Activities

Activities: 'It carries out activities or services itself'

Purposes: 'the advancement of education', 'the advancement of health', 'the advancement of citizenship or community development'

What the charity does: To advance medical understanding of human physiology and pathophysiology in high altitude environments. To encourage the formation of active high altitude research collaborations worldwide. To assist young researchers seeking to organise research expeditions. To widen public awareness of the importance of medical research in general, with particular reference to high altitude physiology. To educate people and inform them of current beliefs in the field of high altitude medicine These aims are achieved through support for altitude research expeditions and maintaining a website with information on altitude illness accessible to the general public.

Beneficiaries: 'People with disabilities or health problems', 'No specific group, or for the benefit of the community'

Objectives: The objects of the association are to advance education, for the public benefit, in human physiology and pathophysiology in high altitude environments

Geography

- **Main operating location:** City of Edinburgh
