

HOOP Peru Annual Report 2022 Summary

Introduction

HOOP Peru's 2022 annual report highlights their ongoing efforts to support education, coding education, parenting skills, women's health, social enterprise, and waste recycling in the Flora Tristan community in Arequipa. The report showcases their dedication to bridging educational gaps, empowering the community, and promoting sustainable practices.

Fundraising and Partnerships

Fundraising by Helping Overcome Obstacles Peru UK primarily relied on individual donations in 2022. Director Yves Trionnaires actively engaged with partner organizations in Europe and the USA to share progress and initiatives undertaken in Arequipa. Links with organisations local to Arequipa have also been established.

Education

HOOP Peru addressed the educational gap exacerbated by the COVID-19 pandemic with their "Learning with HOOP" project. While the return to in-person classes in April 2022 helped, disparities in educational quality persist. The project aims to expand and continue "Learning with HOOP" to provide additional support, particularly for students struggling to catch up.

Coding

In partnership with STUF United Fund, HOOP Peru initiated a coding education project for children and youth in Flora Tristan. Limited access to computers and resources prompted them to provide coding education. The project expanded to four schools, instructing 62 students and guiding them in creating community-focused projects.

Parenting Skills Classes

HOOP Peru conducted workshops to improve parenting skills, connecting parents with their childhood experiences and providing tools for better communication with their children. Although 25 beneficiaries registered, the average attendance was 55.9%, with only four participants attending all four sessions.

Social Enterprise Partnership

HOOP Peru aimed to develop a sustainable social business model for women in the community by commercializing hand-woven textile products, promoting women's employability, and economic independence. The focus was on technical training in weaving, business entrepreneurship, and soft skill development.

Women's Health

A cancer screening campaign in November was open to the entire community, with 33 women participating in cervical, breast, and skin cancer screenings.

Waste Recycling Project

The waste recycling project aims to create a sustainable, environmentally conscious community by managing organic waste from beneficiary households. Challenges included fluctuating participation due to proximity to the composting bins and mothers' variable working hours. Plans to group participants based on proximity and enhance cultivation areas aim to improve participation.

Conclusion

The 2022 annual report showcases HOOP Peru's commitment to improving education, empowering the community, promoting sustainable practices, and supporting women's health. Despite challenges, they continue to make a positive impact in the Flora Tristan community in Arequipa.
