EARTHBALANCE 2000

TRUSTEES' REPORT (INCLUDING DIRECTORS' REPORT) FOR THE YEAR ENDED 31 MARCH 2022

The trustees present their report and the unaudited accounts of the charity for the year ended 31 March 2022.

The accounts have been prepared in accordance with the accounting policies set out in note 1 to the accounts and comply with the charity's governing document, the Companies Act 2006 and "Accounting and Reporting by Charities: Statement of Recommended Practice applicable to charities preparing their accounts in accordance with the Financial Reporting Standard applicable in the UK and Republic of Ireland (FRS 102)" (as amended for accounting periods commencing from 1 January 2016)

Objectives and activities

The charitable company provides a public benefit through the promotion of urban or rural regeneration and support for enterprise, education and employment; conservation of the environment. It also promotes physical and mental health and the relief of sickness and the promotion of sustainable development through the regeneration of the Earth Balance site.

The trustees seek to provide important local and public support for enterprise and employment through the provision of premises and land. This has been very successful with the majority of properties being occupied by tenants. In addition, the site saw an increased number of the general public visiting the site to access the natural resources available there during lockdown.

Over the last year, the Trustees have supported the tenants and the local community through a very difficult period where the COVID pandemic spread throughout the world. This had a profound impact on the site and the tenants, however, thanks to a lot of hard work and communication, all of our tenants have survived the crisis, are still on site, and are supporting the local communities they serve.

The Trustees worked hard during this period to deliver the charitable objects and carry out activities. This included continuing discussions about the future of the site with Northumberland County Council, the local Parish Council Disabled Group, some hard to reach sections of the local community, local businesses, the incoming British Volt development nearby and local residents. In particular, there continues to be an open dialogue aspect to the work of the charity which ensures that the charity develops work in line with those it serves. The Trustees have been successful in establishing positive working relationships with all these stakeholders which has provided the charity with a strong and sustainable base from which it can continue to regenerate the site.

During the year, work continued on the planning consultation process around the Health and Wellbeing Village and housing by engaging positively with the local planning consultation and review. This resulted in the charity defraying expenditure as part of a formal planning 'Pre App' process with Northumberland County Council which helped to highlight our future aspirations for the site with the planning team. The Health and Wellbeing Village will feature in the centre of the site, complementing the Proton Therapy Cancer Centre. We are undertaking this work sensitively with partners and at a pace suited to regenerating the site in line with our objects whilst meeting local community needs. The regeneration needed requires meeting future housing, health and social care needs and responding to the current and future needs of those accessing the site today and in the future.

The trustees have paid due regard to guidance issued by the Charity Commission in deciding what activities the charity should undertake.

EARTHBALANCE 2000

TRUSTEES' REPORT (CONTINUED)(INCLUDING DIRECTORS' REPORT) FOR THE YEAR ENDED 31 MARCH 2022

Achievements and performance

The site covers an area of 116.3 Acres (47.09 Hectares) that straddles the South East Northumberland railway line to Ashington and Lynemouth, the proposed "Northumberland Line" within ten minutes of Bedlington Station . It is bordered by the A189 and has two power lines running through the site. The 'Sleekburn' runs through the site to an estuary with a salt marsh as a designated Nature Reserve and the Northumberland Shore Site of Special Scientific Interest is located 2km south-east of the site. The site plays an important part of the ecology of the local area and our response to the pre-app demonstrated a number of unique and important site features.

The site has maintained it's organic status via the Soil Association for another year for the soil and fishery and is home to a diverse mix of wildlife, with onsite habitat protection and enhancement.

The site features habitats that are created to support specific wildlife needs, wetland habitats that support a startling array of water birds. The site has also maintained one of the highest rated Soil Association aquaculture system for breeding of Organic Brown and Rainbow Trout, an area of the site which has been maintained to a high standard once again over the year.

