

Annual Report and Account

2024 to 2025

Charity Number: 1210170

Financial statements for financial year end 31 March 2025

1. Executive Summary

The Sudan Kidney Aid charity is dedicated to supporting dialysis centres across Sudan by providing essential dialysis machines, life-saving medications, and necessary disposable supplies. The ongoing war in Sudan has left many dialysis centres destroyed, damaged, or abandoned, and the remaining centres are struggling with insufficient resources. This report provides a brief highlight of the activities for the year Apr-2024 to Mar 2025 and gives an Annual Account Summary.

2. Organization Overview

Name: Sudan Kidney Aid Charity

Registered: September 2024

Location: Coventry, UK

Mission: To support dialysis centres in Sudan by providing dialysis machines, critical medications, and necessary disposable supplies, enabling kidney patients to receive life-saving treatment despite the challenges posed by the ongoing conflict.

Vision: To ensure that every kidney patient in Sudan has access to timely, high-quality dialysis care, regardless of the disruptions caused by the war or their financial situation.

Trustees and Management:

Name	Position	Date Appointed
Dr Ali Imam	Chair and Trustee	09 March 2024
Dr Mohamed Mohy El-din Mahgoub	Trustee	23 November 2025
Dr Mohamed Sayed	Trustee	09 April 2024
Mr Tarig Z Y Ahmed	Treasurer and Trustee	09 March 2024
Mr Ismaeil Ibrahim	Trustee	09 March 2024

History & Key Milestones:

Sudan Kidney Aid charity has been donating critical resources to dialysis centres across Sudan. Over the past year, in response to the war, we have been working to support the remaining operational dialysis centres by supplying them with dialysis machines, medications, and supplies.

- **March 2024** – founded in Coventry, UK.
- **Aug 2024** – Purchase and delivery of 400 Kidney Dialysis kits to El Damer Hospital, River Nile State, Sudan.
- **Sep 2024** - Officially registered with the Charity Commission for England and Wales,
- **December 2024** - 400 kits to Shendi Hospital in River Nile state and 400 kits were sent to Shabasha Hospital in White Nile state.
- **January 2025** – Purchase of 2 kidney dialysis machines, to be shipped to El Damer Kidney Dialysis Centre, Sudan.

3. The Need for Kidney Care in Sudan

The conflict in Sudan, which has been ongoing for more than two years, has caused widespread destruction to healthcare infrastructure, including dialysis centres. Many centres have been destroyed or forced to shut down due to the war, while others remain severely underfunded and

lacking essential resources. Over 70% of dialysis patients experienced treatment interruptions and 57% cannot maintain their regular, life-saving sessions, because of the war¹.

Key challenges include:

- **Destruction and Abandonment:** Many dialysis centres have been bombed, damaged, or abandoned, leaving thousands of patients without access to care.
- **Lack of Equipment and Supplies:** The few remaining centres are struggling to provide adequate care due to a lack of functional dialysis machines, essential medications, and medical disposables.
- **Increased Demand:** The ongoing conflict has also led to an increase in kidney-related diseases due to stress, malnutrition, and lack of medical care, exacerbating the pressure on the already limited dialysis centres.

Our target group includes:

- Kidney patients who rely on dialysis but have been unable to access care due to damaged centres and lack of resources.
 - Dialysis centres that are struggling to provide services but lack the necessary equipment and medications to treat patients.
-

4. Our Programs and Services

1. Providing Dialysis Machines:

We have been working to replace destroyed or damaged dialysis machines in Sudan. This equipment is crucial for ensuring that patients have access to the treatment they need to survive. The conflict has made it difficult to import new machines, but with external support, we aim to continue to provide machines to the dialysis centres we support.

2. Supplying Critical Medications:

We ensure that patients receive essential medications, such as erythropoietin, immunosuppressants, and antihypertensives. These medications are vital for kidney disease management and preventing life-threatening complications.

3. Supplying Disposable Medical Supplies:

We provide dialysis centres with the necessary disposable supplies, including dialyzers, tubing, needles, and gloves. Without these supplies, dialysis treatment would be unsafe or impossible to conduct.

7. Sustainability and Future Plan

To ensure the long-term success of our programs, we are committed to:

- **Building Local Partnerships:**
We work closely with local hospitals and clinics to ensure the efficient use of resources and integrate our support into existing healthcare systems.
 - **Ongoing Fundraising:**
We will continue to engage in fundraising efforts, including local and international campaigns, corporate sponsorships, and partnerships with other healthcare organizations.
 - **Advocacy for National Health Programs:**
We advocate for increased government and international support for kidney disease care in Sudan, with a focus on rebuilding the healthcare infrastructure and supporting long-term treatment options for patients.
 - **Restoring and Rebuilding Dialysis Infrastructure:**
In addition to supplying machines and medications, in the future we looking to help rebuild damaged dialysis centres and support the restoration of essential services in war-affected areas.
 - **Capacity Building and Support for Healthcare Workers:**
We also aim to organize training sessions for local healthcare workers to improve their ability to operate dialysis machines and manage kidney disease patients effectively. This support ensures the sustainability of dialysis services in the long term.
