Activities

Objects: FOR THE PUBLIC BENEFIT THE RELIEF OF THOSE IN NEED IN GHANA BY REASON OF YOUTH, AGE, ILL-HEALTH, DISABILITY, OR SOCIAL OR ECONOMIC DISADVANTAGE IN PARTICULAR BUT NOT EXCLUSIVELY BY COORDINATING AND DEVELOPING SERVICES SUCH AS, THE PROVISION OF CLEAN WATER, LATRINES, EDUCATIONAL MATERIALS AND SUCH OTHER SERVICES FOR THOSE IN NEED AS THE TRUSTEES MAY DETERMINE.

Activities: The purpose of our charity is to relieve financial hardship in Ghana. To improve health by providing safe and clean water. To promote education by providing school materials. The provision of clean water and latrines will be achieved by contracting companies that install boreholes and build latrines. We also aim to provide educational materials by purchasing resources and donating them to schools.

TURBO GHANA

England & Wales - Charity number 1190412

Accounts

Trustees' Annual Report for the period

From 1 April 2024 Period start date To 31 March 2025 Period end date

Charity name: Turbo Ghana

Charity registration number: 1190412

Objectives and Activities

	SORP reference	
Summary of the purposes of the charity as set out in its governing document	Para 1.17	For the public benefit the relief of those in need in Ghana by reason of youth, age, ill-health, disability, or social or economic disadvantage, in particular but not exclusively by coordinating and developing services such as, the provision of clean water, latrines, educational materials and such other services for those in need as the trustees may determine.
Summary of the main activities in relation to those purposes for the public benefit, in particular, the activities, projects or services identified in the accounts.	Para 1.17 and 1.19	<p>We are a micro charity, aimed at poverty relief in Ghana. We progressed and completed several projects last year. These include the following:</p> <p>Aframano JHS furniture</p> <p>The furniture in the primary school and the JHS school in Aframano was falling apart and in dire need of replacement, and there was not enough furniture, so children were squashed together or sitting on the floor. The furniture we bought is hand-made locally using local wood, made by the same carpenter who made the furniture for our kindergarten school in 2022. It's beautiful, and as well as ensuring the school has good furniture, it provides income to local carpenters.</p>

School and teacher accommodation at Kontonho - Contributing to access to education, UN GG/SDG 4.

We completed the building of a kindergarten and primary school at Kontonho near Aframano, together with teacher accommodation.

Kontonho is a satellite community of Aframano, with about 170 people, about two hours walk from that village. Kontonho needed a school for young children, specifically Kindergarten and the lower primary years. Children had to walk to Aframano to school, a two hour journey, or to Kofiase, which is even further at 3-4 hours each way.

Teachers couldn't commute to Kontonho, because it is too remote. To attract teachers, we built three small rooms that can each accommodate two teachers who stay overnight during the week.

Our school in Kontonho (opened August 2024) is one of our flagship projects. There were two teachers (headteacher TFA and teacher GM) at the time of our visit last November, and they had managed to enroll about 80 pupils. Now the school has 98 students. There are three class rooms (KG1 and KG2 total 58 pupils, and Primary 1 has 34). The school was handed over to the municipal department of education, which undertook to staff it and run it as a school.

A challenge is that the school hasn't been officially commissioned, even though it is open and working. Not being commissioned means that the municipality hasn't set up the school feeding programme (daytime food for pupils), or given the headteacher a budget for teaching materials. The change

of Ghana government and consequent change of the Municipal Assembly means that there is currently no Municipal Chief Executive, delaying the official opening. We hope that person will be appointed in May so that the official opening of the school can happen before September 2025. The school has water as we built a borehole next to the school.

Kontonho & Anyakamamu boreholes - Contributing to access water and sanitation, UN GG/SDG 6.

Both boreholes are now completed and in use. This photo shows the Kontonho borehole enthusiastically in use, and its location in relation to the school (left building) and the teacher accommodation (right).

