Section B

Structure, governance and management

Description of the charity's trusts

Type of governing document (eg. trust deed, constitution)	A written constitution
How the charity is constituted (eg. trust, association, company)	An association as a Charitable Incorporated Organisation (CIO)
Trustee selection methods (eg. appointed by, elected by)	Nomination and majority vote agreed at a quorate Trustee meeting or conference call, with confirmation by a vote of trustees and members at an AGM

Additional governance issues (Optional information)

You **may choose** to include additional information, where relevant, about:

- policies and procedures adopted for the induction and training of trustees;
- the charity's organisational structure and any wider network with which the charity works;
- relationship with any related parties;
- trustees' consideration of major risks and the system and procedures to manage them.

In this period the Trustees continued to operate according to its policies and procedures.

We continued to enhance the membership structure and processes – we renewed the subscription to the proprietary platform “Wild Apricot” on a rolling renewal basis.

Governance Activities

Trustee meetings continued regularly.

Established informal groups local and special interest

The Trustees continued to collaborate with the regulators, The Engineering Council (EngC) and with The Society for the Environment (SocEnv), to register GATE as a regulated Professional Engineering Institution and a Licenced Member of SocEnv. We continue to do this in collaboration with the Society of Operations Engineers, SOE.

On 4th May 2024 the Trustees reached an agreement with SocEnv for GATE to be registered as their first Associate Body; supported by the Society of Operations Engineers (SOE) with whom GATE has a Professional Affiliate agreement. This means that GATE can offer, with support of SOE, the qualification Chartered Environmentalist to Members.

We have worked to align the Competence Framework for MGATE to the updated SocEnv competence framework for CEnv, as part of the pilot of 3 test-case membership applications to trial our proposed plan to award Chartered Environmentalist status at the same time as full membership of GATE with post-nominals MGATE – progressing with SOE – **detailed mapping of competences has been completed, and approval in principle secured from SOE and SocEnv that the GATE process can give applicants full membership (MGATE)_ and Chartered Environmentalist status (CEnv) with one application.**

The organisation continued to enrol more members at Affiliate (open, free), Associate (qualified or working in the field, £25 pa) and Member (qualified and experienced, peer-reviewed, £50 pa) grades.

Summary of the objects of the charity set out in its governing document

The purposes for which GATE is established are;

1) To advance the practice, profession and education of Transition Engineering: defined as the engineering necessary to enable society to move towards, and to enable, a sustainable future.

2) To promote, sustain and increase individual and collective knowledge and understanding of Transition Engineering as a learned society for the practice of Transition Engineering.

3) To provide the services of a professional membership association for Transition Engineers.

4) To demonstrate and provide educational methods, materials and facilities for the purpose of the advancement of knowledge of members and of the public in connection with all aspects of engineering that appertain to ecological and sustainable living including, but not limited to, the conservation of natural habitats, the protection of species, the minimisation of waste, the development of sustainable water and sewerage systems, the development of sustainable energy systems, eco-building techniques and principles, organic and sustainable food systems and ethical community living, with no geographic limits

5) To advance the education of members and of the public and to promote research into and disseminate information about all aspects of engineering connected to the transition to sustainable development (where "sustainable development" means development that enhances the quality of life for all without damaging the environment or the ability of future generations to meet their own needs) with no geographic limits

6) To create disseminate and implement methodologies to enable transition to a sustainable future, including through education and training.

7) To communicate the need for and the required direction of global change.

8) To develop methodologies for making positive, sustainable changes happen, and to make such changes happen, using the widest possible range of engineering, technological and other skills and knowledge.

9) To support a global network of Transition Engineering associations.

10) To enable the benefits of Transition Engineering to accrue to :

- Members of GATE
- Society at Large
- Future Generations
- The environment

11) To enable Transition Engineers / Members to sign a code of professional conduct.