The charity's wholly owned trading subsidiary has allowed it to carry out trading activity, managing the risk at arms length from the charity and allowing the trading company to maximise the current trading opportunities for the sites development. The trading company has two shared board members with the charity to maintain a high level of shared understanding at a strategic level and is supported by the charity to help achieve its charitable objects. The Trading Company made a small profit during the year but continued to make significant progress in developing out the site in accordance with the main charitable object of sustainable development. The charity works closely with professional advisors to ensure that activities are carried out in accordance with charity law.

During the year the charity provided:

- Protection of the environment and wild life through the maintenance and protection of 116.3 acres of land, in the heart of an urban area, that has become home to a wide range of wildlife not normally seen in the area.
- Maintenance of statutory rights of way.
- Provision on site of one of only three proton therapy cancer centres in England, providing new and cutting edge treatment to cancer patients, bringing over £30M of capital investment to the site, adding significant and unique value to the regions healthcare offer.
- Information provided in response to enquiries from the general public for information advice and guidance about the site.
- Approximately 20,000 bags of organic vegetables and fruit were produced and delivered from the site to the general public.
- 20 men and women from the local area regularly enjoyed using the Earth Balance Shed, making projects for the community or for themselves as well as receiving the important health giving benefits of socialising. All free of charge and funded by the charity.
- 56 places per week, 2,800 interventions for disabled adults, learning practical, business, social and life skills based around the creative recycling of textiles.
- Up to 500 children and young people with autism supported by the number one Northumberland based specialist early intervention and post-diagnostic centre for autism.
- 39 individuals with forensic or mental and physical learning needs accessed horticultural activities and support free of charge which equates to 1,872 individual interventions.
- 500 young people and adults attended dance and fitness sessions on the site, improving their health and fitness.

EARTHBALANCE 2000

TRUSTEES' REPORT (CONTINUED)(INCLUDING DIRECTORS' REPORT) FOR THE YEAR ENDED 31 MARCH 2022

The existing buildings and curtilage continue to be improved and the site is gradually seeing a larger number of public visitors being attracted to utilise the open public spaces, visit on site tenants and be welcomed into the community. Works have been ongoing to maintain and tidy up the site, reinstate existing landscaped areas, roads, paths and bridleways, and to progress new works to enhance the site.

The Men's Shed group continues to become an increasingly important part of the centre site, with the members carrying out works to support other tenants and the local community. They are independent of the Earth Balance 2000 charity but continue to be encouraged in their work on the site and in the local community and have worked closely with the national Men's Shed organisation to grow and improve their offer. We currently provide some safe, indoor space for the group to work from and we helped them to register as an independent charity a number of years ago.

A significant achievement during the year, was the continued work with an external stakeholder on the future sustainable development of the site. We have worked as a team with the trading company and our legal advisors to ensure that the agreement reflects the best way forward for the local community and for the charity.

EARTHBALANCE 2000

TRUSTEES' REPORT (CONTINUED)(INCLUDING DIRECTORS' REPORT) FOR THE YEAR ENDED 31 MARCH 2022

Financial review

The Charity continues to manage its finances on a stable basis, and has maintained a level of cash during the year. The COVID crisis had a significant impact on tenants from revising hours of operation, closing down completely through to claiming government support and modifying properties to accommodate a new way of working. Some tenants have emerged from the COVID pandemic stronger and some have struggled both in terms of retaining old customers and attracting new. The Earth Balance Charity and subsidiary Trading Company did not access any government COVID grants during the period but did access a CBILS loan to support future development costs.

The Trustees and General Manager have worked hard during the year to manage income and expenditure with the Trustees relying on 'General Manager' consultancy support to be able to deliver existing services and responsibilities at a minimal cost and long-term liability to the charity.

The financial position for the period shows income over expenditure of £578,716 mainly due to an exceptional item (an improvement on a £9,536 deficit in 2021). During the year, we have had to incur a number of legal costs to support our defending of a legal matter. This results in a balance of £174,528 on restricted funds (£176,425 in 2021), and unrestricted funds of £404,830 (a deficit of £175,783 in 2021). The cash position of £26,737 (£18,741 in 2020) has increased thanks to a small CBILS loan of £13,688, which is being paid back in accordance with loan terms, and the Trustees will seek to increase the cash balance into the future, which will provide further resilience for the charity.

