

2022-2023 Annual Report

Letter from the trustees

We were pleased to have a focus on health inequalities in this last year. Although, we only had a handful of activities, we know that they were important. We hope to continue this work into the next year.

In terms of the finances, payments were made out to trustees who had paid for charitable activities that took place in the previous financial years. No new grants or donations were received in 2022-2023.
