## **Chair's Introduction**

Political and economic turmoil in the UK overshadowed a more disturbing theme running through our seasonal statistics in 2022. During winter storms, record-breaking winds caused major travel chaos and power cuts. Severe flood warnings were followed by severe floods. Summer temperatures exceeded 40 degrees C for the first time. Wildfires tripled compared to the previous year.

The one thing that didn't change last year was climate change.

As Carbon Copy, we wanted to grab back people's attention and make a stronger connection with local climate action as a way to have a more positive impact on the world around us. Our world-record flagship event, Running Out of Time, and other programmes did just that.

In everything we do, our aim is to shift the climate of opinion, from tackling climate change as someone else's problem to an opportunity and something we can all do now, together where we live, with real economic and social benefits for those around us.

A heartfelt thank you to our Trustees, team members and partners, for their dedication and hard work in making this happen. The big achievements of our small charity this year are yet another example of how much we can do when we work together.

**Ric Casale**  
**Chair**

## **OBJECTIVES AND ACTIVITIES**

### **Mission**

Carbon Copy's mission is to inspire and empower more people to take local climate action, to accelerate our collective response to the climate and biodiversity crises.

Our work is dedicated to speeding up progress towards a carbon zero future through organisations working together. We bring together the ideas and initiatives needed to accelerate climate action; connecting local communities, councils and companies who share the goal of a sustainable future.

### **Activities**

The charity achieves its objectives through a wide range of activities, including:

- Publishing information and advice;
- Hosting talks and podcasts;
- Running high-impact events;
- Developing and promoting a hub of high-impact, low-carbon initiatives;
- Maintaining the "Carbon Zero Explorer" that covers 380 local authority areas;
- Publishing a newsletter for subscribers.

Carbon Copy Network (Registered number: 12315756)

Report of the Trustees  
for the Year Ended 30 November 2022

## **OBJECTIVES AND ACTIVITIES**

### **Objects and Public benefit**

Carbon Copy's founding object, as set out in the charity's governing document, is:

The promotion for the benefit of the public of the conservation, protection and improvement of the physical and natural environment, in particular by raising awareness of the causes and impact of climate change; and encouraging practical steps to reduce atmospheric carbon dioxide levels and mitigate the effects of climate change.

## **ACHIEVEMENT AND PERFORMANCE**

### **Achievements and Performance**

#### **1 new podcast series**

Co-hosted by Carbon Copy and Planet Pod, 'Copy This' is a podcast series about vision and collaboration. The subject of each episode is an Earthshot - a radically ambitious project addressing the climate and biodiversity crises that can be replicated by different communities across the country. Most of the podcast episodes recorded for this series were in the top 25% of all podcasts, within 7 days of release.

#### **1000+ climate action stories, published by different organisations**

Carbon Copy is now one of the largest searchable collections of climate action success stories in the UK, a vital free resource not just for local communities, councils and businesses, but increasingly for academic researchers and central government departments compiling evidence of the breadth and impact of local climate initiatives.

#### **1 world-record climate action relay**

Carbon Copy was a principal partner of the world's biggest ever climate relay, 'Running Out of Time'. As an event that covered an entire continent, it demonstrated the awesome power of joined-up local action. Over 4,500 people participated in this non-stop relay through 18 countries, along a route designed to highlight hundreds of local climate action projects and the amazing people behind them.

#### **54,000+ connections by people on Carbon Copy**

We're all about making it easier for tens of thousands of people to discover inspiring climate action examples, hear directly from those leading the projects and learn from their experiences and advice. Our online publishing platform is free to access, non-commercial and non-partisan. It's also moderated to make it a safe space for everyone to participate.

#### **50,000 impressions per week on social media**

Telling stories is one of the most powerful means that people have to inspire, influence and make a deep impression. We tell climate action stories - in the motivating words of project leaders; through captivating blogs and enthralling podcast conversations; by revealing local emissions data and publishing climate action plans - and share them widely on social.

#### **825,760 signed a Climate Action petition**

We delivered a climate message to the leaders at the global climate summit in Egypt (COP27), urging more support to help people tackle the climate crisis locally where they live. The message was carried by hand over 7700km, endorsed by 825,760 people and reinforced in a presentation to COP27 delegates by one of Carbon Copy's trustees.