Completing a school building in PSK - Contributing to access to education, UN GG/SDG 4.

We recently completed a 2 unit classroom block in PSK. Pataase, Sesease and Kokoben are three adjacent villages with a population of 1500, known together as PSK.

We met Mr Rockson who is the head teacher of the PSK school which we extended. He is very happy with the two new classrooms we've built, and they look great. There are 50 pupils in JHS1 and 36 in JHS2. The school was formally opened on 10 April 2025. This is a video of the opening <https://youtu.be/F6rPt47kqow>

This was a big occasion for the community and was attended by Prince Owusu Ansah director of education mampong, Mr Best education service PRO, Circuit supervisor, Mr Rockson PSK JHS headteacher, and Hon Oduro Daniel Presiding member Mampong municipal Assembly, and the headteacher and teacher at the school.

Aframano teacher toilet - Contributing to access water and sanitation, UN GG/SDG 6

Our flagship project, the kindergarten school in Aframano, was completed in 2018. We built teacher accommodation at the time and last year built teacher toilets consisting of two toilets (male and female) and two wash rooms (male and female). We have opted for freshwater flushing toilets and showers, which will ultimately be fed from an overhead tank of water. But this can happen only if we mechanise the currently manual borehole so that water is pumped into the tank. We probably won't mechanise the borehole for about one year, because we want to ensure that the electricity supply in Aframano is stable enough and reliable enough before making Aframano's water dependent on it. That means that for the next year, the toilets will be flushed with a bucket of water, and the shower will also be based on a bucket of water (which is the most common arrangement in Ghana).

Amaniampong Senior High School Toilet Project - Contributing to access water and sanitation, UN GG/SDG 6

The school had received some funding about five years ago to build a toilet block, but they had run out of money and it had been left in a half-built state for a long time. Children and staff alike were having to use the bush for their daily needs. When we visited, we found the walls half-tiled, some toilets and cisterns still in their packaging, and some plumbing equipment that hadn't been fitted. We decided to adopt the project, and we used our own contractors to finish the job. This consisted of finishing the tiling (including buying more tiles), fitting the sanitaryware, and installing all the plumbing. We also built a stand for the polytank (a plastic tank to feed water to the basins and toilets), and fitted a new tank.

Projects in progress include:

Teacher accommodation in Anyankamamu - Contributing to access to education, UN GG/SDG 4.

Anyankamamu Primary school is difficult to access and as a result, teachers were disadvantaged by teaching there. The teacher accommodation is situated within the school grounds, and has five rooms. The nine teachers are happy to share rooms (two teachers in each room). This project is near completion. Building the teacher accommodation has improved the prospects of the school children, by giving them more access to teachers in the afternoons and evenings, and ensuring that the school can successfully recruit and retain good teachers. Anyankamamu Primary school was established in 1992, and has eight classrooms.

Aframano solar panels - Contributing to access to clean energy, UN SDG/GG 7.

We had installed solar panels and associated equipment for our first borehole in Aframano several years ago, but finally in early December 2024 Aframano got connected to Ghana Electricity Company electricity network. So we decided to move some of the solar panels and equipment to our teacher accommodation building in Kontonho, which is unlikely to ever get electricity. This means that teachers will have lights at night time, and will be able to charge their phones. Solar power continues to be a technical challenge for Turbo Ghana. It's not working, so Ebenezer the installer is asking us to clean the solar panels (to remove dust and increase their efficiency) and let the batteries charge without drawing power for a few days

Apprentices in tailoring and other trades, in Nsuta. Strengthening gender equality' (UN GG/SDG 5) and 'investing in women'.

Last year we expanded the apprenticeship from two apprentices to nine. We have apprentices in dressmaking, building and electrician apprentices. We are providing training for young people with qualified and experienced trainers. There is a great demand from applicants to join the schemes as it provides young people with a skill and work to look after themselves and their families. On the whole, we are not planning to expand the apprenticeship scheme too much until some of our existing apprentices graduate. Generally, apprenticeship graduation is a formal process governed by the relevant industry association (for example, the Ghana National Tailors and Dressmakers Association, whose graduation we attended last November).