The trustees have kept abreast of the charitable company's deficient unrestricted reserves and have taken action to continue to cut costs, increase income and redress this position and at the same time maintain and improve the site and buildings. There have been a number of improvements made to the site which has reduced the cash position, however, have been necessary to the upkeep of the site. This includes updating certifications for water, electricity, fire safety and certification and general site improvements to common areas, paths and shared area. In addition, the charity has had to maintain legal support as per the note below, which has required considerable time, effort and cost for trustees to understand and act against.

The financial statements show an exceptional income item which is a previous liability which has now become not a liability, following considerable support from our legal advisors .

The balance owing to Orca DMCC for work done on the site originated from negotiations between one of the trustees of Earth Balance and a representative from Orca DMCC. The level of work done was always difficult to substantiate

After the 2021 year end the trustees appointed a firm of solicitors to review evidence of work done and any accompanying documentation. After the review it was decided Orca DMCC had no adequate evidence to support their claim that monies were owed. Following the year end Orca DMCC legal team have demanded various payments . These amounts all differ to such a degree that it is not possible to quantify the amount owed . Hence it is considered that a contingent liability note in the accounts is more suitable . The amount previously included as a liability has been decided to be written off and treated as an exceptional item.

The trustees are delighted that at the year end the unrestricted reserves are once again in surplus and the Trustees will again set a budget for the following year to show a surplus generated through the plans in place and continue to monitor progress against budget on a monthly basis.

The financial statements, which have been prepared in accordance with the Statement of Recommended Practice: Accounting and Reporting by Charities applicable to charities preparing their accounts in accordance with the Financial Reporting Standard applicable in the UK and Ireland (FRS 102) and comply with the charity's governing documents

EARTHBALANCE 2000

TRUSTEES' REPORT (CONTINUED)(INCLUDING DIRECTORS' REPORT) FOR THE YEAR ENDED 31 MARCH 2022

It is the policy of the charitable company to aim to achieve unrestricted funds, which are the free reserves of the charitable company, that equate to approximately six months running costs within the next few years. This will provide sufficient funds to cover management, administration and support costs. The Charity is currently not able to meet this level and so we will seek to reduce and manage our limited costs and maximise income to be able to do so in future periods. The subsidiary trading company generates a profit and has plans to generate a significant profit in future periods, and so we envisage financial support to the charity will follow in the next financial year, particularly with respect to reducing the outstanding liability.

The trustees have assessed the major risks to which the charity and its subsidiary trading company is exposed, in particular those relating to the operations and finances of the charitable company and are satisfied that systems are in place to mitigate our exposure to the major risks. A risk register maintains the risks and mitigations and is discussed by Trustees at each meeting.

Our main objective for future periods is to optimise the potential sustainable development on our site for the benefit of the local community and the protection and enhancement of the site. This work will continue into the next financial year with a new tenant joining us in the kitchen buildings and to complete the work to find and engage with an external stakeholder to carry forward the full site development. Any future development will have to carefully consider the national changes brought about by COVID.

A significant announcement was made shortly after the year end that a gigaplant was to be built within 2km of the site. This will greatly affect the potential future of the site and something which the trustees and trading company will work hard to integrate with throughout 2021 and into 2022 as they begin construction of this site. To give a sense of perspective, there will be 3,000 jobs delivered by the site as well as an estimated further 5,000 in the area. This, along with the improved and reinvigorated trainline, means that the site has huge potential to positively influence housing, health and future economic impact of the local community for the better.

The trustees would continue to engage with the local Wildlife Trust, who are seeking a northern pilot for a national scheme called 'Building With Nature' which will ensure that any development work on site will meet rigorous standards and, in time we hope, accreditation.

