

Report on love Gloucester 2021- 2022

As reported in the previous report, the Covid epidemic had a significant effect on potential activities of love Gloucester and this coupled with the departure of a large number trustees resulted in very little activity. During 2021-22 there was no activity of the charity and no change in trustees.

It was proving difficult to recruit new trustees but potential new trustees have come forward just before submission of this report. We are currently in discussion on a potential way forward for love Gloucester within our constitution, so that we are able to reactivate the charity's activities with new trustees and new motivation and possibilities for the coming year. Once agreement is reached we will add the new trustees to the registration.
