Achievements and Performance

	SORP reference	
Summary of the main achievements of the charity, identifying the difference the charity's work has made to the circumstances of its beneficiaries and any wider benefits to society as a whole.	Para 1.20	<p>The Charity's first project is the Tanzania Mesh Hernia Project. Hernia surgery, however, is the most common general surgical procedure performed worldwide, including in Tanzania where there are an estimated 800,000 hernias currently requiring treatment. The morbidity rate is very high due to a lack of resources, training and inadequate procedures. The Project is proposing to adopt a well-established procedure using mesh for hernia repair, rather than a traditional suture plication technique.</p> <p>Phase 1 of the Project was undertaken in March 2020, when 72 surgeons (of all grades) and 5 centres were involved. Feedback and results were again very encouraging. The centres continue to use the Mesh technique and as of December 2022, 320 surgical procedures have been performed with no recurrences.</p> <p>The Charity has liaised with the University of Winchester and has completed a research project which involved teaching/coaching our Tanzanian clinical counterparts techniques in undergoing qualitative.</p> <p>Progress has been very slow in the last year due to the Covid-19 pandemic, but the relationship with the Tanzanian surgical community continues to flourish.</p> <p>Two members of the UK faculty flew to Tanzania in November 2022 to assess and review the situation. It was all very positive, and those centres who were onboarded in March 2020 are now working independently.</p> <p>The ultimate aim of this project is to allow Tanzanian surgeons to work independently of the UK and due to the of the Covid-19 pandemic this process of knowledge transfer/monitoring and</p>

		review within the Tanzanian community has been accelerated.