In any future potential partnership, we would aim to bring energy generation to the fore of the next stage of the site development and in researching and delivering new and innovative ways to produce energy. There are partners who have significant experience with the zero carbon agenda and so we look forward to future developments meeting zero carbon standards and playing our part in driving environmental innovation.

Work over the winter saw further maintenance and development of the pond system as well as winter maintenance of shared areas and working together with Northumberland County Council and their partners Aecom to provide access and support for the investigation works on the railway line.

The trustees will continue to work with wider partners, including Northumberland County Council, Northumbria NHS Trust, the local Parish councils, the local councillors and the local community nearby, to consider how the site can best deliver sustainable development for the area. The opportunity is now timely and significant for the site, with the creation of 300 high quality jobs, investment of over £50 million and a number of other benefits to follow. The trustees and trading company continue to be focussed in the coming year on this development work and in bringing sustainable development of the site to fruition.

EARTHBALANCE 2000

TRUSTEES' REPORT (CONTINUED)(INCLUDING DIRECTORS' REPORT) FOR THE YEAR ENDED 31 MARCH 2022

Structure, governance and management

The charitable company is limited by guarantee and its governing document is its Memorandum and Articles of Association, dated 6th October 2000 and last amended 16th April 2008.

Earth Balance 2000 ("The Charity") is currently a "Small Charity" (as defined in the Charity Act 2011) and below the audit threshold. It is based at West Sleekburn Farm in the heart of South East Northumberland.

The Governing body of the charitable company are the trustees who meet regularly to decide overall financial policy matters. The trustees meet at least quarterly to review finances and operational matters.

The directors of the charitable company, also act as trustees of the charitable company.

New members of the board are elected by nominating bodies during General Meetings.

The articles of association restricts members to a minimum and maximum of five which has been maintained throughout the year.

The trustees maintain a well mixed skill base of expertise and ensure that where members resign, suitable replacement candidates are sought.

Most members are already familiar with the practical work and objectives of the charitable company bringing their own relevant and unique skills and receive an induction upon joining.

Since the formation of the charitable company it has been a main priority for the board to maintain a viable business operation that maximised income and kept operational costs to a minimum whilst furthering the charitable aims and objectives of delivering sustainable development for the Earth Balance site.

The trustees, who are also the directors for the purpose of company law, and who served during the year and up to the date of signature of the financial statements were:

Mr D P Wilkinson FCA (Resigned 18 March 2022)

Mr T Fraser

Mr G Kemp

Mr D Ledger

Mrs J M Nixon

Mr P C Hardisty (Appointed 18 March 2022)

The trustees' report was approved by the Board of Trustees.

EARTHBALANCE 2000

INDEPENDENT EXAMINER'S REPORT TO THE TRUSTEES OF EARTHBALANCE 2000

I report to the trustees on my examination of the financial statements of Earthbalance 2000 (the charity) for the year ended 31 March 2022.

Responsibilities and basis of report

As the trustees of the charity (and also its directors for the purposes of company law) you are responsible for the preparation of the financial statements in accordance with the requirements of the Companies Act 2006 (the 2006 Act).

Having satisfied myself that the financial statements of the charity are not required to be audited under Part 16 of the 2006 Act and are eligible for independent examination, I report in respect of my examination of the charity's financial statements carried out under section 145 of the Charities Act 2011 (the 2011 Act). In carrying out my examination I have followed all the applicable Directions given by the Charity Commission under section 145(5)(b) of the 2011 Act.

Independent examiner's statement

Since the charity's gross income exceeded £250,000 your examiner must be a member of a body listed in section 145 of the 2011 Act. I confirm that I am qualified to undertake the examination because I am a member of , which is one of the listed bodies.