See [Turbo Ghana Completed Projects](#) and [Turbo Ghana Current Projects](#) for details of our completed and current projects.

Achievements and Performance

	SORP reference	
Summary of the main achievements of the charity, identifying the difference the charity's work has made to the circumstances of its beneficiaries and any wider benefits to society as a whole.	Para 1.20	<p>During the period 1 April 2024 to 31 March 2025, we completed several significant projects.</p> <p>Turbo Ghana has made significant contributions towards improving living standards, education, health, and opportunities in rural communities within the Ashanti Region of Ghana. Through targeted projects addressing education, clean water, sanitation, and skills development, the charity has delivered tangible improvements for local people while contributing to several United Nations Sustainable Development Goals (SDGs).</p> <p>Key Achievements and Their Impact 1. Access to Education (UN SDG 4) New School Buildings: Constructed schools in Kontonho and PSK, providing safe, dedicated learning spaces for hundreds of children who previously had to travel long distances (up to 4 hours each way) to access education.</p>

		<p>Teacher Accommodation: Built teacher housing in Kontonho and teacher accommodation in progress in Anyankamamu, enabling schools to attract and retain qualified teachers in remote areas. This has improved the quality and consistency of education, with teachers available for extra support beyond school hours.</p> <p>School Furniture Replacement: Supplied hand-crafted, locally made furniture for Aframano Junior High School, ensuring students no longer sit on the floor or crowd together, and providing income for local artisans.</p> <p>Impact: Children now have better, safer, and more accessible education. Teachers are motivated and present, and communities have new infrastructure that will serve generations. Improved facilities contribute to higher school attendance, reduced dropout rates, and better learning outcomes.</p> <p>2. Clean Water and Sanitation (UN SDG 6) Boreholes Installed: Constructed new boreholes in Kontonho and Anyankamamu, providing reliable access to clean, safe drinking water for the first time.</p> <p>Improving Latrines in Aframano: Rebuilding 86 latrines with more durable materials to withstand changing climate conditions, improving hygiene and reducing waterborne disease risks.</p> <p>Teacher Toilets and Washrooms in Aframano: Constructed modern flushing toilets and showers for teachers, enhancing living conditions and job satisfaction.</p> <p>Impact: Reduced time spent fetching water (often a task for children and women), improved public health, and increased school attendance by eliminating one of the barriers for girls and children during menstruation and illness. Cleaner environments have reduced preventable diseases.</p> <p>3. Clean Energy Access (UN SDG 7) Solar Energy Initiatives: Repurposed existing solar panels to provide lighting and phone charging facilities in remote Kontonho teacher accommodations, enhancing safety and communication in an off-grid community.</p> <p>Impact: Improved teacher retention and morale, enhanced learning opportunities after</p>
--	--	--

		<p>dark, and reduced reliance on kerosene or open-flame lighting, decreasing fire hazards and respiratory risks.</p> <p>4. Vocational Training and Gender Equality (UN SDG 5) Apprenticeship Program Expansion: Increased apprenticeship placements from 2 to 9 in trades including tailoring, building, and electrical work, prioritising young women.</p> <p>Impact: Empowered young people, particularly women, with marketable skills and economic independence. Strengthened the local workforce and promoted gender equality in traditionally male-dominated fields.</p> <p>Wider Benefits to Society Economic Empowerment: Local carpenters, builders, and tradespeople benefited financially through project-related work, stimulating the local economy.</p> <p>Public Health Improvements: Clean water, improved sanitation, and better hygiene facilities have contributed to reduced disease incidence and healthier living conditions.</p> <p>Education Equity: By removing geographic, financial, and infrastructural barriers to education, the charity has promoted inclusive and equitable access to quality learning opportunities.</p> <p>Conclusion Turbo Ghana’s work has transformed access to education, clean water, sanitation, and vocational training in several remote communities, directly improving the quality of life for hundreds of beneficiaries. The projects have delivered enduring benefits to the wider community by promoting economic opportunity, public health, gender equality, and sustainable development, laying the groundwork for long-term social and economic progress.</p>