12) GATE is a global organisation with no geographic limits. Nothing in this constitution shall authorise an application of the property of GATE for the purposes which are not charitable in accordance with [section 7 of the Charities and Trustee Investment (Scotland) Act 2005] and [section 2 of the Charities Act (Northern Ireland) 2008]

Summary of the main activities undertaken for the public benefit in relation to these objects (include within this section the statutory declaration that trustees have had regard to the guidance issued by the Charity Commission on public benefit)

During this Ninth reporting period activities comprise the following:

The Trustees continued dialogue with regulatory bodies below with a view to initiating the process of registration:

- The Engineering Council UK (EngC)
- The Society for the Environment (SocEnv)

The Trustees continued to collaborate with the Society of Operations Engineers, SOE, with whom GATE is a Professional Affiliate: SOE is helping GATE to enrol GATE members as Chartered Environmentalists (CEnv).

The Trustees have continued to develop the products and services provided by GATE to enable members to more

effectively bring about the changes needed by all of society to secure the capacity to continue to meet societal needs within immutable constraints.

- Education and Training: We have collated on our platform the portfolio that covers different levels of price and commitment, from free webinars to CPD courses to Masters and PhD. This framework will be expanded.
- Networking: we have just launched a consultation of members and our wider network (~2,600 people on LinkedIn) to find out what networking mechanisms we should offer to enable them to share ideas and debate and learning around Transition Engineering
- Professional Recognition: We continue to work with EngC and SocEnv towards securing the capability to award Chartered Engineer and Chartered Environmentalist qualifications.

Trustees have regard to the Charity Commission Public Benefit Guidance when exercising powers and duties to which the guidance is relevant; trustees are aware of the guidance, take it into account when making decisions. No departure from the guidance has arisen.

Trustees continued to build relationships with collaborators to enable the dissemination of Transition Engineering learning more widely, including Chevening, Engineers for Social Responsibility.

Trustees collaborated with Herriott Watt University on the establishment of a formal academic discipline for Transition Engineering, and supported the application to UKRI for significant funding to enable this to be implemented.

9th AGM will take place virtually on 13th November 2025.

Additional details of objectives and activities (Optional information)

You **may choose** to include further statements, where relevant, about:

- policy on grantmaking;
- policy programme related investment;
- contribution made by volunteers.

All work undertaken by and for GATE during this period has been carried out by volunteers. This includes all the time given by the Trustees, and time given by our new Admin Support Volunteer and our new IT Volunteer. Admin support time was partly donated (see below) and partly paid for as a donation by Daniel Kenning, Chair of Trustees.

Extent of Trustee Contributions: not recorded for this year.

Non-financial donations were received from:

- Virtual Office Orkney Ltd: donation of professional admin services valued at £404, in role of Admin Volunteer.
- Sveyntech Orkney: donation of IT support in role of IT Volunteer. Time not tracked.

Summary of the main achievements of the charity during the year

Enrolment of a further **3 Members and 11 Associates bringing the totals to 26 Members and 52 Associates.**

Holding of the Virtual 8th Annual General Meeting in **November 2024.**

GATE is now registered as an Associate Body of the Society for the Environment, SocEnv. This creates the opportunity for GATE to award the Chartered Environmentalist, CEnv, qualification.

We have made further, albeit slow, progress with EngC towards registering as a Professional Engineering Institution.

The progress has been slow, but during the year we established support in principle, and we integrated all of the latest EngC and SocEnv Professional Competences into the GATE membership process, in readiness for the accreditation of members for CEng qualification.

Section E Financial review

Brief statement of the charity's policy on reserves	The financial activity during this period included income from the new membership subscriptions. The only expenditure was bank charges and office administration costs, and renewal of the Wild Apricot Membership Association Platform Please see financial activity summary below.
Details of any funds materially in deficit	None

Further financial review details (Optional information)

<p>You may choose to include additional information, where relevant about:</p> <ul style="list-style-type: none"> • the charity's principal sources of funds (including any fundraising); • how expenditure has supported the key objectives of the charity; • investment policy and objectives including any ethical investment policy adopted. 	<p>The principal source of funds is membership fees (we can receive financial donations but have not received any this year).</p> <p>The total money received during 2024-2025 was £1,153.00 and the total expenditure was £1,022.00</p> <p>All costs associated with Trustees meetings are covered by Trustees.</p> <p>The money is currently held in a "Charity Current Account" at the ethical bank Triodos Bank NV. Online banking is set up with three Trustee account operators.</p>
--	--

Section F Other optional information

<p>A balance sheet showing the financial transactions is available if required. Non-financial donations were received from:</p> <ul style="list-style-type: none"> • Splendid Engineering Ltd: donation of professional admin services, provided by Virtual Office Orkney Ltd, valued at £915.00 (in addition to voluntary time noted above, section C.)