I have completed my examination. I confirm that no matters have come to my attention in connection with the examination giving me cause to believe that in any material respect:

- 1 accounting records were not kept in respect of the charity as required by section 386 of the 2006 Act; or
- 2 the financial statements do not accord with those records; or
- 3 the financial statements do not comply with the accounting requirements of section 396 of the 2006 Act other than any requirement that the accounts give a true and fair view which is not a matter considered as part of an independent examination; or
- 4 the financial statements have not been prepared in accordance with the methods and principles of the Statement of Recommended Practice for accounting and reporting by charities applicable to charities preparing their accounts in accordance with the Financial Reporting Standard applicable in the UK and Republic of Ireland (FRS 102).

I have no concerns and have come across no other matters in connection with the examination to which attention should be drawn in this report in order to enable a proper understanding of the financial statements to be reached.

BALANCE SHEET (CONTINUED)

AS AT 31 MARCH 2022

The company is entitled to the exemption from the audit requirement contained in section 477 of the Companies Act 2006, for the year ended 31 March 2022.

The directors acknowledge their responsibilities for complying with the requirements of the Companies Act 2006 with respect to accounting records and the preparation of financial statements.

The members have not required the company to obtain an audit of its financial statements for the year in question in accordance with section 476.

These financial statements have been prepared in accordance with the provisions applicable to companies subject to the small companies regime.

The financial statements were approved by the Trustees on 28 November 2022

Mr D Ledger
Trustee

Company registration number 04088392

EARTHBALANCE 2000

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2022

1 Accounting policies

Company information

Earthbalance 2000 is a private company limited by guarantee incorporated in England and Wales. The registered office is West Sleekburn Farm, Bomarsund, Bedlington, Northumberland, NE22 7AD.

1.1 Accounting convention

The accounts have been prepared in accordance with the charity's governing document, the Companies Act 2006 and "Accounting and Reporting by Charities: Statement of Recommended Practice applicable to charities preparing their accounts in accordance with the Financial Reporting Standard applicable in the UK and Republic of Ireland (FRS 102)" (as amended for accounting periods commencing from 1 January 2016). The charity is a Public Benefit Entity as defined by FRS 102.

The charity has taken advantage of the provisions in the SORP for charities applying FRS 102 Update Bulletin 1 not to prepare a Statement of Cash Flows.

The financial statements are prepared in sterling, which is the functional currency of the charity. Monetary amounts in these financial statements are rounded to the nearest £.

The financial statements have been prepared under the historical cost convention. The principal accounting policies adopted are set out below.

1.2 Going concern

At the time of approving the accounts, the trustees have a reasonable expectation that the charity has adequate resources to continue in operational existence for the foreseeable future. Thus the trustees' continue to adopt the going concern basis of accounting in preparing the accounts. The validity of the going concern basis is dependent upon current and future sources of funding or support being sufficient for the charitable company to continue its operations.

The trustees continue to keep the business model under careful review to ensure careful management of resources while maintaining a capacity to benefit from new opportunities. This strategy will allow the company to return to surplus and the trustees are confident in the longer term the company will generate funds to repay creditors.

EARTHBALANCE 2000

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 MARCH 2022

1 Accounting policies

(Continued)

1.3 Charitable funds

Unrestricted funds are available for use at the discretion of the trustees in furtherance of their charitable objectives.

Restricted funds are held for use on specific purposes as determined by restrictions imposed by the funders.

Fixed assets - restricted funds

Earthbalance 2000, a company limited by guarantee, having its primary purpose to provide support and facilitate the creation of opportunities for enterprise and education that work in harmony with the environment through the demonstration of environmentally sustainable practices holds assets, partly financed by grants that can only be used for such expenditure.

- Expenditure incurred on fixed assets is capitalised. The fixed asset being depreciated over their useful economic life in accordance with the charitable company's policy.
- Grant and assistance received specifically to finance the expenditure is credited to a restricted fund.

1.4 Incoming resources

Voluntary income including donations, gifts and legacies and grants that provide core funding or are of a general nature are recognised where there is entitlement, after any performance conditions have been met, the amounts can be measured reliably, and it is probable that income will be received. Such income is only deferred when:

- The donor specifies that the grant or donation must only be used in future accounting periods; or
- The donor has imposed conditions which must be met before the charity has unconditional entitlement.

