Achievements and performance

Financial review

In the period under review, the trust made a surplus of £196,563 (2021: surplus £167,266).

It is the policy of the the trust that unrestricted funds which have not been designated for a specific use should be maintained at a level equivalent to between three and six month's expenditure. The trustee consider that reserves at this level will ensure that, in the event of a significant drop in funding, they will be able to continue the the trust's current activities while consideration is given to ways in which additional funds may be raised. This level of reserves has been maintained throughout the year.

The trustee have assessed the major risks to which the the trust is exposed, and are satisfied that systems are in place to mitigate exposure to the major risks.

Structure, governance and management

The the trust was established by a charitable trust deed in December 2017.

The financial statements have departed from the Charities (Accounts and Reports) Regulations 2008 only to the extent required to provide a true and fair view. This departure has involved following the Statement of Recommended Practice for charities applying FRS 102 rather than the version of the Statement of Recommended Practice which is referred to in the Regulations but which has since been withdrawn.

The financial statements are prepared in sterling, which is the functional currency of the the trust. Monetary amounts in these financial statements are rounded to the nearest £.

It is probable that settlement will be required and the amount of the obligation can be measured reliably.

Financial instruments are recognised in the the trust's balance sheet when the the trust becomes party to the contractual provisions of the instrument.

Basic financial assets, which include debtors and cash and bank balances, are initially measured at transaction price including transaction costs and are subsequently carried at amortised cost using the effective interest method unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest.
