Achievements and Performance

	SORP reference	
Summary of the main achievements of the charity, identifying the difference the charity's work has made to the circumstances of its beneficiaries and any wider benefits to society as a whole.	Para 1.20	<p>Achievements by donations to the following charities:</p> <p>Rainforest Trust UK: The Red-Inc Foundation has donated funds that has protected 558 acres of rainforest through the Climate Action Fund. This stores approximately 94,860 tonnes CO2e from being released into the atmosphere by protecting these areas.</p> <p>Trees For Cities: The Red-Inc Foundation has donated funds that has planted 67 native trees in London. These trees are planted and nurtured to maturity by volunteers.</p> <p>Eden Reforestation Projects: The Red-Inc Foundation has donated funds that has planted 6,665 trees in Madagascar. These mangrove trees are planted by locals who are paid a fair wage. Scientific studies have shown that Mangroves sequester carbon at a rate two to four times greater than mature tropical forests, and contain the highest carbon density of all terrestrial ecosystems. This is because of the large amounts of biomass stored underground in the extensive root system. Mangroves are also key part of coastal ecosystems, and renowned for an array of ecosystem services, including fisheries and fibre production, sediment regulation, and storm/tsunami protection.</p>