Independent Examiner's Report

**Report to the trustees/
members of**

Charity Name Turbo Ghana

**On accounts for the year
ended**

31 March 2025	Charity no (if any)	1190412
---------------	--------------------------------	---------

Set out on pages

1

I report to the trustees on my examination of the accounts of the above charity for the year ended 31/03/2025.

**Responsibilities and
basis of report**

As the charity trustees, you are responsible for the preparation of the accounts in accordance with the requirements of the Charities Act 2011 ("the Act").

I report in respect of my examination of the charity's accounts carried out under section 145 of the 2011 Act and in carrying out my examination, I have followed the applicable Directions given by the Charity Commission under section 145(5)(b) of the Act.

**Independent
examiner's statement**

I have completed my examination. I confirm that no material matters have come to my attention in connection with the examination which gives me cause to believe that in, any material respect:

- accounting records were not kept in accordance with section 130 of the Act or
- the accounts do not accord with the accounting records

I have no concerns and have come across no other matters in connection with the examination to which attention should be drawn in order to enable a proper understanding of the accounts to be reached.

Signed: DA Robb

Accounts

Trustees' Annual Report for the period

From 1 April 2023 Period start date To 31 March 2024 Period end date

Charity name: Turbo Ghana

Charity registration number: 1190412

Objectives and Activities

	SORP reference	
Summary of the purposes of the charity as set out in its governing document	Para 1.17	For the public benefit the relief of those in need in Ghana by reason of youth, age, ill-health, disability, or social or economic disadvantage, in particular but not exclusively by coordinating and developing services such as, the provision of clean water, latrines, educational materials and such other services for those in need as the trustees may determine.
Summary of the main activities in relation to those purposes for the public benefit, in particular, the activities, projects or services identified in the accounts.	Para 1.17 and 1.19	<p>We are a micro charity, aimed at poverty relief in Ghana. We progressed and completed several projects last year. These include the following:</p> <p>School prospectus - Contributing to access to education, UN GG/SDG 4. In Ghana, students going to senior school (where they are boarders) are required to equip themselves with all the items in the "prospectus", which is a list of necessities, including a mattress, two or three sets of clothes, some cooking equipment, and other things. The cost is a real struggle for many families. In some cases, children simply don't go to senior school because they can't afford the prospectus. Turbo Ghana funded the school prospectus for two high achieving Aframano students, a boy, and a girl.</p> <p>Sheep rearing business Rearing sheep is a good business opportunity in rural Ghana. Demand for sheep is high, and sheep-rearing work can be done alongside other work like arable farming. But it is expensive to start such a business. Providing start-up costs can enable someone to take control of their own livelihood and provide for their family.</p>

Turbo Ghana funded the business a woman-led start-up costs for a sheep rearing business for 15 sheep, which is successful and thriving.

Borehole at Atonobi - Contributing to access water and sanitation, UN GG/SDG 6

Atonobi is a small settlement near Kontonho, which is itself a satellite community of Aframano. Turbo Ghana built a borehole at Atonobi which provides clean and fresh water to a community whose only water was by walking 30 minutes to a stream (of dirty water), serving 150 adults, plus children.

Projects in progress include:

School and teacher accommodation at Kontonho - Contributing to access to education, UN GG/SDG 4.

We are ensuring further access to education in hard to reach areas. Kontonho is a satellite community of Aframano, with about 170 people, about two hours walk from that village. Kontonho was in urgent need of a school for young children, specifically for kindergarten and lower primary levels as the children were walking to Aframano to school, a two-hour journey, or to Kofiase, which is even further at 3-4 hours each way. The school, serving 90 pupils, and teacher accommodation has been constructed and is near final completion.

