Directors/Trustees  
Terence Hoey  
Maureen Hoey  
Harry C Scott  
Lorna McConnell

## Report Period 18/19

We are very glad to report that The Ultra Rare Disease Disorders and Disabilities Foundation Ltd has been moving from strength to strength the charity has in the process of extending its client base and due to that it has purchased 500 new collection boxes this will mean that we can extend our client base and by doing this we will increase our turnover as The Ultra Rare Disease Disorders and Disabilities Foundation is also glad to report that the Foundation has been working along with the Northern Ireland Halifax Foundation with a funding application to replace its office Equipment this application will enable the Foundation in its day to day work and will also improve our research and enable the foundation to purchase audio visual equipment that will enable us to hold more conferences and boost our educational facilities.

The Ultra Rare Disease Disorders and Disabilities Foundation in its research has been following reports of a Virus called Covid 19 The World Health Organization (WHO) what seems to have started in Wuhan a Chinese City where the coronavirus sars-CoV-2 was first reported. Experts say SARS-CoV-2 originated in bats That is Also how the coronaviruses behind Middle East Respiratory syndrome (MERES) and a severe acute respiratory syndrome SARS-CoV-2 made a jump to humans at one of Wuhan's open-air markets where customers buy fresh meat and fish, including animals that are killed on the spot.

The directors of The Ultra Rare Disease Disorders and Disabilities Foundation would like to welcome two new directors to its board they will be up-paid positions and they will be part time volunteers we are extremely glad to have them they will help to move the Foundation forward in 19/20 and their details are as follows:

The Foundation welcomes both Harry Scott and Lorna McConnell to its Board of Directors both Directors are well know to the Foundation and they are fully committed to moving the Foundation Forward Both Maureen Hoey and Harry Scott Will Brings valuable experience to the Foundation and Harry holds a BA Honours in Accounting his experience will help the foundation to file its accounts with the company accountants McGrady and Company Both Terry Hoey and Lorna McConnell will also bring Valuable experience to the foundation she will hold the position of Company Sectary she will closely with Terry to help him with research and funding applications she also brings an RSA Teaching Certificate in office which will be valuable experience in moving the Foundation forward with its Conferences

18/19 has been a good year for the Foundation We hope to be awarded funding from the Halifax Foundation and we will be able to replace much needed equipment for our offices and for are Rare Disease Days, Road Shows, Educational road shows, The Foundation is moving forward in it goals to build a patient and families Hub in Northern Ireland bringing with it much needed research in rare and ultra-rare diseases to help families across Northern Ireland to deal with a diagnosis of a rare or an ultra-rare disease The Foundation knows what a diagnosis of a rare or an ultra-rare can bring to a family.

The four directors are committed in moving the foundation forward to achieve its goals and wants to bring with it much needed research into rare and ultra-rare disease. In the European Union, a rare disease is one that affects no more than 1 person in 2,000 this means that between 6,000 and 8,000 different rare diseases affect an estimated 30 million people in the EU
