Annual Report

The Charity has experienced static activity due to a marked reduction in fund raising activities and a similar reduction in charitable donations.

There were no successful requests for grant funding during the year,

The COVID-19 pandemic materially affected fundraising activities. In addition administrative difficulties concerning access to the bank account arose with the unannounced closure and relocation of the branch account. Difficulties were also encountered with online access to the account due to a change in account signatories. The Charity continues to try and resolve these issues with TSB.