As with the Aframano school project, we are working closely with the municipal department of education to finalise the Kotonho school, which will be responsible for staffing and operating the school. To support the school's success, we are also completing the construction of teacher accommodation, as teachers cannot commute to Kontonho because it is too remote, and travel is too costly. To attract teachers, we are building three small rooms that can each accommodate two teachers overnight.

Aframano solar panels - Contributing to access to clean energy, UN SDG/GG 7.

We started a project to use solar panels on the mechanised borehole in Aframano but this is not yet complete.

Kontonho & Anyakamamu boreholes - Contributing to access water and sanitation, UN GG/SDG 6.

		<p>In February 2024, we were making good progress with the school and teacher accommodation in Kontonho, but we realised the work would not really be complete unless the school children and teachers had access to water. Kontonho gets its water from a stream about 30 minutes walk away. Building a borehole seems very justified; it will serve the community as well as the school children and the teachers. The borehole was completed in March.</p> <p>We have also started building a borehole in Anyankamamu, which is a community between Aframano and Kofiasei. It is similar to Kontonho; the buildings are very poor, the location very remote. There was no water in Anyahkamamu, which got its water from the Abena stream, 3 miles, 40 minutes there and 60m back, so almost two hours round trip. They proposed to site the borehole by the Kobedu junction (where the path forks), which is reasonably accessible by the 300 people in the community (all scattered).</p> <p>Apprentices in tailoring and other trades, in Nsuta. Strengthening gender equality' (UN GG/SDG 5) and 'investing in women'.</p> <p>This project is only at the very beginning stage, having just started before our end of year. Four women that want to pursue careers in dressmaking but cannot afford the apprenticeships are being offered financial support and training.</p> <p>Aframano JHS furniture</p> <p>Turbo Ghana funded very nice furniture for the Aframano pre-school last year, but the furniture in the primary school and the Junior High School (JHS) was in dire need of repair. New furniture was funded which was hand made locally using local wood.</p> <p>See Turbo Ghana Completed Projects and Turbo Ghana Current Projects for details of our completed and current projects.</p>

Achievements and Performance

	SORP reference	
Summary of the main achievements of the charity, identifying the difference the charity's work has made to the circumstances of its beneficiaries and any wider benefits to society as a whole.	Para 1.20	<p>During the period 1 April 2023 to 31 March 2024, we completed several significant projects.</p> <p>The achievements of Turbo Ghana have made a difference to the circumstances of some individual beneficiaries as well as to the wider society.</p> <p>Support with the cost of the school prospectus has enabled two individual students to attend senior school, and providing the start-up costs to run a sheep rearing business has enabled an individual to generate their own income and support the local community.</p> <p>We are near the final stages of building a school and teacher accommodation in Kontonho. The pre-school in Kotonho will allow access to education for 90 pupils. It is expected to open to students in August 2024.</p> <p>To attract teachers, we built accommodation on site as it is too remote for teachers to travel to. This has changed the circumstances of the local community as it is providing local education to children and allows parents to work.</p>

		<p>Building a borehole in Atonobi, has enabled about 700 people (300 adults and 400 children) will be able to access fresh water.</p> <p>A study by UNICEF in 2020 found that nearly 75% of children in Ghana suffer from multidimensional poverty, experiencing at least three dimensions of deprivation. These dimensions include nutrition, health, learning and development, child protection, water, sanitation and housing. Our projects have changed the circumstances of our beneficiaries in the following key areas: learning and development, and water.</p>

Section A Independent Examiner's Report

**Report to the trustees/
members of**

Charity Name
Turbo Ghana

**On accounts for the year
ended**

31 March 2024 **Charity no
(if any)** 1190412

Set out on pages

1

I report to the trustees on my examination of the accounts of the above charity for the year ended 31/03/2024.

