Water pump projects-

With the expertise help of our volunteers and assessors, assessments were conducted to which homes not having access to clean water, assessing personal and financial means, that met eligibility criteria. This information is then collated with video evidence relayed for approval to trustees. Upon approval, engineers are then instructed to inspect and begin installation which, within a week to 10days can be completed.

Tuition Centre-

Initially engaging with local communities and schools, to locate underprivileged children from marginalised communities, liaising with parents and seeking consent to offer placements at our centre. With experienced staff and volunteers and campaigns to promote the importance of education, enrolling upto 55 children on the most deprived/low income backgrounds. Initiating literacy programs to help improve literacy particularly amongst disadvantaged communities. Regular testing/assessments to track progression, appraisal and rewards mechanisms put into place to attract children into education. We have seen some children progress with scholarships and onto premedical college education. With a hope to train for medicine.
