## TRUSTEES' ANNUAL REPORT FOR 2024

During the year the Naturetale Restoration Foundation continued with the implementation of its meadow species establishment trial, as planned. This year flowering plants were recorded for the following species: Meadow saxifrage, Pignut, Dropwort. During the spring and summer the trial plots were mown, as per the trial specification.

This year, for the first time, the trial generated sufficient data to enable a statistical analysis to be carried out for Meadow saxifrage. This yielded interesting conclusions that have been written up and distributed to interested parties.
