

CARRICKFERGUS COMMUNITY CULTIVATORS

Trustees Report for Year Ending April 2018

We have continued this year with our usual support and advice activities particularly in helping and encouraging people to get involved in social horticulture to help improve their health and wellbeing.

New areas of work have included:

- Establishing a communal seed bank
- Involvement with the Tree Charter Initiative to help support structured outdoor activities.
- Workshop teaching on local Wild Flowers such as a survey of the Castle rock face.
- Expanding our propagation group work to provide indoor plants for housebound people.

We look forward to expanding the above work in the coming year and further explore the use of our activities in helping advise and support others in the community.

Austin Herron

(Convenor)

For and on behalf of the Groups Trustees.
