

A full-page background image of a savanna landscape at sunset. A single acacia tree stands in the middle ground, silhouetted against the bright, orange-hued sky. The sun is low on the horizon, creating a strong glow. The foreground is a dry, reddish-brown field with sparse vegetation. In the distance, there are rolling hills or mountains under the colorful sky.

Core Values

Integrity – The quality of being honest and having strong moral principles. The state of being whole and undivided. Basically, doing what you say you are going to do, when you say you are going to do it and how you say you are going to do it

Mindfulness – The quality or state of being conscious or aware of something. First awareness of self, then others. Being conscious and considered in our approach – when we act, when we speak and how we live.

Nondisruptive Creation – Where one's gain does not have to come at the expense of others. A new way of thinking where untouched opportunities abound. We need to alter our perception of fundraising, we should not be competing in this field, we should be leading through creativity. We need to inspire people to give.

Empowerment – Firstly by empowering ourselves with the tools and information to make a difference. Then by empowering organisations, groups, communities, and society to make lasting changes, to make better choices, and to create opportunities. Empowerment should be done in transparent, meaningful, and lasting ways.

Mission Statement

Mission

To protect, rehabilitate, conserve, and preserve historical habitats of biodiverse value, and associated species, in southern Africa.

Vision

To become the leading science-based project funding conservation charity defined by the highest ethical standards and driven by our core values.

Objectives

To secure and protect biodiverse habitats, and associated species, crucial for conservation, preservation, and forming linkages and corridors between existing reserves

To support sustainable and community owned projects in rural communities surrounding critical biodiverse areas that are linked to conservation or enhance the local support for conservation, with particular focus on nature, health, skills development, and engaging education.

Engagement leads to Involvement leads to Education

To raise environmental awareness through our projects, and engage a multiple of stakeholders and donors

To inspire and nurture a new generation to connect with the natural world

To remain committed to preventing the illicit wildlife trade and the protection of the natural environment which affects us as a global community through example

To support like-minded implementing partners on the ground in fulfilment of our mission

Message from Martyn Randall

Chairman of the Trust

Continuing in 2021 with a Covid lockdown in both the UK and South Africa has proved to be a real challenge for us all. Whilst we have had much support during this period the uncertainty around organising events and experience has really challenged the team.

Whilst we have been able to keep up the support of the smaller projects, we have continued to look to develop our own, larger legacy with the community centre and rangeland project. We have been busy putting together grant funding proposals and hope that towards the end of 2022 / start of 2023 we may be able to bring them to fruition.

I was able to go out to South Africa for the first time since the charity began in January of 2022 and was able to visit some of the projects we have been supporting. This has seen my passion and drive grow even further and I'm very much looking forward to the next few years.

It's only when I complete the annual report, looking back at past year I realise how much we have grown and the projects we have supported.

Thank you again for everyone that has and continues to support Ubuntu WT.

MRandall

Martyn Randall
Chairman

Strategic report

Completed projects

In April 2021 we donated the Canon camera across to our partners at FreeMe Wildlife to continue to research and document the great work they do.