#### **17 million+ UK media reach during Running Out of Time**

Raising awareness more widely about the importance of local climate action is vital in tackling a challenge as complex as the climate emergency, where action is needed at all levels. An extraordinary event like the world-record climate relay draws huge media attention and gives a big boost to the people, projects and places highlighted during the event.

Report of the Trustees  
for the Year Ended 30 November 2022

**762,000 students participated in Global Schools Action Day**

On November 3, almost 2,200 schools from around the world united to demonstrate how local climate actions have global impacts. Led by the Foundation for Environmental Education, students took part in fun activities and engaged with resources that included inspiring local climate success stories from Carbon Copy.

**380 local areas covered by the Carbon Zero Explorer**

We keep our interactive map updated with the latest Climate Action Plans, from every local authority area in the UK; with data of greenhouse gases emitted in each local area, recorded by BEIS; and with amazing projects, led by people locally. During an average month, these pages are accessed approx. 5,000 times.

**10x awareness boost for local climate action projects**

Innovative ways to communicate can break through the clutter so positive climate action stories hit home. The climate relay was one way to boost local, with selected UK projects along the route seeing 10 times increase in online traffic. In addition, increases in the number of visits on Carbon Copy to the local areas covered by the event benefited everyone who shared their local initiatives.

**FINANCIAL REVIEW**

**Financial review**

Carbon Copy enjoyed another successful year of operations with total income of £170,795. Donations and grants are the two sources of income, with a significant increase in donations versus prior year as a result of our flagship event.

Total expenditure for the year was £196,455, an increase of £72,112 versus prior year. The main driver (60% of the total increase) was additional wage costs for maternity cover for a returning core staff member. Extending the reach of our multi-channel communications and implementing ambitious programmes accounted for most of remaining increment (30% of the total increase). Core online platform costs increased by 16% as we also invested in better tracking and scheduling software, to keep up with the significant jump in engagement.

Cash flows and cash flow forecasts are closely monitored by the Trustees to ensure that the charity always has enough funds to meet its liabilities as they become due. The Trustees have a target of holding reserves equivalent to three months' core operating costs. At the year end, unrestricted funds stood at £64,113 and £34,557 was held as working capital in the charity's bank account.

We have experienced a big step up this year in the demand for Carbon Copy's services and expertise. Building on our publishing platform and the growing momentum behind local climate action, we believe the range of opportunities will continue to expand, strengthening our charity's cash flows and revenue mix.

On this basis, the Trustees are confident that Carbon Copy remains a going concern.

## **STRUCTURE, GOVERNANCE AND MANAGEMENT**

### **Governing document**

The charity is controlled by its governing document, the Memorandum and Articles of Association, and constitutes a limited company, limited by guarantee, as defined by the Companies Act 2006. The Board of Trustees are directors for the purposes of company law and Trustees for the purposes of charity law.

Under the Memorandum and Articles of Association, the term in office of each Trustee expires after three years and they may offer themselves for re-election. New Trustees are appointed under special resolution by a Board meeting. During 2022, the Board re-elected one of the previous Trustees whose term had expired.

The team structure has been appropriate for the activities undertaken by the charity this year and will be adjusted as needed, in line with future plans.

In 2022, the Trustees managed an Advisory Board that convened on a quarterly basis to provide input and advice on selected programmes implemented by the Trustees and other team members.

Risk assessment and management is managed under the charity's Risk Management Policy and reviewed regularly at meetings of the Board of Trustees.

### **Charity constitution**

The charity is a charitable company limited by guarantee. It was incorporated on November 14, 2019 and changed its name to Carbon Copy Network (with trading name, Carbon Copy) on January 16, 2020. It is governed by its Memorandum and Articles of Association.

Carbon Copy places great importance on the security of data and personal information. For information on how the charity uses and protects personal data, please see our privacy policy. <https://carboncopy.eco/privacy-policy>

Independent Examiner's Report to the Trustees of  
Carbon Copy Network

**Independent examiner's report to the trustees of Carbon Copy Network ('the Company')**

I report to the charity trustees on my examination of the accounts of the Company for the year ended 30 November 2022.

