

Rainworks Kenya

Statement on Income and Activities 2022-23

During this period, Rainworks Kenya still experienced challenges in fundraising following on from the heavy impact of the covid era. Trustees had reduced time available, and the fundraising climate was extremely difficult. We are therefore submitting a report of zero income and expenditure for 2022-23 with the expectation for a resumption of activities for 2023-24.

The only activity that was possible to complete in 2022-23 was the installation of 1 (one) water tank in Nganyoi community, Nakuru. This was funded through a direct donation by a trustee. Discussions with the community focused on planning the intended resumption of fundraising for the following year.

Ends.