**Responsibilities and
basis of report**

As the charity trustees, you are responsible for the preparation of the accounts in accordance with the requirements of the Charities Act 2011 ("the Act").

I report in respect of my examination of the charity's accounts carried out under section 145 of the 2011 Act and in carrying out my examination, I have followed the applicable Directions given by the Charity Commission under section 145(5)(b) of the Act.

**Independent
examiner's statement**

I have completed my examination. I confirm that no material matters have come to my attention in connection with the examination which gives me cause to believe that in, any material respect:

- accounting records were not kept in accordance with section 130 of the Act or
- the accounts do not accord with the accounting records

I have no concerns and have come across no other matters in connection with the examination to which attention should be drawn in order to enable a proper understanding of the accounts to be reached.

Signed: 

Date: 5 June 2024

TURBO GHANA

England & Wales - Charity number 1190412

Accounts

Trustees' Annual Report for the period

From 1 April 2022 Period start date To 31 March 2023 Period end date

Charity name: Turbo Ghana

Charity registration number: 1190412

Objectives and Activities

	SORP reference	
Summary of the purposes of the charity as set out in its governing document	Para 1.17	For the public benefit the relief of those in need in Ghana by reason of youth, age, ill-health, disability, or social or economic disadvantage in particular but not exclusively by coordinating and developing services such as, the provision of clean water, latrines, educational materials and such other services for those in need as the trustees may determine.
Summary of the main activities in relation to those purposes for the public benefit, in particular, the activities, projects or services identified in the accounts.	Para 1.17 and 1.19	<p>We are a micro charity, aimed at poverty relief in Ghana. Currently we are focussed on a village called Aframano, in Ghana.</p> <p>In the last two years we raised funds via donations for a project to build the following in Aframano:</p> <ul style="list-style-type: none">• A kindergarten school building, and• Teacher accommodation <p>Building work for the project started in February 2022 and was completed in June 2022. The kindergarten school opened for lessons on 1 August 2022.</p> <p>The kindergarten school The school has two large classrooms, each 7m x 6.6m; and two smaller rooms of 4.2m x 3.2m (one an office, one a store room). There is also a verandah of 1.8m x 14m. In total, the space is about 150 sq m.</p> <p>The teachers' accommodation Instead of building new buildings, we rebuilt two derelict buildings. One building has 4 rooms, each of which can accommodate 2 teachers. The other building has 2 rooms, each of which can accommodate 3 teachers. Thus, at maximum occupancy there could be 14 teachers in residence.</p>

		<p>We raised further funds to pay for furniture for the kindergarten school, so the children would have tables and chairs.</p> <p>After the building work was completed Turbo Ghana handed the kindergarten school and teacher accommodation over to the local education authority to run and manage.</p> <p>See Turbo Ghana for details of the school and teacher accommodation build.</p>
Statement confirming whether the trustees have had regard to the guidance issued by the Charity Commission on public benefit	Para 1.18	All trustees have regard to the commission's public benefit guidance rules for charities as outlined in the link Public benefit: rules for charities - GOV.UK (www.gov.uk)

