BASICS is a charitable company limited by guarantee that serves as a membership association for individuals and for affiliated immediate care schemes to promote prehospital immediate care.  
It provides education and resources to further prehospital immediate care through courses, conferences, and the provision of grants and bursaries.

## Section C Objectives and activities

### Summary of the objectives of the charity set out in its governing document

The relief of persons suffering injury or illness by the provision of prehospital critical care in the North West of England and adjacent areas, and to advance the study of immediate medical care by the provision of training.

Delivery of patient care in the prehospital environment.

Delivery of training in prehospital medicine.

The trustees have had regard to the guidance issued by the Charity Commission on public benefit.

**Summary of the main activities undertaken for the public benefit in relation to these objectives (include within this section the statutory declaration that trustees have had regard to the guidance issued by the Charity Commission on public benefit)**

**Additional details of objectives and activities (Optional information)**

All the activity listed above results from the contribution of the volunteers in the charity.

- policy on grantmaking;
- policy programme related investment;

**Summary of the main achievements of the charity during the year**

For the period that this report covers, the volunteers at the charity were asked to respond to 317 incidents.

At present the recording system in use has not been approved formally by the North West Ambulance Service for recording patient data. This has resulted in interventions not being recorded.

Research has demonstrated that 12% of deaths before hospital are potentially preventable and there is also likely to be a reduction in hospital in-patient stay and long-term morbidity.

The model of care used by the charity is in keeping with the national model and as a result a reduction in mortality and morbidity is likely.