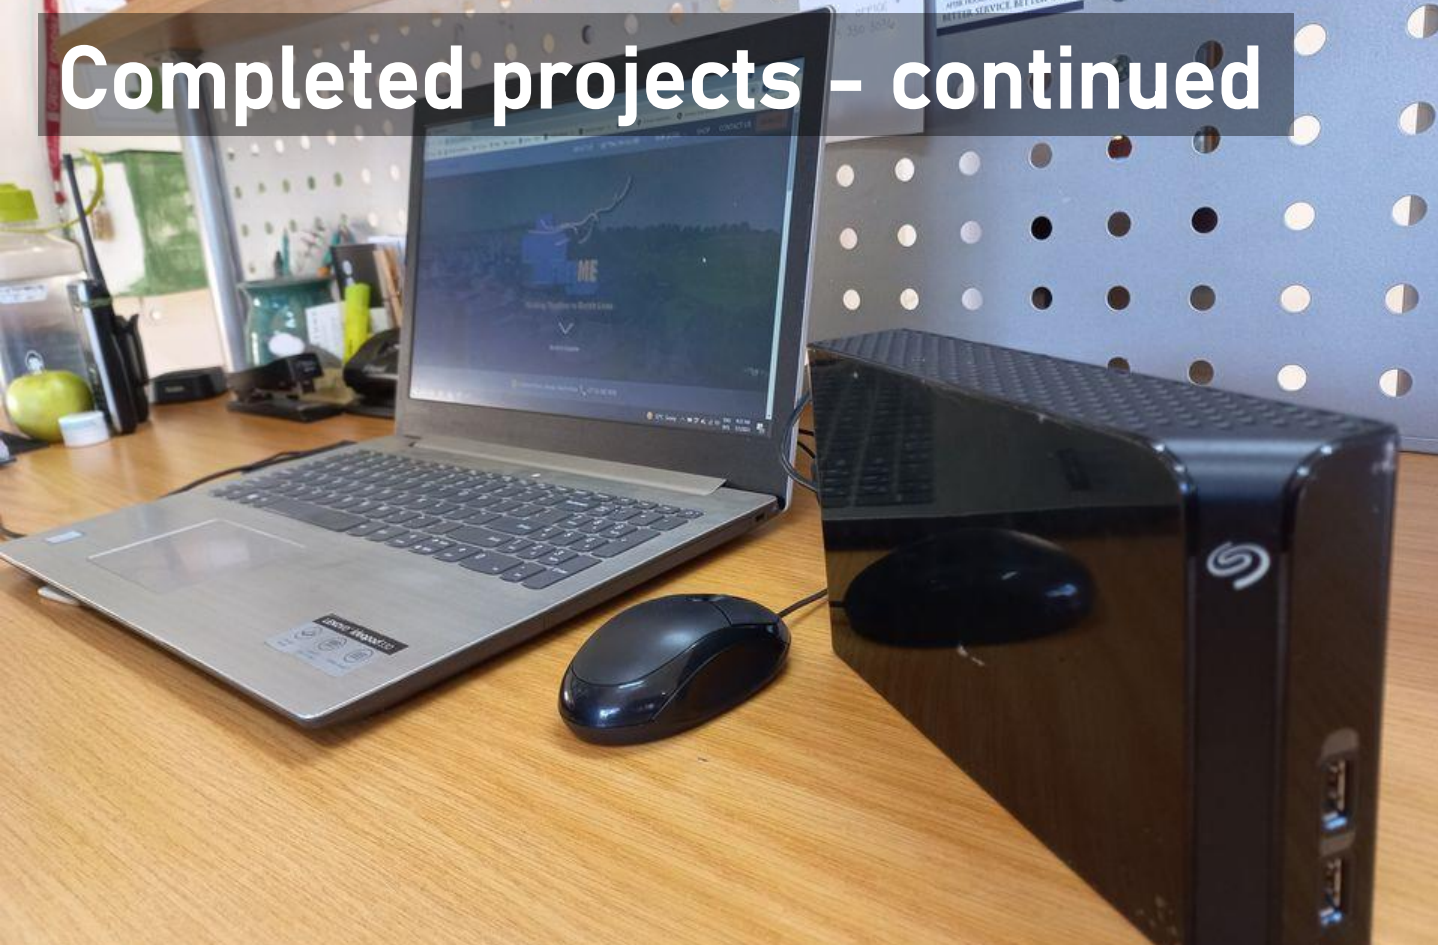

Completed projects – continued

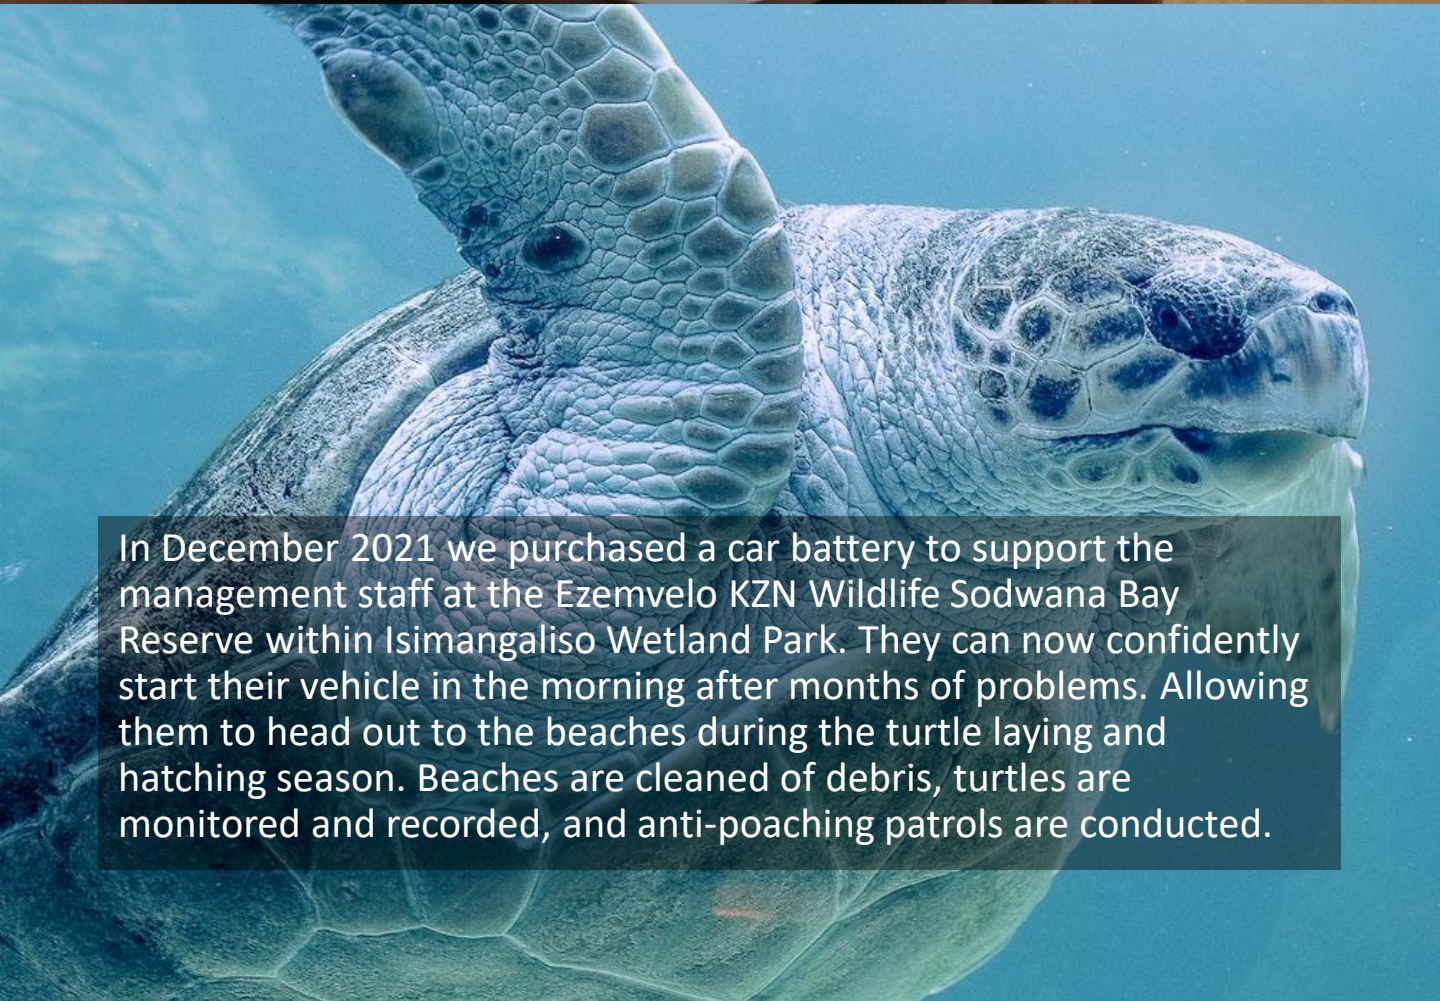

In June 2021 we joined teams with Africa's top ant specialist Peter Hawkes and protégé Daniella Molenaar to help search for a specific genus of ant (*Strumigenys* sp.). This is in support of a Japanese study on ant evolution. Despite winter not being the best time of the year to search for a tiny ant that forms tiny colonies - Peter was able to find a colony of *Strumigenys simoni* on the Greater Ukuwela Nature Reserve. Peter was able to find only the second confirmed record EVER in South Africa for the species *Discothyrea oculata*

