

Hazie Days Annual Report and Accounts

10/7/2023 until 09/7/2024

Our Objectives remain true to our constitution of 2014, which are:

- Providing activities that are inclusive to all taking into account the individual needs of children
- Provide supportive environments for parents and extended families to seek advice from Hazie Days staff, other parents and signposting to other organisations
- Creating awareness for various conditions
- Support children through hospital visits and treatment
- Reduce isolation for children and young people with special educational needs and long term health issues, their siblings and families.

Hazie Days has made a strong recovery from our COVID closure and has been working on a marketing strategy to introduce new families to the charity.

We continue to have a strong relationship with our Corporate Partner and are extremely grateful for their ongoing support.

Our 2024 aims are to improve our provision for the 12-21 year old category, a section of our community which is underserved currently. We also plan to adjust our focus toward building life skills and independent living skills, with a proposed change to our constitution in 2024-2025 AGM.