Section G Declaration

The trustees declare that they have approved the trustees' report above.

Summary of the objects of the charity set out in its governing document

The purposes for which GATE is established are;

- 1) To advance the practice, profession and education of Transition Engineering: defined as the engineering necessary to enable society to move towards, and to enable, a sustainable future.
- 2) To promote, sustain and increase individual and collective knowledge and understanding of Transition Engineering as a learned society for the practice of Transition Engineering.
- 3) To provide the services of a professional membership association for Transition Engineers.
- 4) To demonstrate and provide educational methods, materials and facilities for the purpose of the advancement of knowledge of members and of the public in connection with all aspects of engineering that appertain to ecological and sustainable living including, but not limited to, the conservation of natural habitats, the protection of species, the minimisation of waste, the development of sustainable water and sewerage systems, the development of sustainable energy systems, eco-building techniques and principles, organic and sustainable food systems and ethical community living, with no geographic limits
- 5) To advance the education of members and of the public and to promote research into and disseminate information about all aspects of engineering connected to the transition to sustainable development (where "sustainable development" means development that enhances the quality of life for all without damaging the environment or the ability of future generations to meet their own needs) with no geographic limits
- 6) To create disseminate and implement methodologies to enable transition to a sustainable future, including through education and training.
- 7) To communicate the need for and the required direction of global change.
- 8) To develop methodologies for making positive, sustainable changes happen, and to make such changes happen, using the widest possible range of engineering, technological and other skills and knowledge.
- 9) To support a global network of Transition Engineering associations.
- 10) To enable the benefits of Transition Engineering to accrue to :
 - Members of GATE
 - Society at Large
 - Future Generations
 - The environment
- 11) To enable Transition Engineers / Members to sign a code of professional conduct.
- 12) GATE is a global organisation with no geographic limits. Nothing in this constitution shall authorise an application of the property of GATE for the purposes which are not charitable in accordance with [section 7 of the Charities and Trustee Investment (Scotland) Act 2005] and [section 2 of the Charities Act (Northern Ireland) 2008]

Summary of the main activities undertaken for the public benefit in relation to these objects (include within this section the statutory declaration that trustees have had regard to the guidance issued by the Charity Commission on public benefit)

During this Eighth reporting period activities comprise the following:

The Trustees continued dialogue with regulatory bodies below with a view to initiating the process of registration:

- The Engineering Council UK (EngC)
- The Society for the Environment (SocEnv)

The Trustees have continued to develop the products and services provided by GATE to benefit the members.

- Education and Training: We have collated on our platform the portfolio that covers different levels of price and commitment, from free webinars to CPD courses to Masters and PhD. This framework will be expanded.

- **Networking:** we have just launched a consultation of members and our wider network (~2,600 people on LinkedIn) to find out what networking mechanisms we should offer to enable them to share ideas and debate and learning around Transition Engineering
- **Professional Recognition:** We continue to work with EngC and SocEnv towards securing the capability to award Chartered Engineer and Chartered Environmentalist qualifications.

Trustees have regard to the Charity Commission Public Benefit Guidance when exercising powers and duties to which the guidance is relevant; trustees are aware of the guidance, take it into account when making decisions. No departure from the guidance has arisen.

Trustees continued to build relationships with collaborators to enable the dissemination of Transition Engineering learning more widely, including Chevening, Engineers for Social Responsibility.

Trustees collaborated with Herriott Watt University on the establishment of a formal academic discipline for Transition Engineering, and supported the application to UKRI for significant funding to enable this to be implemented.

8th AGM will take place virtually on 14th November 2024.

Additional details of objectives and activities (Optional information)

You **may choose** to include further statements, where relevant, about:

- policy on grantmaking;
- policy programme related investment;
- contribution made by volunteers.