Completed projects – continued

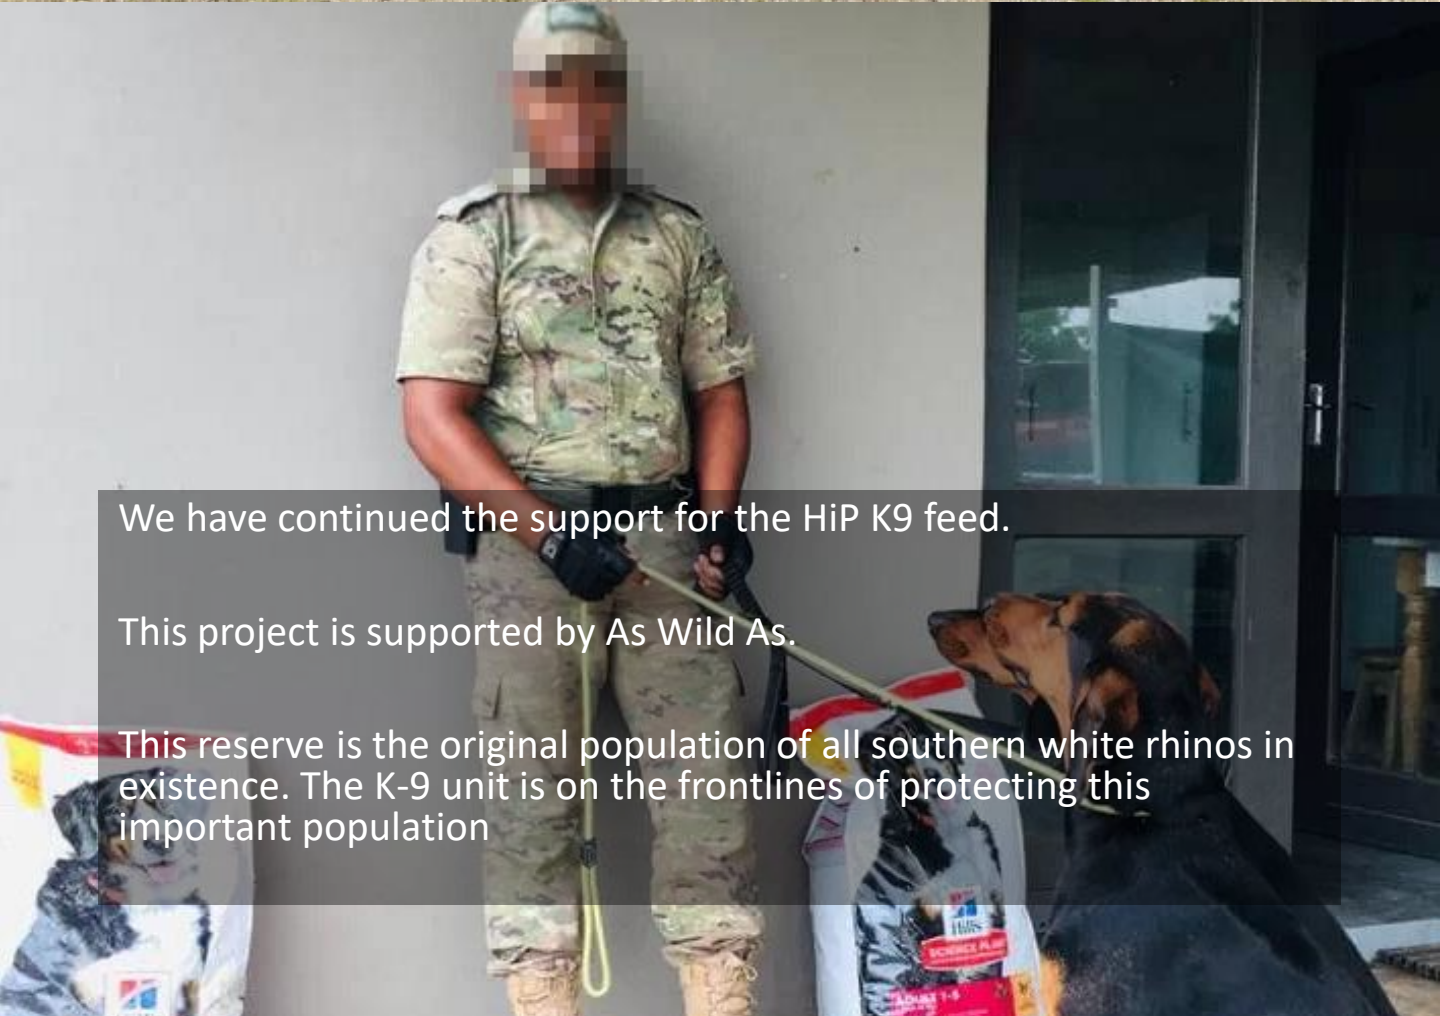

In July 2021 we were able to support our partners FreeMe Wildlife with the donation of a new laptop and hard drive for their media and database storage

Completed projects – continued

In December 2021 we purchased a car battery to support the management staff at the Ezemvelo KZN Wildlife Sodwana Bay Reserve within Isimangaliso Wetland Park. They can now confidently start their vehicle in the morning after months of problems. Allowing them to head out to the beaches during the turtle laying and hatching season. Beaches are cleaned of debris, turtles are monitored and recorded, and anti-poaching patrols are conducted.

We have continued the support for the HiP K9 feed.

This project is supported by As Wild As.

This reserve is the original population of all southern white rhinos in existence. The K-9 unit is on the frontlines of protecting this important population

Current projects – continued

We have continued to support the donation of PetEMed anti-poisoning units to HiP K9 anti-poaching units.

The project is supported by Xtratherm Insulation.