1.5 Resources expended

Expenditure is recognised once there is a legal or constructive obligation to transfer economic benefit to a third party, it is probable that a transfer of economic benefits will be required in settlement, and the amount of the obligation can be measured reliably.

Expenditure is classified by activity. The costs of each activity are made up of the total of direct costs and shared costs, including support costs involved in undertaking each activity. Direct costs attributable to a single activity are allocated directly to that activity. Shared costs which contribute to more than one activity and support costs which are not attributable to a single activity are apportioned between those activities on a basis consistent with the use of resources. Central staff costs are allocated on the basis of time spent, and depreciation charges are allocated on the portion of the asset's use.

Expenditure is recognised on an accrual basis as a liability is incurred.

Charitable expenditure comprises those costs incurred by the charity in the delivery of activities and services for its beneficiaries. It includes both costs that can be allocated directly to such activities and those costs of an indirect nature to support them.

Governance costs include those costs associated with meeting the constitutional and statutory requirements of the charity and include the examination fees and costs linked to the strategic management of the charity.

All costs are allocated between the expenditure categories of the SOFA on a basis designed to reflect the use of the resource. Costs relating to a particular activity are allocated directly, others are apportioned on an appropriate basis e.g. management time.

EARTHBALANCE 2000

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 MARCH 2022

1 Accounting policies

(Continued)

1.6 Tangible fixed assets

Tangible fixed assets are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

All fixed assets are initially recorded at cost.

Depreciation is calculated to write off the cost less estimated residual value, over the economic life of that asset as follows:

Leasehold property	Over remaining life of the 98 year lease
Fixtures, fittings & equipment	20% Straight line

1.7 Fixed asset investments

Fixed asset investments are initially measured at transaction price excluding transaction costs, and are subsequently measured at fair value at each reporting date. Changes in fair value are recognised in net income/(expenditure) for the year. Transaction costs are expensed as incurred.

A subsidiary is an entity controlled by the charity. Control is the power to govern the financial and operating policies of the entity so as to obtain benefits from its activities.

1.8 Impairment of fixed assets

At each reporting end date, the charity reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised immediately in income/(expenditure) for the year, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Recognised impairment losses are reversed if, and only if, the reasons for the impairment loss have ceased to apply. Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately, unless the relevant asset is carried in at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

1.9 Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities.

1.10 Financial instruments

The charity only has financial assets and liabilities of a kind that qualify as basic financial instruments. Basic financial instruments are initially recognised at transaction value and subsequently measured at their settlement value.

EARTHBALANCE 2000

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 MARCH 2022

1 Accounting policies

(Continued)

1.11 Employee benefits

The cost of any unused holiday entitlement is recognised in the period in which the employee's services are received.

Termination benefits are recognised immediately as an expense when the charity is demonstrably committed to terminate the employment of an employee or to provide termination benefits.

2 Critical accounting estimates and judgements

In the application of the charity's accounting policies, the trustees are required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised where the revision affects only that period, or in the period of the revision and future periods where the revision affects both current and future periods.

3 Donations and legacies

	Unrestricted funds	Total

EARTHBALANCE 2000

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 MARCH 2022

5 Exceptional item

The balance owing to Orca DMCC for work done on the site originated from negotiations between one of the trustees of Earth Balance and a representative from Orca DMCC. The level of work done was always difficult to substantiate. However after the 2021 year end the trustees appointed a firm of solicitors to review evidence of work done and any accompanying documentation. After the review it was decided Orca DMCC had no adequate evidence to support their claim that monies were owed. Following the year end Orca DMCC legal team have demanded various payments. These amounts all differ to such a degree that it is not possible to quantify the amount owed. Hence it is considered that a contingent liability note in the accounts is more suitable. The amount previously included as a liability has been decided to be written off and treated as an exceptional item.

6 Charitable activities

	2022 £	2021 £