All work undertaken by and for GATE during this period has been carried out by volunteers. This includes all the time given by the Trustees, and time given by our new Admin Support Volunteer and our new IT Volunteer. Admin support time was partly donated and partly paid for as a donation by Daniel Kenning, Chair of Trustees.

Extent of Trustee Contributions: not recorded for this year.

Non-financial donations were received from:

- Virtual Office Orkney Ltd: donation of professional admin services valued at £390, in role of Admin Volunteer.
- Sveyntech Orkney: donation of IT support in role of IT Volunteer.

Summary of the main achievements of the charity during the year

Enrolment of a further 3 Members and 11 Associates bringing the totals to 26 Members and 52 Associates.

Holding of the Virtual 7th Annual General Meeting in **8th October 2023**.

We have made significant progress with EngC and SocEnv towards registering as a Professional Engineering Institution and Member of SocEnv. The progress has been slow, but during the year we established support in principle, and we integrated all of the latest EngC and SocEnv Professional Competences into the GATE membership process, in readiness for the accreditation of members for CEng and CEnv qualifications.

We have initiated a collaboration with Chevening, which will enable GATE to share Transition Engineering thinking with ~1500 young scholars from commonwealth countries. Chevening agreed to invite GATE to speak on Transition Engineering at the 2023 Chevening Conference for scholars.

Section E Financial review

Brief statement of the charity's policy on reserves	<p>The financial activity during this period included income from the new membership subscriptions. The only expenditure was bank charges and office administration costs.</p> <p>Please see financial activity summary below.</p>
Details of any funds materially in deficit	None

Structure, governance and management

Description of the charity's trusts

Type of governing document (eg. trust deed, constitution)	A written constitution
How the charity is constituted (eg. trust, association, company)	An association as a Charitable Incorporated Organisation (CIO)
Trustee selection methods (eg. appointed by, elected by)	Nomination and majority vote agreed at a quorate Trustee meeting or conference call, with confirmation by a vote of trustees and members at an AGM

Additional governance issues (Optional information)

<p>You may choose to include additional information, where relevant, about:</p> <ul style="list-style-type: none"> • policies and procedures adopted for the induction and training of trustees; • the charity's organisational structure and any wider network with which the charity works; • relationship with any related parties; • trustees' consideration of major risks and the system and procedures to manage them. 	<p>In this period the Trustees continued to operate according to its policies and procedures.</p> <p>In particular the membership structure and processes were further developed including subscribing to a proprietary platform that has significantly improved the processing of applications to join and the communications with Members, Associates and Affiliates.</p> <p>The Trustees refined and updated Rule 1: Membership to simplify the structure of grades, and adopted Rule 3: CPD and the Disciplinary and Appeals Policy, including establishment of relevant Disciplinary and Appeals Committees.</p> <p>The Trustees continued to collaborate with the regulators, The Engineering Council (EngC) and with The Society for the Environment (SocEnv), to register GATE as a regulated Professional Engineering Institution and a Licenced Member of SocEnv.</p> <p>The organisation continued to enrol more members at Affiliate (open, free), Associate (qualified or working in the field, £25 pa) and Member (qualified and experienced, peer-reviewed, £50 pa) grades.</p> <p>Trustees continue to develop learning around Transition Engineering and to disseminate via existing online platforms.</p>
--	---

Section C

Objectives and activities

Summary of the objects of the charity set out in its governing document

The purposes for which GATE is established are;

- 1) To advance the practice, profession and education of Transition Engineering: defined as the engineering necessary to enable society to move towards, and to enable, a sustainable future.
- 2) To promote, sustain and increase individual and collective knowledge and understanding of Transition Engineering as a learned society for the practice of Transition Engineering.
- 3) To provide the services of a professional membership association for Transition Engineers.
- 4) To demonstrate and provide educational methods, materials and facilities for the purpose of the advancement of knowledge of members and of the public in connection with all aspects of engineering that appertain to ecological and sustainable living including, but not limited to, the conservation of natural habitats, the protection of species, the minimisation of waste, the development of sustainable water and

sewerage systems, the development of sustainable energy systems, eco-building techniques and principles, organic and sustainable food systems and ethical community living, with no geographic limits

5) To advance the education of members and of the public and to promote research into and disseminate information about all aspects of engineering connected to the transition to sustainable development (where “sustainable development” means development that enhances the quality of life for all without damaging the environment or the ability of future generations to meet their own needs) with no geographic limits

6) To create disseminate and implement methodologies to enable transition to a sustainable future, including through education and training.