Current projects – continued

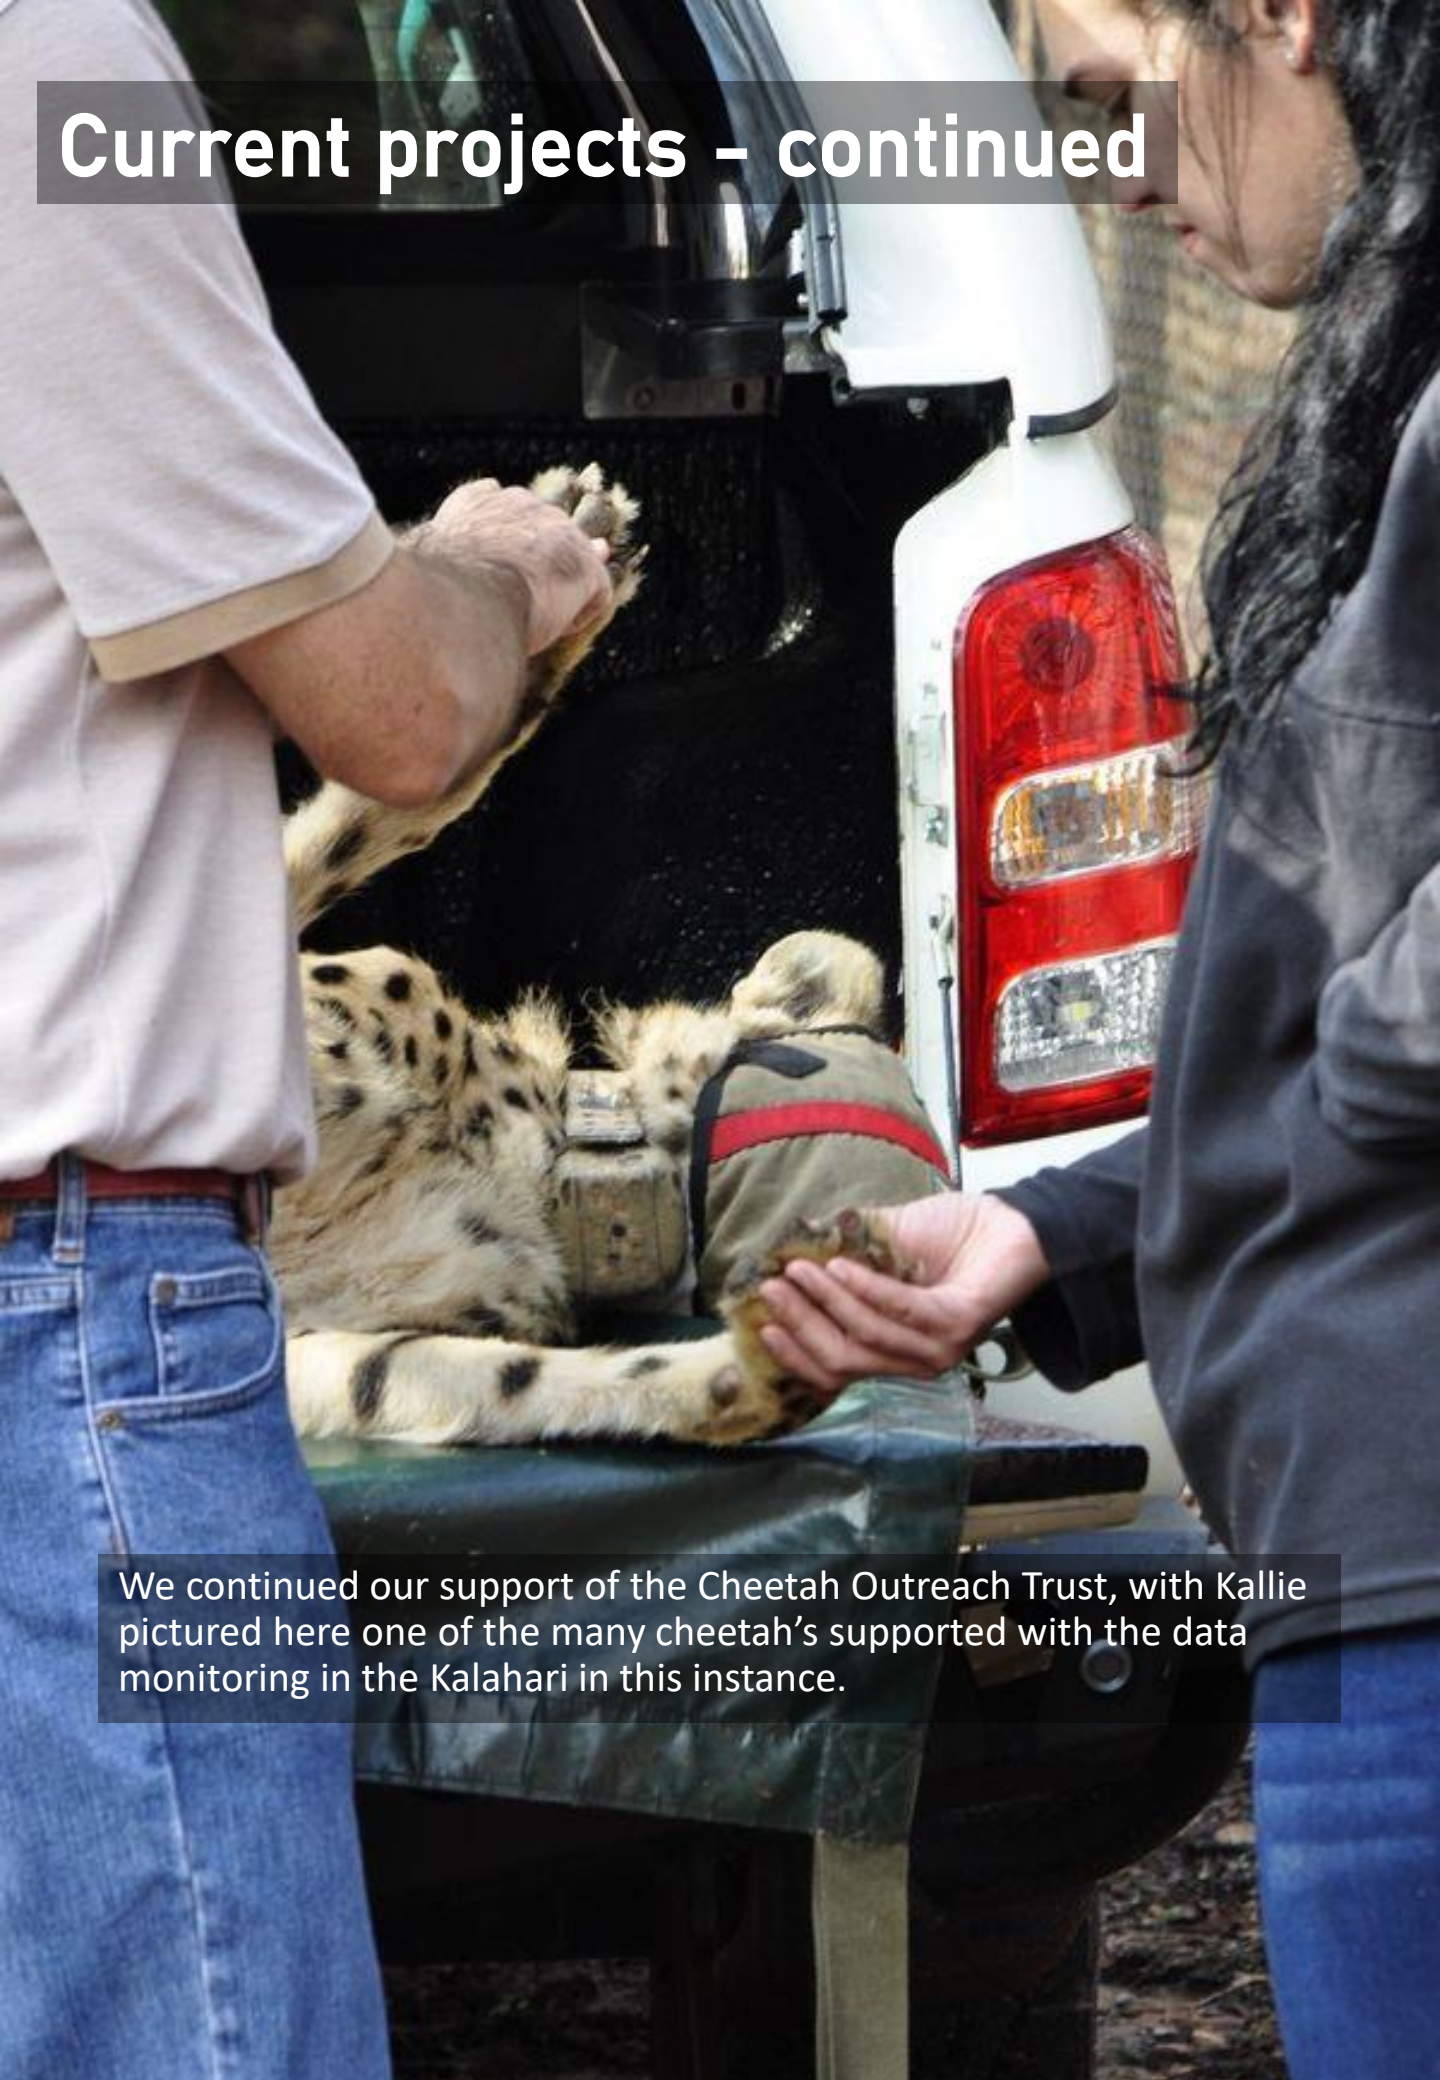

We have continued to support Karen and Storm by donating PetEMed anti-poisoning units to Manyoni Private Nature Reserves K9 unit
The units were sponsored annually by Xtratherm insulation.