Other		

Achievements and Performance

	SORP reference	
<p>Summary of the main achievements of the charity, identifying the difference the charity's work has made to the circumstances of its beneficiaries and any wider benefits to society as a whole.</p>	<p>Para 1.20</p>	<p>Achievements and benefits</p> <p>Turbo Ghana's most recent project (2022) in Aframano was to build a kindergarten school for 120 pupils, with teacher accommodation for up to 8 teachers.</p> <p>This project was a priority for the Head Teacher, Seth Opoku, of the existing junior school, the Community Assemblyman Kwasi Alare, and the parent-teachers association, partly to improve the children's education from a young age and for longer-term economic empowerment of the villagers. There was also a child protection element to this request: parents are obliged to work on their farms during the day, and it was important that children were safe during that time.</p> <p>The community had experienced difficulties in getting teachers to come and teach in the village, because of its remoteness, and shared the need for basic accommodation for teachers that wanted to stay during the week to avoid long commutes every day. So as well as the kindergarten school, Turbo Ghana funded building two smaller buildings for teacher accommodation. The development and design of the school was led by the local community, coordinated by Assemblyman Kwasi Alare and Head Teacher Seth Opoku.</p> <p>Please see here the Ghanaian radio station KESSBEN coverage of the Inauguration of Turbo Ghana's school (2022) - on YouTube.</p> <p>The delivery of the kindergarten school and accommodation has transformed the delivery of education in the village of Aframano for very young children and their parents.</p> <p>Future projects and visit to Ghana</p> <p>To further provide access to education and water for the population around Aframano, the community in Aframano have now requested a kindergarten school, teacher accommodation and a borehole in Kotonho, Ghana. Kotonho is two hours walk from Aframano, which is too far for preschool children from Kotonho to travel. It would also serve families living</p>

		<p>Anyankamamu an hour away. Currently children based in Kotonho and Anyankamamu miss out on essential education. The local community are very keen to enable young children to access education early in their development, particularly for girls who often have lower opportunities for accessing education in villages in Ghana. The kindergarten school in Kotonho is projected to allow access to education for 70 pupils.</p> <p>The community in Aframano have also identified the need for a manual borehole (there is no electricity in Kotonho). The borehole would ensure access to clean water for 100 people.</p> <p>In January 2023, Professor Mark Ryan made a trip to Ghana to (6 – 21 January) to meet with the local parents, children and teachers, executives of the parent-teachers association, the Queen Mother and the sub Chiefs of Aframano, and the local Community Assemblyman Kwasi Alare to estimate costings to build the school, accommodation and boreholes in Kotonho.</p>

Charity registration number: 1190412

Objectives and Activities

	SORP reference	
Summary of the purposes of the charity as set out in its governing document	Para 1.17	For the public benefit the relief of those in need in Ghana by reason of youth, age, ill-health, disability, or social or economic disadvantage in particular but not exclusively by coordinating and developing services such as, the provision of clean water, latrines, educational materials and such other services for those in need as the trustees may determine.
Summary of the main activities in relation to those purposes for the public benefit, in particular, the activities, projects or services identified in the accounts.	Para 1.17 and 1.19	<p>We are a recently formed registered charity and have been operating since July 2020, although our activities have been affected by the global COVID-19 pandemic which has limited our ability to raise donations and pursue projects.</p> <p>However, we have raised £13656.06 in funds via donations for a project to build the following in Aframano:</p> <ul style="list-style-type: none">● A pre-school building, and● Teacher accommodation <p>Building work for the project started in February 2022.</p>

		<p>Aframano has a junior school with four or five classrooms, for children aged 5 to 12. This accommodates children of junior school age. The villagers wanted to establish a pre-school for children too young to go to the junior school. This will benefit the children by preparing them for school education, but importantly it will also benefit parents, by freeing them of childcare during part of the day and enabling them to work.</p> <p>Because Aframano is isolated, the villagers also asked for a small building to accommodate teachers who stay in the village during the week, and return home at weekends. This will help attract better teachers who are able to spend more time teaching without worrying about how they will get home each night.</p>
Statement confirming whether the trustees have had regard to the guidance issued by the Charity Commission on public benefit	Para 1.18	All trustees have regard to the commission's public benefit guidance rules for charities as outlined in the link Public benefit: rules for charities - GOV.UK (www.gov.uk)