7) To communicate the need for and the required direction of global change.

8) To develop methodologies for making positive, sustainable changes happen, and to make such changes happen, using the widest possible range of engineering, technological and other skills and knowledge.

9) To support a global network of Transition Engineering associations.

10) To enable the benefits of Transition Engineering to accrue to :

- Members of GATE
- Society at Large
- Future Generations
- The environment

11) To enable Transition Engineers / Members to sign a code of professional conduct.

12) GATE is a global organisation with no geographic limits. Nothing in this constitution shall authorise an application of the property of GATE for the purposes which are not charitable in accordance with [section 7 of the Charities and Trustee Investment (Scotland) Act 2005] and [section 2 of the Charities Act (Northern Ireland) 2008]

During this seventh reporting period activities have returned to normal levels following the removal of constraints imposed on Trustees by Covid.

The Trustees continued dialogue with regulatory bodies below with a view to initiating the process of registration:

- The Engineering Council UK (EngC)
- The Society for the Environment (SocEnv)

The original target of achieving this during 2018-2019 has been delayed due to the time pressures on Trustees and the slow initial enrolment of members. The process of engaging with and aligning to the requirements of EngC and SocEnv has been long and complex, but significant progress has been made.

The Trustees have continued to develop the products and services provided by GATE to benefit the members.

- Education and Training: We have collated on our platform the portfolio that covers different levels of price and commitment, from free webinars to CPD courses to Masters and PhD. This framework will be expanded.
- Networking: we have just launched a consultation of members and our wider network (~2,600 people on LinkedIn) to find out what networking mechanisms we should offer to enable them to share ideas and debate and learning around Transition Engineering
- Professional Recognition: We continue to work with EngC and SocEnv towards securing the capability to award Chartered Engineer and Chartered Environmentalist qualifications.

Summary of the main activities undertaken for the public benefit in relation to these objects (include within this section the statutory declaration that trustees have had regard to the guidance issued by the Charity Commission on public benefit)

7th AGM will take place virtually on 18th October 2023.

Trustees have regard to the Charity Commission Public Benefit Guidance when exercising powers and duties to which the guidance is relevant; trustees are aware of the guidance, take it into account when making decisions. No departure from the guidance has arisen.

Additional details of objectives and activities (Optional information)

You **may choose** to include further statements, where relevant, about:

- policy on grantmaking;
- policy programme related investment;
- contribution made by volunteers.

All work undertaken by and for GATE during this period has been carried out by volunteers. This includes all the time given by the Trustees, and admin support time partly donated and partly paid for as a donation by Daniel Kenning.

Extent of Trustee Contributions: not recorded for this year.

Non-financial donations were received from:

- Virtual Office Orkney Ltd: donation of professional admin services valued at £390, including support for the GATE activities at the Orkney International Science Festival, Sept 2022.

Summary of the main achievements of the charity during the year

Enrolment of a further 3 Members and 11 Associates bringing the totals to 26 Members and 52 Associates.

Holding of the sixth Annual General Meeting in 20th October 2022 virtually

Needs new paragraphs to replace last year's (below in red)

We have made significant progress with EngC and SocEnv towards registering as a Professional Engineering Institution and Member of SocEnv. The progress has been slow, but during the year we established support in principle, and we integrated all of the latest EngC and SocEnv Professional Competences into the GATE membership process, in readiness for the accreditation of members for CEng and CEnv qualifications.

We have initiated a collaboration with Chevening, which will enable GATE to share Transition Engineering thinking with ~1500 young scholars from commonwealth countries. Chevening agreed to invite GATE to speak on Transition Engineering at the 2023 Chevening Conference for scholars.

In September 2022 GATE shared Transition Engineering at the Orkney International Science Festival.