Current projects – continued

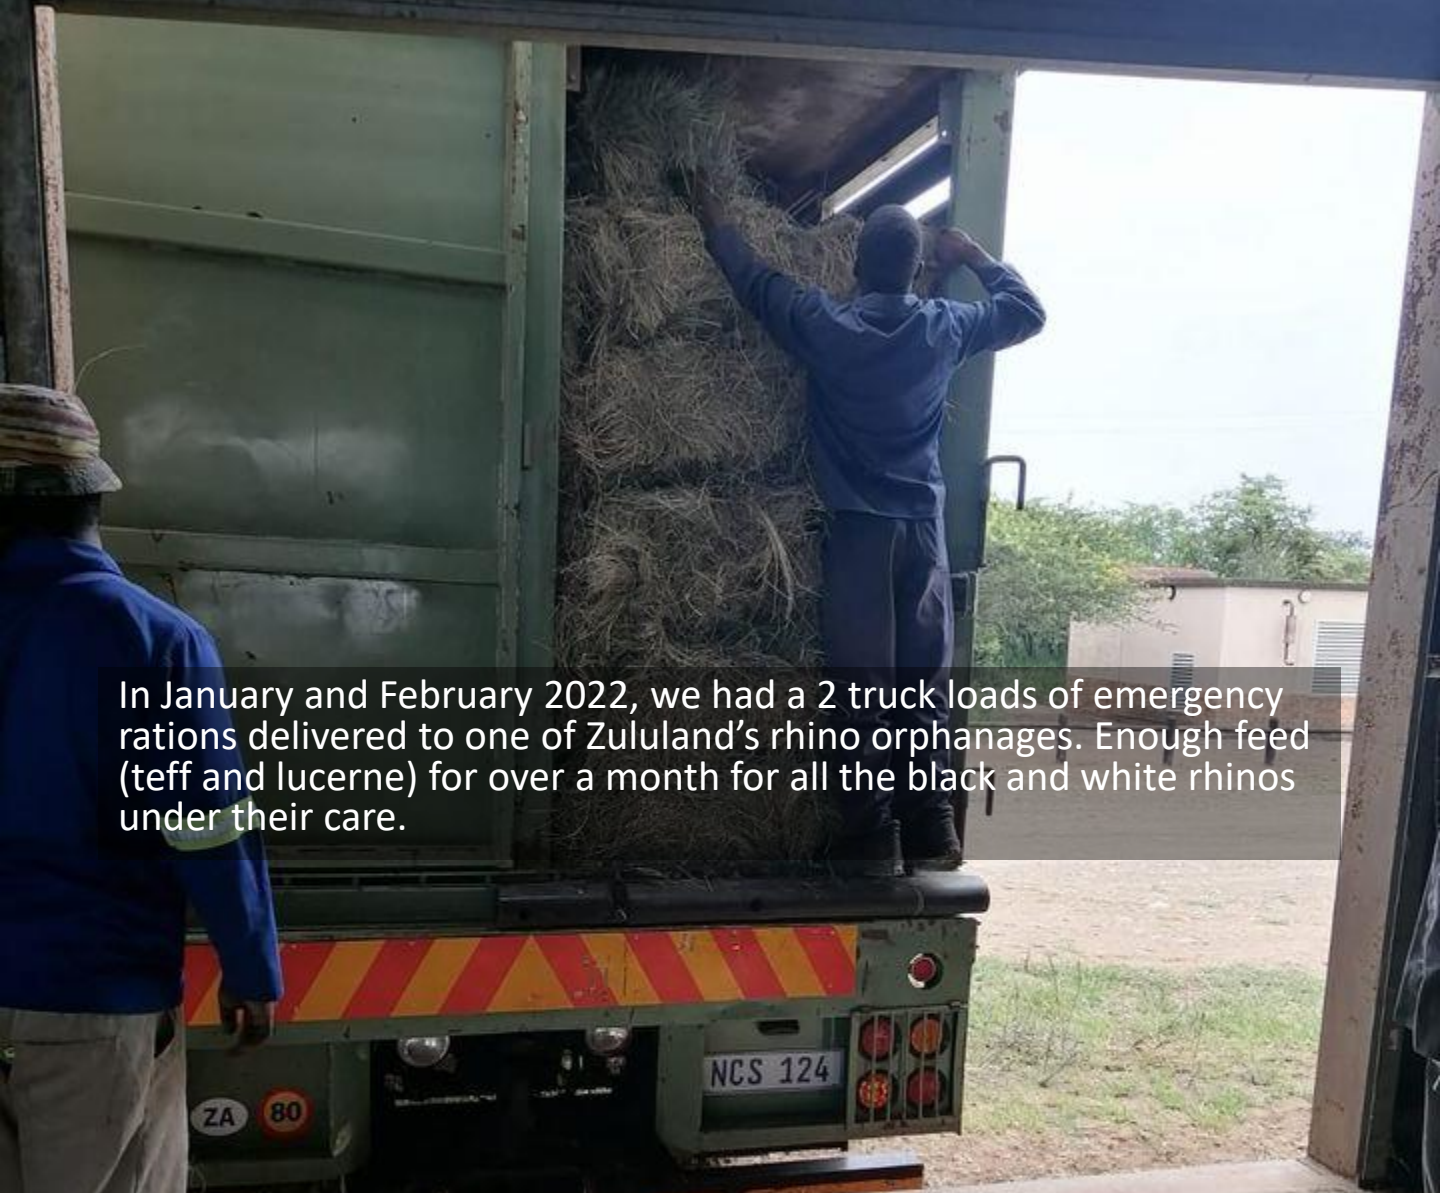

Across the year we have continued with supplying K9 anti-poaching units with the PeteMed units and have now covered 13 different reserves, also other charities (FreeMe Etc) and many other vet practices.

Current projects – continued

We continued our support of the Cheetah Outreach Trust, with Kallie pictured here one of the many cheetah's supported with the data monitoring in the Kalahari in this instance.

Current projects – continued

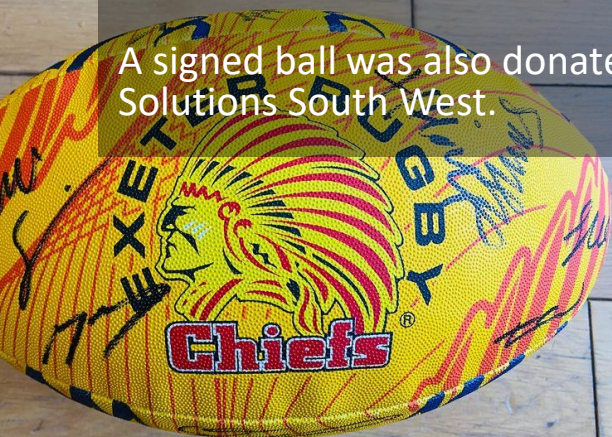

In January and February 2022, we had a 2 truck loads of emergency rations delivered to one of Zululand's rhino orphanages. Enough feed (teff and lucerne) for over a month for all the black and white rhinos under their care.

Completed Events

We were kindly donated a signed Exeter Chiefs 2019/2020 double winning match worn Nic White shirt from Cathy Bartlett-Horwood and Exeter Chiefs.

A signed ball was also donated by James Putland at Asbestos Solutions South West.

Completed Events - Continued

In May 2021, our very own Steve Mulcock cycled over 220 miles in 2 days to Lands End in Cornwall to raise funds and awareness for our projects. Steve was supported on his trip by his fantastic wife, who not only acted as a support vehicle, but she also completed the final 10 miles of the journey.

