The charity's principal sources of funds (including any fundraising)	Para 1.47	- Regular monthly donations - One-off donations e.g. through corporate charitable donation/fundraiser - Funds raised through sporting and social events (e.g. marathon running, gala dinners, quizzes, cake sales) - Grants - Sponsorships
Investment policy and objectives including any social investment policy adopted	Para 1.46	No formal investment policy. To date funds have been received and kept in the charity current account with no other strategic investments made.
A description of the principal risks facing the charity	Para 1.46	We have outlined below some of the potential risks that the charity faces. However, none of these are deemed to be material or significant enough to affect the ongoing viability of the charity, which is in a financially healthy position. Risk: Macro economic environment. There appears to be less opportunities to secure grants in the charity sector. Mitigants: Grants are only a very small amount of the charity's income so this is not a major concern. Risk: Seasonal income. Typically, there is more income/funds raised in the summer months than the winter months. Mitigant: This is typical for a charity like ours which relies on, to some extent, funds raised through summer sporting activities/events. This is frequently discussed and reviewed and we seek to hold winter (such as our winter ball) to supplement and offset this appropriately. Risk: Rising costs. As the charity has grown the costs have risen to. Mitigant: Monthly costs continue to be typically below c.20-30% of monthly/quarterly income which is very healthy and not a concern. Rather it is something which is monitored.