- Co-Founders of GATE Daniel Kenning and Susan Krumdieck gave the annual Grimond Lecture commemorating MP Jo Grimond, on "Engineering the Future" <https://oisf.org/fest-event/engineering-the-future-2/>
- Tea for Transition: a series of 3 workshops led by Daniel Kenning open to the public to explore how Transition Engineering thinking can be applied to any system: the public chose "a local business, in an old building, and how it can deal with rising energy costs", and chose The Stromness Hotel as a worked example.
- Transition Lab "Ting" – workshop led by Susan Krumdieck to use Transition Engineering and the structure of a traditional Orcadian Ting (a community jury) to stimulate ideas to reduce children's dependence on fossil energy for school transport.

Section E Financial review

Brief statement of the charity's policy on reserves	<p>The financial activity during this period included income from the new membership subscriptions. The only expenditure was bank charges and office administration costs.</p> <p>Please see financial activity summary below.</p>
Details of any funds materially in deficit	None

Further financial review details (Optional information)

<p>You may choose to include additional information, where relevant about:</p> <ul style="list-style-type: none"> the charity's principal sources of funds (including any fundraising); how expenditure has supported the key objectives of the charity; investment policy and objectives including any ethical investment policy adopted. 	<p>The principal source of funds is membership fees and donations.</p> <p>The total money received during 2022-2023 was £1,111 and the total expenditure was £8 for bank charges and £751 administration costs (membership platform and registered office costs).</p> <p>All costs associated with Trustees meetings are covered by Trustees.</p> <p>The money is currently held in a "Charity Current Account" at the ethical bank Triodos Bank NV.</p> <p>Online banking has been set up with three Trustee account operators.</p>
--	--

Section F Other optional information

<p>A balance sheet showing the financial transactions is available if required. Non-financial donations were received from:</p> <ul style="list-style-type: none"> Splendid Engineering Ltd: donation of professional admin services, provided by Virtual Office Orkney Ltd, valued at £915.00 (in addition to voluntary time noted above, section C.)

Structure, governance and management

Description of the charity's trusts

Type of governing document (eg. trust deed, constitution)	A written constitution
How the charity is constituted (eg. trust, association, company)	An association as a Charitable Incorporated Organisation (CIO)
Trustee selection methods (eg. appointed by, elected by)	Nomination and majority vote agreed at a quorate Trustee meeting or conference call, with confirmation by a vote of trustees and members at an AGM

Additional governance issues (Optional information)

You **may choose** to include additional information, where relevant, about:

- policies and procedures adopted for the induction and training of trustees;
- the charity's organisational structure and any wider network with which the charity works;
- relationship with any related parties;
- trustees' consideration of major risks and the system and procedures to manage them.

In this period the Trustees continued to operate according to its policies and procedures, albeit at a much reduced level due to Covid since early 2020.

In particular the membership structure and processes were further developed; we have realised that our existing web processes are a significant weakness and we are looking at subscribing to a proprietary platform to overcome this barrier.

The organisation continued to enrol more members at Affiliate (open, free), Associate (qualified or working in the field, £25 pa) and Member (qualified and experienced, peer-reviewed, £50 pa) grades.

Trustees continue to develop learning around Transition Engineering and to disseminate via existing online platforms.

Section C

Objectives and activities

Summary of the objects of the charity set out in its governing document

The purposes for which GATE is established are;

- 1) To advance the practice, profession and education of Transition Engineering: defined as the engineering necessary to enable society to move towards, and to enable, a sustainable future.
- 2) To promote, sustain and increase individual and collective knowledge and understanding of Transition Engineering as a learned society for the practice of Transition Engineering.
- 3) To provide the services of a professional membership association for Transition Engineers.
- 4) To demonstrate and provide educational methods, materials and facilities for the purpose of the advancement of knowledge of members and of the public in connection with all aspects of engineering that appertain to ecological and sustainable living including, but not limited to, the conservation of natural habitats, the protection of species, the minimisation of waste, the development of sustainable water and sewerage systems, the development of sustainable energy systems, eco-building techniques and principles, organic and sustainable food systems and ethical community living, with no geographic limits
- 5) To advance the education of members and of the public and to promote research into and disseminate information about all aspects of engineering connected to the transition to sustainable development (where "sustainable development" means development that enhances the quality of life for all without damaging the environment or the ability of future generations to meet their own needs) with no geographic limits

