

Saving Lives Together

Annual Report 1/1/2024 – 31/12/2024

We have seen a huge rise in deaths from Out of Hospital Cardiac Arrest in this period. Subsequently we have been able to engage in an increased number of free CPR and Defib awareness training sessions for our immediate community and we have extended our geographical area to regularly include Portsmouth, London and Basingtoke. We continue to host a fundraising ball in order to both increase awareness of our charity and to help increase public desire to donate.

We continue to help fund and install PADs in our community and act as guardians for these in a voluntary capacity.

Angharad Snow
