

## Annual Report

To move forward with this upcoming financial year's plans, we are still planning on locating a permanent base where the asylum seekers, refugees and the Leave to Remain communities can come together and deal with their discussions on health, benefits entitlement checks, and for them to socialise with families of different backgrounds and cultures. I still intend to hold classes/sessions for mental health and self-awareness which will help benefit families in making them self-sufficient and help with their confidence building. I intend to also look at short courses which may be of benefit such as ESOL, aromatherapy, first aid, and will be open to suggestions of what courses the families want as well. We are continually distributing food Parcels for the less fortunate struggling and needy families.

We will also be providing free furniture to families in need when they move into their new homes. This will be items such as beds, fridges and cookers etc. I will have a launch for when I have my new venue and once I have the venue, I will then aim to raise money by doing events to engage the families in the community and also a way of raising funds for the charity too. I would also like to help the families be able to get out more to help them with social and interactive skills and help build their confidence by looking at arranging day trips. I would also like to increase the number of volunteers for my charity.

Regards