- 6) To create disseminate and implement methodologies to enable transition to a sustainable future, including through education and training.
- 7) To communicate the need for and the required direction of global change.
- 8) To develop methodologies for making positive, sustainable changes happen, and to make such changes happen, using the widest possible range of engineering, technological and other skills and knowledge.
- 9) To support a global network of Transition Engineering associations.
- 10) To enable the benefits of Transition Engineering to accrue to :
- Members of GATE
 - Society at Large
 - Future Generations
 - The environment
- 11) To enable Transition Engineers / Members to sign a code of professional conduct.
- 12) GATE is a global organisation with no geographic limits. Nothing in this constitution shall authorise an application of the property of GATE for the purposes which are not charitable in accordance with [section 7 of the Charities and Trustee Investment (Scotland) Act 2005] and [section 2 of the Charities Act (Northern Ireland) 2008]

During this fifth reporting period minimal activities have been undertaken due to the pressures and constraints imposed on Trustees by Covid.

The Trustees have continued to address some challenges including the function of the website, we consulted with Membership professionals in other professional engineering institutions (especially IEMA, SocEnv and IMechE) and we started to explore the options emerging in the last year to use external platforms for membership based on CRM tools. This offers a solution to our website membership challenges.

We continued to develop teaching frameworks for Transition Engineering – there is now a short course available hosted by University of Canterbury NZ and enquiries about Masters courses from two UK universities.

Holding the 4th AGM virtually on 17th November 2020

GATE has also continued its active LinkedIn discussion forum for the public benefit to discuss and disseminate Transition Engineering concepts and attract potential members.

The Trustees continued dialogue with regulatory bodies below with a view to initiating the process of registration:

- The Engineering Council UK
- The Society for the Environment

The original target of achieving this during 2018-2019 has been delayed due to the time pressures on Trustees and the slow initial enrolment of members.

Trustees have regard to the Charity Commission Public Benefit Guidance when exercising powers and duties to which the guidance is relevant; trustees are aware of the guidance, take it into account when making decisions. No departure from the guidance has arisen.

Trustee and Co-Founder Susan Krumdieck has published a text book on Transition Engineering.

Summary of the main activities undertaken for the public benefit in relation to these objects (include within this section the statutory declaration that trustees have had regard to the guidance issued by the Charity Commission on public benefit)

Additional details of objectives and activities (Optional information)

You **may choose** to include further statements, where relevant, about:

- policy on grantmaking;
- policy programme related investment;
- contribution made by volunteers.

All work undertaken by and for GATE during this period has been carried out by volunteer Trustees.

Summary of the main achievements of the charity during the year

Enrolment of a further 5 Members and 12 Associates bringing the totals to 20 Members and 35 Associates.

Holding of the fourth Annual General Meeting in November 2020 virtually.

Our main challenge during this difficult year of Covid was to keep ticking over, to keep in contact via LinkedIn and the GATE website, and to ensure we can re-start when Covid allows.

This minimum work has included posting updates to our network of members and supporters on LinkedIn, enrolling a small number of new members, and continuing to develop the Transition Engineering methodology in our own work and networks.

We have continued to build relationships with universities in New Zealand, UK, France who are interested in launching degree and masters level courses.

Section E

Financial review

Brief statement of the charity's policy on reserves

The financial activity during this period included income from the new membership subscriptions. The only expenditure was bank charges

Please see financial activity summary below.

Details of any funds materially in deficit

None

Further financial review details (Optional information)

You **may choose** to include *additional information*, where relevant about:

- the charity's principal sources of funds (including any fundraising);
- how expenditure has supported the key objectives of the charity;
- investment policy and objectives including any ethical investment policy adopted.

The principal source of funds is membership fees. The total money received during 2020-2021 was £571 and the only expenditure was £4 for bank charges. All costs associated with Trustees meetings are covered by Trustees.

The money is currently held in a "Charity Current Account" at the ethical bank Triodos Bank NV.

Online banking has been set up with three Trustee account operators.

Section F

Other optional information

A balance sheet showing the financial transactions is available if required.

Section G

Declaration

The trustees declare that they have approved the trustees' report above.