**Responsibilities and basis of report**

As the charity's trustees of the Company (and also its directors for the purposes of company law) you are responsible for the preparation of the accounts in accordance with the requirements of the Companies Act 2006 ('the 2006 Act').

Having satisfied myself that the accounts of the Company are not required to be audited under Part 16 of the 2006 Act and are eligible for independent examination, I report in respect of my examination of your charity's accounts as carried out under section 145 of the Charities Act 2011 ('the 2011 Act'). In carrying out my examination I have followed the Directions given by the Charity Commission under section 145(5) (b) of the 2011 Act.

**Independent examiner's statement**

I have completed my examination. I confirm that no matters have come to my attention in connection with the examination giving me cause to believe:

1. accounting records were not kept in respect of the Company as required by section 386 of the 2006 Act; or
2. the accounts do not accord with those records; or
3. the accounts do not comply with the accounting requirements of section 396 of the 2006 Act other than any requirement that the accounts give a true and fair view which is not a matter considered as part of an independent examination; or
4. the accounts have not been prepared in accordance with the methods and principles of the Statement of Recommended Practice for accounting and reporting by charities (applicable to charities preparing their accounts in accordance with the Financial Reporting Standard applicable in the UK and Republic of Ireland (FRS 102)).

I have no concerns and have come across no other matters in connection with the examination to which attention should be drawn in this report in order to enable a proper understanding of the accounts to be reached.

The charitable company is entitled to exemption from audit under Section 477 of the Companies Act 2006 for the year ended 30 November 2022.

The members have not required the company to obtain an audit of its financial statements for the year ended 30 November 2022 in accordance with Section 476 of the Companies Act 2006.

The trustees acknowledge their responsibilities for

- (a) ensuring that the charitable company keeps accounting records that comply with Sections 386 and 387 of the Companies Act 2006 and
- (b) preparing financial statements which give a true and fair view of the state of affairs of the charitable company as at the end of each financial year and of its surplus or deficit for each financial year in accordance with the requirements of Sections 394 and 395 and which otherwise comply with the requirements of the Companies Act 2006 relating to financial statements, so far as applicable to the charitable company.

The notes form part of these financial statements

Carbon Copy Network (Registered number: 12315756)

Balance Sheet - continued  
30 November 2022

These financial statements have been prepared in accordance with the provisions applicable to charitable companies subject to the small companies regime.

The financial statements were approved by the Board of Trustees and authorised for issue on 6 March 2023 and were signed on its behalf by:

  
.....  
R Casale - Trustee

The notes form part of these financial statements

## **1. ACCOUNTING POLICIES**

### **Basis of preparing the financial statements**

The financial statements of the charitable company, which is a public benefit entity under FRS 102, have been prepared in accordance with the Charities SORP (FRS 102) 'Accounting and Reporting by Charities: Statement of Recommended Practice applicable to charities preparing their accounts in accordance with the Financial Reporting Standard applicable in the UK and Republic of Ireland (FRS 102) (effective 1 January 2019)', Financial Reporting Standard 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' and the Companies Act 2006. The financial statements have been prepared under the historical cost convention.

### **Income**

All income is recognised in the Statement of Financial Activities once the charity has entitlement to the funds, it is probable that the income will be received and the amount can be measured reliably.

### **Expenditure**

Liabilities are recognised as expenditure as soon as there is a legal or constructive obligation committing the charity to that expenditure, it is probable that a transfer of economic benefits will be required in settlement and the amount of the obligation can be measured reliably. Expenditure is accounted for on an accruals basis and has been classified under headings that aggregate all cost related to the category. Where costs cannot be directly attributed to particular headings they have been allocated to activities on a basis consistent with the use of resources.

### **Intangible assets**

Patents and licences include IP rights and are being amortised over 10 years.

Computer software includes the costs of developing the charities website and virtual hub. These costs are being amortised over 5 years.

### **Taxation**

The charity is exempt from corporation tax on its charitable activities.

### **Fund accounting**

Unrestricted funds can be used in accordance with the charitable objectives at the discretion of the trustees.