Achievements and Performance

	SORP reference	
<p>Summary of the main achievements of the charity, identifying the difference the charity's work has made to the circumstances of its beneficiaries and any wider benefits to society as a whole.</p>	<p>Para 1.20</p>	<p>In January 2021, Professor Mark Ryan made a trip to Ghana to (21 January to 3 February) meet with the builders and community to agree the spec of the Pre-School and Teacher Accomodation. During this visit Professor Ryan agreed the materials that would be used for the Pre-School (concrete floor; walls made from blocks which will be plastered and painted; windows will be wood, with shutters, no glass; the roof will be corrugated aluminium; the ceiling will be plywood). It was also agreed to refurbish two existing buildings (and demolish a third one) for the Teacher Accomodation, rather than build a small building with 3 rooms.</p> <p>Administration processes were also agreed as well as some hardship funds (in line with the Turbo Ghana Sponsoring Education and Hardship Fund Policy). Also potential new projects were also discussed. These include potential future projects (Kontonho, Anyakammamu, and Sereso), which were discussed at a meeting with the trustees when Professor Ryan returned to the UK.</p> <p><u>Aframano Pre-School</u></p> <p>We have begun building the pre-school which is located near the existing school building. The pre-school has two classrooms and two other rooms (suitable as offices or store rooms). The pre-school will comprise two large rooms, each 7m x 6.6m; and two smaller rooms of 4.2m</p>

x 3.2m. There is also a verandah of 1.8m x 14m. In total, the space is about 150 sq m. The building work is progressing well. The foundations are in place and so is the main structure, and the roofing has started.

Aframano Teacher Accommodation

There is currently a small semi-derelict building with four rooms on the site where we are planning the teacher accommodation, some of the rooms in this semi-derelict building are currently used for teacher accommodation. The rooms are very basic: they have some bedding on the floor, a chair or two, and a makeshift curtain covering the window opening. Two teachers share a room, but currently not all the rooms are habitable.

The rooms we build will be similar in style, accommodating two teachers per room. We will build to a better standard: there will be shutters that can be closed on the window, and we will also equip the existing rooms with nicer bedding. If we have money left over, we will also improve the quality of the existing rooms.

The building we are building will provide 4 small rooms (2 teachers per room) and 2 larger rooms (3 teachers per room) - total up to 14 teachers will be accommodated.

Building work for the teacher accommodation is also under way. The foundations and basic structure is in place.

		<p>Please see our website for further details about the Pre-school and teacher accommodation (2022)</p> <p>https://turboghana.org/projects/pre-school/</p>

England & Wales - Charity number 1190412

Accounts

Trustees' Annual Report for the period

From **15 July 2020** Period start date To **31 March 2021**
Period end date

Charity name: **Turbo Ghana**

Charity registration number: **1190412**

Objectives and Activities

	SORP reference	
Summary of the purposes of the charity as set out in its governing document	Para 1.17	For the public benefit the relief of those in need in Ghana by reason of youth, age, ill-health, disability, or social or economic disadvantage in particular but not exclusively by coordinating and developing services such as, the provision of clean water, latrines, educational materials and such other services for those in need as the trustees may determine.
Summary of the main activities in relation to those purposes for the public benefit, in particular, the activities, projects or services identified in the accounts.	Para 1.17 and 1.19	<p>We are a newly formed registered charity and have been operating for less than a year. Throughout the period the UK has been affected by the global COVID-19 pandemic which has limited our ability to raise donations and pursue projects.</p> <p>Going forward, we intend to raise funds to undertake two projects:</p> <ul style="list-style-type: none">• A pre-school building• Teacher accommodation <p>Aframano has a junior school with four or five classrooms, for children aged 5 to 12. This accommodates children of junior school age. The villagers want to establish a pre-school for children too young to go to the junior school. This will benefit the children by preparing them for school education, but importantly it will also benefit parents, by freeing them of childcare during part of the day and enabling them to work.</p> <p>Because Aframano is isolated, the villagers have also asked for a small</p>

		building to accommodate teachers who stay in the village during the week, and return home at weekends. This will help attract better teachers who are able to spend more time teaching without worrying about how they will get home each night.
Statement confirming whether the trustees have had regard to the guidance issued by the Charity Commission on public benefit	Para 1.18	All trustees have regard to the commission's public benefit guidance rules for charities as outlined in the link Public benefit: rules for charities - GOV.UK (www.gov.uk)
