this against other calls on our resources. The need for reserves is reviewed annually and is implicitly considered whenever decisions are taken on major new ventures that have financial consequences.

#### *Investment policy*

The Charity takes a balanced approach to investment, keeping at least one fourth of its assets as cash on deposit. The charity has made such investments to generate a return and has made no social investments. In 2018, A sum of £700,000 was invested in a professionally managed portfolio with Hargreaves Lansdown plc., a financial service charity based in Bristol, UK.

The remainder is invested in longer-term stock market investment via professional managers. The fund management charity business is owned by Tilney BestInvest with Scott Ballantyne acting as fund manager. The latter funds are managed for medium risk and are designed to achieve a balance between growth and income. The Treasurer maintains regular contact with Tilney BestInvest and Hargreaves Lansdown, both of which have day-to-day discretionary control over the funds. The Treasurer has online access to monitors investment performance, costs, the method of charging and possible churning of the portfolio.

#### **Plans for the future**

The annual Presidential meeting is to be held in Newcastle in September 2022.

Our relations with Wiley-Blackwell, the publishers of our journals remain good.

The projected income is likely to remain similar to 2021 but expenditure will increase as in person meetings resume and travel is allowed post Covid restrictions.

## BRITISH SOCIETY FOR PLANT PATHOLOGY

### TRUSTEES' REPORT (continued)

---

#### Statement of Trustee's Responsibilities

The trustees are responsible for preparing the Trustees' Annual Report and the financial statements in accordance with applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice).

The law applicable to charities in England and Wales requires the trustees to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the charity and of the incoming resources and application of resources of the charity for that period. In preparing these financial statements, the trustees are required to:

- ☐ select suitable accounting policies and then apply them consistently;
- ☐ observe the methods and principles in the Charities SORP;
- ☐ make judgments and estimates that are reasonable and prudent;
- ☐ state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- ☐ prepare the financial statements on the going concern basis unless it is inappropriate to presume that the charity will continue in business.

The trustees are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the charity and enable them to ensure that the financial statements comply with the Charities Act 2011, the Charity (Accounts and Reports) Regulations 2008 and the provisions of the trust deed. They are also responsible for safeguarding the assets of the charity and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

On behalf of the Board

Dr Trisna Dewi Tungadi  
Secretary

31 May 2022

## BRITISH SOCIETY FOR PLANT PATHOLOGY

### INDEPENDENT EXAMINER'S REPORT TO THE TRUSTEES ON THE UNAUDITED ACCOUNTS OF THE BRITISH SOCIETY FOR PLANT PATHOLOGY

---

I report to the charity trustees on my examination of the accounts of the CIO for the year ended 31 December 2021 set out on pages 8 to 15.

#### Responsibilities and basis of report

As the charity's trustees you are responsible for the preparation of the accounts in accordance with the requirements of the Charities Act 2011 ('the Act').

I report in respect of my examination of the Trustee's accounts carried out under section 145 of the 2011 Act and in carrying out my examination I have followed all the applicable Directions given by the Charity Commission under section 145(5)(b) of the 2011 Act.

#### Independent examiner's statement

Since the Charity's gross income exceeded £250,000 your examiner must be a member of a body listed in section 145 of the 2011 Act. I confirm that I am qualified to undertake the examination because I am a member of the Institute of Chartered Accountants in England and Wales, which is one of the listed bodies.

I have completed my examination. I confirm that no material matters have come to my attention in connection with the examination giving me cause to believe that in any material respect:

1. accounting records were not kept in respect of the charity as required by section 130 of the Act; or
2. the accounts do not accord with those records; or
3. the accounts do not comply with the applicable requirements concerning the form and content of accounts set out in the Charities (Accounts and Reports) Regulations 2008 other than any requirement that the accounts give a 'true and fair view' which is not a matter considered as part of an independent examination.

I have no concerns and have come across no other matters in connection with the examination to which attention should be drawn in this report in order to enable a proper understanding of the accounts to be reached.

## **BRITISH SOCIETY FOR PLANT PATHOLOGY**

### **NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021**

---

#### **1 ACCOUNTING POLICIES**

The name of the CIO is British Society for Plant Pathology. It is registered with the Charity Commission (number 1071465). The CIO's registered office is 1 Naorogi Street, London WC1X 0GB.

The principal accounting policies adopted, judgements and key sources of estimation uncertainty in the preparation of the financial statements are as follows:

##### **Basis of preparation**

The financial statements have been prepared under the Charities Act 2011 and in accordance with the Constitution, the Charities Statement of Recommended Practice (Charities SORP (FRS 102)) and Financial Reporting Standard 102 (FRS 102). The financial statements are drawn up on the historical cost basis of accounting, as modified by the revaluation of investments.

The British Society for Plant Pathology meets the definition of a public entity under FRS 102.

The financial statements are prepared in Sterling, which is the functional currency of the CIO. Monetary amounts in these financial statements are rounded to the nearest pound.

##### **Going concern**

There are no material uncertainties about the charity's ability to continue as a going concern.