Restricted funds can only be used for particular restricted purposes within the objects of the charity. Restrictions arise when specified by the donor or when funds are raised for particular restricted purposes.

### **Pension costs and other post-retirement benefits**

The charitable company operates a defined contribution pension scheme. Contributions payable to the charitable company's pension scheme are charged to the Statement of Financial Activities in the period to which they relate.

Our **impact** in 2022

## Introduction

[illegible]

<sup>3</sup>Hasan Ali Khan Mirza, *Chahar Maqalat*, 1908, p. 100, in *Chahar Maqalat*, p. 100.

Therefore, we cannot simply treat the observed data as a sample from the full joint distribution of the variables of interest. In order to use the observed data for inference, we need to know how the missing data were generated. This is the missingness mechanism.

[illegible]

the two divergent channels, as shown in Fig. 11. The divergent flow gives rise to a jet that is collected in the lower channel and brought together in a convergent jet at the condition depicted in Fig. 12. When the identified jet is examined in each of the four cases of small flow, the jet is brought to a common jet condition, as is this jet of Fig. 12. Hence, the jet is independent of flow rate, flow pressure, and flow from the source. The jet is a common jet independent of flow rate, flow pressure, and flow from the source.

For a synapophysis, there is the question of whether the group is affected by all three different factors. For example, reduction in one platform may be a more important constraint than in the other parts of the bone, with the top of a vertebra being more important than the middle, and so that reduction may occur in the middle, but not at the top or bottom of the vertebra. In other words, reduction may affect all three different parts of the vertebra, but the different parts are affected to different degrees, depending on the platform.

[illegible]

For both theories,  $\text{exp} = \text{written}$  and the  $\text{exp}$  property and predicate  $\text{exp}$  is defined as the  $\text{exp}$  in the  $\text{exp}$  argument and predicate  $\text{exp}$  is defined for  $\text{exp}$  as the  $\text{exp}$  in the  $\text{exp}$  argument. For both theories,  $\text{exp} = \text{written}$  and the  $\text{exp}$  property and predicate  $\text{exp}$  is defined as the  $\text{exp}$  in the  $\text{exp}$  argument and predicate  $\text{exp}$  is defined for  $\text{exp}$  as the  $\text{exp}$  in the  $\text{exp}$  argument.

It is important to note that we are describing a continuous  $M_{\text{eff}}$  distribution along the filament, higher at the ends, and a discrete  $M_{\text{eff}}$  distribution at the ends. This Carbon Copy also goes to the other end of the filament, to break through to new endomers.

For example, we launched a first period dinner, "Copy That," to benefit the congested roadways of the Port in this area. Next year, the same group will highlight the environmental, economic, energy, and cultural issues, and will offer a half-price meal to encourage participation and community involvement. We also had the honor of "Zero Exposure" and annually updated "Good Council Dining" with the, and a few new kid products that are very current, to surprise, delight, and, well, let's face it, make the life of entertaining easier. From Fall through the end of September.

over the 1980s, except that the former group probably had their dispersal mechanism (at least) with different form, as for other groups. Also, as the form is new, and given this collection of forms, it may be possible that the pattern is formed of more or less randomly distributed, but also not randomly, dispersed, and therefore, the individuals of the former group may be dispersing others, not the same.

6. The results of the above-mentioned experiments show that the method of  
 determining the number of components in a mixture by means of the  
 method of the maximum of the derivative of the curve of the  
 concentration of the components is not applicable in the case of  
 mixtures of components which are not completely miscible.

[illegible]

for the 2000 merger, the company decided that the limited partnership, with the third class of limited partners, would be the best vehicle to carry out the merger and control the way the oil company, together with its subsidiaries, would exercise its oil and gas rights in the country.

For a given  $\alpha$ , the function  $\phi(\alpha, \beta)$  is a decreasing function of  $\beta$ . The function  $\phi(\alpha, \beta)$  is also a decreasing function of  $\alpha$ .

**1000+ climate action stories**  
published by **different** organisations

Carbon Copy is now one of the largest searchable collections of climate action success stories in the UK, a vital free resource not just for local communities, councils and businesses, but increasingly for academic researchers and central government departments compiling evidence of the breadth and impact of local climate initiatives.