Steve has raised over £1,600

Completed Events - Continued

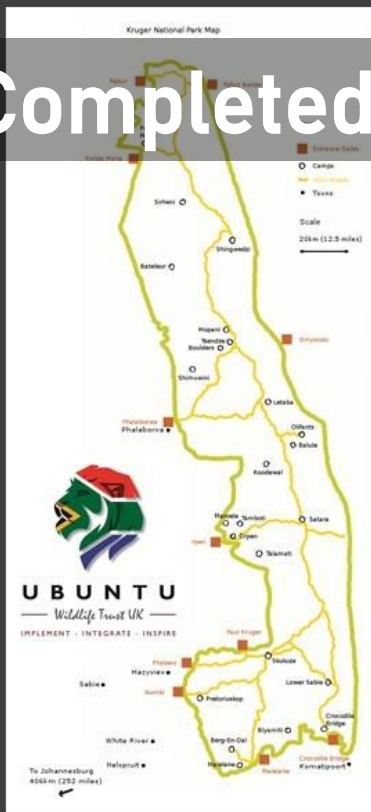

In August 2021, we successfully held our annual T20 cricket match with Ubuntu and Friends vs a Whimble select. The match was a close one and eventually won by Ubuntu and their captain Freddie Fenner.

The Thirsty Farmer were the match sponsor, Oggy Oggy Pasty Exeter for the food sponsor and Whimble Cricket Club also donated towards our projects.

Completed Events – Continued

Charity Virtual Cycle

Scott Woodward, Neil Davis and Martyn Randall virtually cycled 427km each from the North to South length of Kruger National Park (Pafuri to Malelane Gates) in support of Ubuntu Wildlife Trust's Rhino conservation projects.

Ubuntu helps protect some of the most important rhino populations in the world and funds donated will go towards these strategic projects. This includes K9 unit support in 4 of the most important rhino reserves, and the food and care of traumatised orphan rhinos in 2 of the leading rhino orphanages – and to have these little ones returned to their natural habitat as healthy wild rhinos once more.

Visit the Ubuntu website to find out more about the charity causes they support

www.ubuntuwildlifetrust.com

NO ONE
IN THIS WORLD
NEEDS A
RHINO HORN
BUT A RHINO

Throughout November 2021, Scott Woodward, Neil Davis and Martyn Randall completed a virtual cycle from the North to South length of Kruger National Park (427km each from Pafuri Gate to Malelane Gate).

In doing so, they raised over £2,500 for our support projects.

Completed Events - Continued

Whimble Cricket Club • Saturday 20th November

7pm till Finish • Doors open 6.30pm

Raffle & Auction £10 per ticket, max teams of 6

includes chilli (meat and vegan) and drinks available from the bar

Tickets through Eventbrite

On Saturday 20th November 2021, we partnered with Whimble Cricket Club to put on a quiz event that was attended by over 70 people and was a huge success in raising funds and awareness for our support projects.

The event raised just over £877

Completed Events

In January 2022 we auctioned a signed Lions Shirt that Cathy Bartlett-Horwood was able to get the 5 Exeter Chiefs players to sign for us.

Completed Events - Continued

Ubuntu Wildlife Trust teamed up with [As Wild As](#) and [Ventura Wildlife Foundation](#) to do an intercontinental talk on rhino poaching and the mitigation strategies. Attendees in the UK could discuss live on the ground with our team in KwaZulu-Natal and ask pressing questions

Completed Events - Continued

"Phinda Button Spider"

In February 2022, Clinton held a talk on the discovery of the new Phinda Button Spider.

Clinton Dean Wright

from the Ubuntu Wildlife Trust, will be talking on the discovery of the new Phinda Button Spider.

Date: Wednesday 16 February 2022

Venue: Hebron Haven Hotel

Time: 18h00 for 18h30

Dinner and talk: R150pp - Meal is chicken in a tomato and olive sauce and/or beef lasagne, and a passion cheesecake for dessert.

Vegetarian option available on request.

Cash bar available.

Experiences

In June 2021 we completed our first experience tour with the AliSom Group at Manyoni Private Game Reserve for a 4-day 3-night Wildlife Experience. This gives the opportunity for corporates to get directly involved in on-the-ground conservation and be part of the work they are funding through the trip. Only work vital for the reserve is ever considered

Experiences

In November 2021 we completed our second experience tour with Cooper Vision at Manyoni Private Game Reserve for a 4-day 3-night Wildlife Experience. This gives the opportunity for corporates to get directly involved in on-the-ground conservation and be part of the work they are funding through the trip. Only work vital for the reserve is ever considered

CooperVision®

Engaging our supporters

Our supporters are central to our success for fundraising and raising awareness throughout the world.

We will continue to use social media, events and our website to engage with them.

We would not be where we are today, making the impact we are without their ongoing support.

Looking ahead

With coronavirus coming to an end, the UK and perhaps the world are facing uncertainty around the war in Ukraine, the energy crisis and a possible recession. This will make planning events, getting donors on board and attracting corporates for experience tours very challenging for the team.

From the UK side of things, we will be looking at giving everyone on the charity a role and looking to drive forward as a solid, well organised team.

There will be a massive focus on getting the proposals completed and out for both the Community Centre and Rangeland projects

We will also be looking to grow our corporate donors, event sponsors and individuals looking to raising donations through their own fundraisers.

Financial review

The charities first year has total funds received of £18,197 and a an expenditure of £17,431.