##### **Tangible fixed assets**

Tangible fixed assets costing more than £100 are capitalised and included at cost including any incidental expenses of acquisition.

##### **Intangible assets**

Intangible assets costing £1,000 or more are capitalised and recognised when future economic benefits are probable and the cost or value of the asset can be measured reliably. Intangible assets are initially recognised at cost and are subsequently measured at cost net of amortisation and any provision for impairment.

Website - 5 years straight line

##### **Investments**

Investments are included at market value. Realised gains and losses, representing the difference between sale proceeds and market value at the previous financial year-end, or purchase cost if acquired during the financial year, are shown in the Statement of Financial Activities. In the case of a permanent impairment in the value of investments, provision is made in the general income and expenditure account to reduce the carrying value of investments to their recoverable amount.

## BRITISH SOCIETY FOR PLANT PATHOLOGY

### NOTES TO THE FINANCIAL STATEMENTS (continued) FOR THE YEAR ENDED 31 DECEMBER 2021

---

#### 1 ACCOUNTING POLICIES (continued)

##### **Debtors**

Grants receivable and other debtors are included at the settlement amount due. Prepayments are valued at the amount prepaid.

##### **Cash at bank and in hand**

Cash at bank and in hand includes cash and short term highly liquid investments with a short maturity of three months or less from the date of opening of the deposit

##### **Creditors and provisions**

Creditors and provisions are recognised where the charity has a present obligation arising from a past event that will probably result in the transfer of funds to a third party and the amount due to settle the obligation can be measured or estimated reliably. Creditors and provisions are recognised at their settlement amount.

##### **Financial instruments**

The charity only has financial assets and liabilities of a kind that qualify as basic financial instruments. Basic financial instruments are initially recognised at transaction value and subsequently measured at their settlement value.

##### **Income recognition**

Donations and other incoming resources (including legacies) are included in the Statement of Financial Activities (SOFA) when the charity has entitlement to the income, it is probable the income will be received and the amount of income receivable can be reliably measured. Journal income and royalties are accounted for at the point at which the charity is notified of the amounts as they cannot be accurately quantified before this time. Subscriptions are accounted for in the period to which the subscription relates. No amounts are included in the financial statements for services donated by volunteers.

##### **Deferred income recognition**

All deferred income relates to subscriptions received during the year which relates to future periods.

##### **Expenditure recognition**

All expenditure is accrued as soon as a liability is considered probable, discounted to present value for longer term liabilities and has been classified under headings that aggregate all costs related to the category.

##### **Support costs**

This comprises all expenditure incurred in supporting the work related to the objects of the charity.

##### **Governance costs**

Governance costs are those costs associated with meeting the constitutional and statutory requirements of the charity and include auditors' fees and costs linked to the strategic management of the charity. These have been allocated directly to charitable expenditure.

##### **Grants**

Student bursaries and travel awards are accounted for as expenditure in the period for which the award is given.

## BRITISH SOCIETY FOR PLANT PATHOLOGY

### NOTES TO THE FINANCIAL STATEMENTS (continued) FOR THE YEAR ENDED 31 DECEMBER 2021

#### 1 ACCOUNTING POLICIES (continued)

##### Fund accounting

General funds are unrestricted funds which are available for use, at the discretion of the Trustees, in furtherance of the general objectives of the charity and which have not been designated for other purposes.

Restricted funds are those subject to specific trusts, which may be declared by the donor or with their authority. The charity has no restricted funds at this time.

##### Realised gains and losses

All gains and losses are taken to the Statement of Financial Activities as they arise. Realised gains and losses on investments are calculated as the difference between sales proceeds and their opening carrying value or their purchase value if acquired subsequent to the first day of the financial year. Unrealised gains and losses are calculated as the difference between the fair value at the year end and their carrying value. Realised and unrealised investment gains and losses are combined in the Statement of Financial Activities.

#### 2 CHARITABLE ACTIVITIES EXPENDITURE

#### 3 GRANTS MADE

##### *Student bursaries*

During the year 61 student bursaries were paid as follows:

	No of bursaries	Total cost £
<b>Institution</b>		
University of Birmingham	1	11,100
University of Cambridge	1	3,140
University of Glasgow	1	3,500
University of Nottingham	1	2,480
University of Bath	3	10,080
University of Bristol	2	5,620
University of Dundee	1	3,639
University of Hertfordshire	1	7,800
University of Warwickshire	1	3,140
The Sainsbury Laboratory	1	3,140
Rothamsted Research	1	3,800
NIAB EMR	1	11,400
John Innes Centre	1	6,260
Imperial College	1	2,480
Harper Adams University	1	25,059
The University of York	<u>2</u>	<u>7,600</u>
	20	110,238
 <b>Grants to Individuals</b>	 <u>41</u>	 <u>177,500</u>
	<u>61</u>	<u>287,738</u>

These bursaries were made in order to fund undergraduate students through 8-10 week summer placements. The work experience gained by the students from these placements fell completely within the objectives of the charity by giving them the opportunity for the study of Plant Pathology within a research environment.

##### *Travel awards*

In addition, 7 travel awards were also made to individuals amounting to a total cost of £6,402.
