

Thieves Lane Community Garden annual report

1st April 2024– 31st March 2025

Summary of activities from April 2024 – March 2025:

Variable weather this year included longer dry spells in the summer, although it was cooler than previous years. It was however, challenging to keep on top of necessary regular watering, especially during the summer as volunteers took time away on holiday. However, we were able to continue our work improving the front and middle sections of the garden, planting up key areas and improving the edging of the borders to clearly define it from the pathway.

We maintained a regular monthly volunteer slot on Saturdays, but switched it to afternoons, which helped improve volunteer attendance. We also had people visiting to attend to the garden in between sessions, to help keep on top of bindweed and continue work slowly clearing the back section of the garden.

We were pleased to see that people were making use of the bench near the entrance. We look forward to a year of continued planting and developing the further end section of the garden.
