

Elbourn Memorial Housing Trust Annual Report For Year Ending 31st December 2024

Charities Commission number: 1201508

History:

Elbourn Memorial Housing Trust (The Trust) was established in 1950, with a bequest from the late Miss Elbourn who lived her entire life in the village of Bassingbourn, South Cambridgeshire.

The original 'scheme of governance' was established and registered with the Charity Commissioners for England and Wales in 1951. It was amended most recently in October 2023 when The Trust became a Charitable Incorporated Organisation (CIO). The work to become a CIO was initiated because of a desire to build additional almshouses and mitigate any financial liabilities for trustees.

Accounts have been compiled on an accruals basis in accordance with requirements of the Charities Act 2011, The Trust deed and the Charities SORP (FRS 102) 2022 version. Charities SORP is Charities Statement of Recommended Practice.

Aims & Objectives:

In accordance with the bequest from Miss Elbourn, the Trust manages three single occupancy properties in High Street, Bassingbourn and the scheme provides affordable accommodation for local people in need. Four additional properties are under construction and will be completed and ready for occupation in late Spring 2025.

The Trust is managed by a group of trustees who provide their services on a voluntary basis. The Trust has on average, five trustees. The recruitment and retention of trustees remains the biggest challenge to the running of The Trust.

The Trust is a member of The Almshouse Association (AHA) of the UK and runs in accordance with the principles set out by them.

The sole source of income for The Trust is the weekly maintenance contribution (WMC) paid by the beneficiaries, ie the residents of the properties owned and managed by The Trust. The setting of the WMC has, historically, been set by trustees at a level which enables The Trust to maintain the properties and to hold a level of financial reserves as recommended by the AHA. The WMC is therefore set at a level which is significantly lower than the market price for rental in the commercial market. The level of WMC is reviewed annually by The Trust and is amended as and when the trustees deem it necessary.

From time to time The Trust is in receipt of small donations.

About the AHA:

There have been almshouses in the United Kingdom for more than 1000 years. What they all have in common is their provision of affordable housing and support for the needy or vulnerable, often older people and are usually managed by local trustees. The current association was established in 1950 when the National Association of Almshouses (The Almshouse Association) was born. The objects of the Association are to assist charity trustees to manage their resources effectively, to support them in providing good quality housing for those in need, to promote the welfare and independence of residents and to preserve the historic tradition of almshouses for future generations. Today, The Almshouse Association is an essential component of the almshouse movement and provides support, information and guidance on a broad range of general and specific issues, to over 1600 independent almshouse member charities that provide homes for around 36,000 residents across the United Kingdom.

Summary of Financial Activities:

The Trust has a single current bank account held with MetroBank which pays no interest. MetroBank charges £20.00 per month for provision of banking services.

The Trust holds an investment with M&G. At the beginning of the year its value was £27,769.36.

The M&G investment held by The Trust increased in value by £2051.32. The investment was encashed on 14/11/24 and the balance of £29,820.68 transferred into the MetroBank current account.

The closing balance of the Metrobank account on 31st December 2024 was £106,981.23.

There was no change in residents with all 3 incumbents remaining in their respective properties. WMC arrears from 2023 were cleared in January 2024. All WMC obligations were fulfilled by the residents. At the end-2024 the balance on unpaid WMC was zero.

Total WMC income for 2024 was £12,270.66. WMC arrears due were overpaid by one of the residents. The additional amount of £9.34 was treated as a donation.

The main items of expenditure incurred by The Trust during 2024 were as follows:

- £6,712.60 for non-capitalised expenditure on development project.
- £1,723.20 to Trulight for maintenance to doors and windows
- £579.00 to H&L Garden Services for grounds maintenance
- £275.00 to Holcroft Services for Quinquennial report (as mandated by AHA)
- £810.49 to Grout Insurance Brokers for annual buildings and liability insurance premium

Under FRS 102 and the Charities SORP expenditure on the construction of new almshouses is capitalised, ie costs associated with the construction are recognised as fixed assets on the balance sheets rather than being expensed. A summary of capitalised expenditure and grants/loans received during 2024 are detailed as follows:

- £10k for pre-contract costs in Jan 2024.
- WoodOak's S106 contribution/donation of £240k on 1st November 2024. In-line with the contract with WoodOak the developer incurred their share of the build costs first.
- AHA loan arrangement fee of £3750.00 on 11th December 2024
- £60k 1st milestone payment paid to WoodOak from The Trust (less 5% contractual retention of £3k) in December 2024.

Please note that all capitalised expenditure brought onto balance sheet when incurred giving rise to an increased in fixed assets (property) from £540,000 (the value of three existing properties) to £853,750 at year end.

Restricted reserves of £265k reflect the grant received from AHA (25k) and the “donation” from the WoodOak (S106 contribution) of £240k.

Building Development Project:

Background

Historically, the land owned by The Trust has not been fully utilised and sufficient space to build additional homes has always existed. Discussions relating to the construction of new almshouse's on The Trust's land go back many years. However, The Trust's income and reserves were insufficient to initiate a build programme. Having investigated existing planning approvals for South Cambridgeshire District Council (SCDC), in 2015, a trustee approached a local developer (WoodOak Limited) who had been granted permission to develop a parcel of land within the village to discuss off-setting their Section 106 affordable housing obligation.

Initial discussions took place with the developer where an idea to utilise The Trust's land and frame a potential financial agreement whereby The Trust and developer contributed roughly equal amounts to the project. Furthermore, it was proposed that the developer undertake all building works.

It was agreed that the developer would work to include the utilisation of the Trust's land into their S106 agreement with SCDC. In September 2015, the Trust applied for planning permission with SCDC linking-in with the developers S106 agreement. SCDC eventually determined in 2021 that The Trust would also be required to enter an S106 agreement with SCDC and the developer. The Trust was able to find a firm of lawyers willing to provide pro-bono legal services and in January 2023 The Trusts S106 agreement was finalised. Planning permission to construct 4 new almshouse's was granted in February 2023. Build costs were estimated at £520k with The Trust responsible for funding half the project cost. A sub-team of trustees began to focus on the task in March 2023

Progress in 2024

Agreement was reached with the developer that The Trust's contribution be capped at £260k. This comprised £20k to pay for pre-contract items including detailed drawings and various surveys (environmental, land drainage, arboricultural etc). The first £10k was paid at the end-2023 and the balance paid to WoodOak in January 2024. The remaining £240k would cover The Trust's share of build costs.

The Trust determined that they could utilise £60k of reserves which meant that The Trust needed to finance £200k. The AHA agreed in principle to provide a £25k grant and a 10 year £75k interest free loan. The remaining £100k would be borrowed from elsewhere at commercial rates. The Trust initiated formal requests for information on loans and grants from the AHA, the Charity Bank and other financial entities.

We were once again fortunate enough to engage a pro-bono legal team to help us with constructing and agreeing a commercial contract with the developer. To enable the initiation of the pre-build works (detailed drawings, planning pre-conditions etc.) the developer and the Trust

signed a “letter of engagement” prior to the full commercial contract. This enabled the Trust to pay the developer to commence the works.

The full commercial contract was signed on the 23rd of April 2024. The risks to the Trust were mitigated by:

1. the developer owning the financial risk of any project cost over-run. In effect the Trust had a fixed price contract.
2. Other than pre-build costs, the developer agreed to contribute their “half” of the project cost before the Trust made any payments of their own.

Breaking ground happened in early May 2024 and the houses are scheduled for completion by the end-April 2025.

Ian Corlett

Treasurer – Elbourn Memorial Housing Trust