## 1 world-record climate action relay

Carbon Copy was a principal partner of the world's biggest ever climate relay, 'Running Out of Time'. Covering 7,000km across an entire continent, the event demonstrated the awesome power of joined-up local action. Over 1,500 people participated in this non-stop relay through 18 countries, along a route designed to highlight hundreds of local climate action projects and the amazing people behind them.

## **54,000+ connections** by people on Carbon Copy

We're all about making it easier for tens of thousands of people to discover inspiring climate action examples, hear directly from those leading the projects and learn from their experiences and advice. Our online publishing platform is free to access, non-commercial and non-partisan.

It's also moderated to make it a safe space for everyone to participate.

**50,000 impressions**  
per week on **social media**

Telling stories is one of the most powerful means that people have to inspire, influence and make a deep impression. We tell climate action stories – in the motivating words of project leaders; through captivating blogs and enthralling podcast conversations; by revealing local emissions data and publishing climate action plans – and share them widely on social.

## 825,760 people signed our **Climate Action** petition

We delivered a climate message to the leaders at the global climate summit in Egypt (COP27), urging more support to help people tackle the climate crisis locally where they live. The message was carried by hand over 7700km, endorsed by 825,760 people, and reinforced in a presentation to COP27 delegates by one of Carbon Copy's trustees.

**17 million+**  
**UK media reach** during  
Running Out of Time

Raising awareness more widely about the importance of local climate action is vital in tackling a challenge as complex as the climate emergency, where action is needed at all levels. An extraordinary event like the world-record climate relay draws huge media attention and gives a big boost to the people, projects and places highlighted during the event.

## **762,000 students** participated in **Global Schools Action Day**

On November 3, almost 2,200 schools from around the world united to demonstrate how local climate actions have global impacts. Led by the Foundation for Environmental Education, students took part in fun activities and engaged with resources that included inspiring local climate success stories from Carbon Copy.

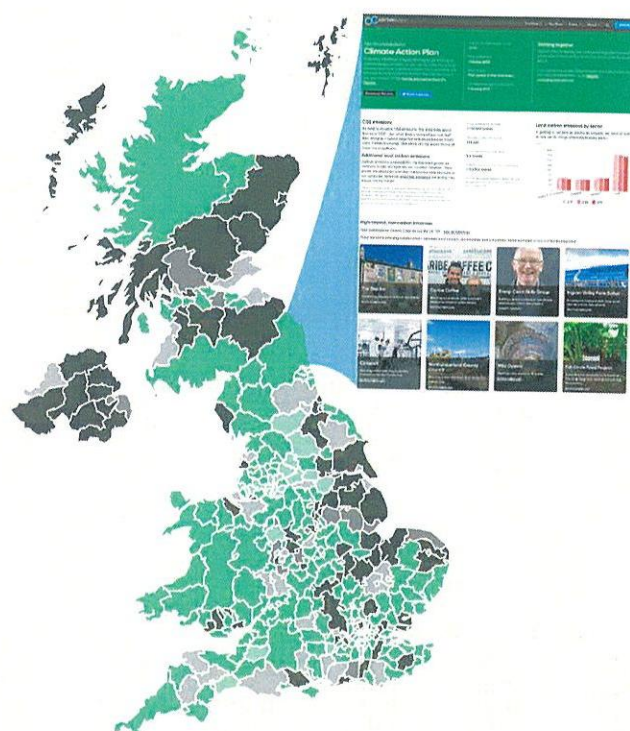

## 380 local areas covered by the Carbon Zero Explorer

We keep our interactive map updated with the latest Climate Action Plans, from every local authority area in the UK; with data of greenhouse gases emitted in each local area, recorded by BEIS; and with amazing projects, led by people locally. During an average month, these pages are accessed approx. 5,000 times.

## 10x boost in awareness of local climate action projects

Innovative ways to communicate can break through the clutter so positive climate action stories hit home. The climate relay was one way to boost local, with selected UK projects along the route seeing a 10 times increase in online traffic. In addition, increases in the number of visits on Carbon Copy to the local areas covered by the event benefited everyone who shared their local initiatives.
