

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was plotted against the number of trials for each condition. The number of correct responses increased with the number of trials for all conditions. The number of correct responses was highest for the condition with the highest number of trials (10 trials) and lowest for the condition with the lowest number of trials (2 trials).

[illegible]

1. The first step is to identify the problem.

2. The second step is to define the problem.

3. The third step is to analyze the problem.

4. The fourth step is to develop a solution.

5. The fifth step is to implement the solution.

6. The sixth step is to evaluate the solution.

7. The seventh step is to monitor the solution.

8. The eighth step is to maintain the solution.

9. The ninth step is to improve the solution.

10. The tenth step is to document the solution.

11. The eleventh step is to communicate the solution.

12. The twelfth step is to review the solution.

13. The thirteenth step is to update the solution.

14. The fourteenth step is to close the solution.

15. The fifteenth step is to archive the solution.

16. The sixteenth step is to delete the solution.

17. The seventeenth step is to restore the solution.

18. The eighteenth step is to backup the solution.

19. The nineteenth step is to recover the solution.

20. The twentieth step is to migrate the solution.

21. The twenty-first step is to clone the solution.

22. The twenty-second step is to split the solution.

23. The twenty-third step is to merge the solution.

24. The twenty-fourth step is to fork the solution.

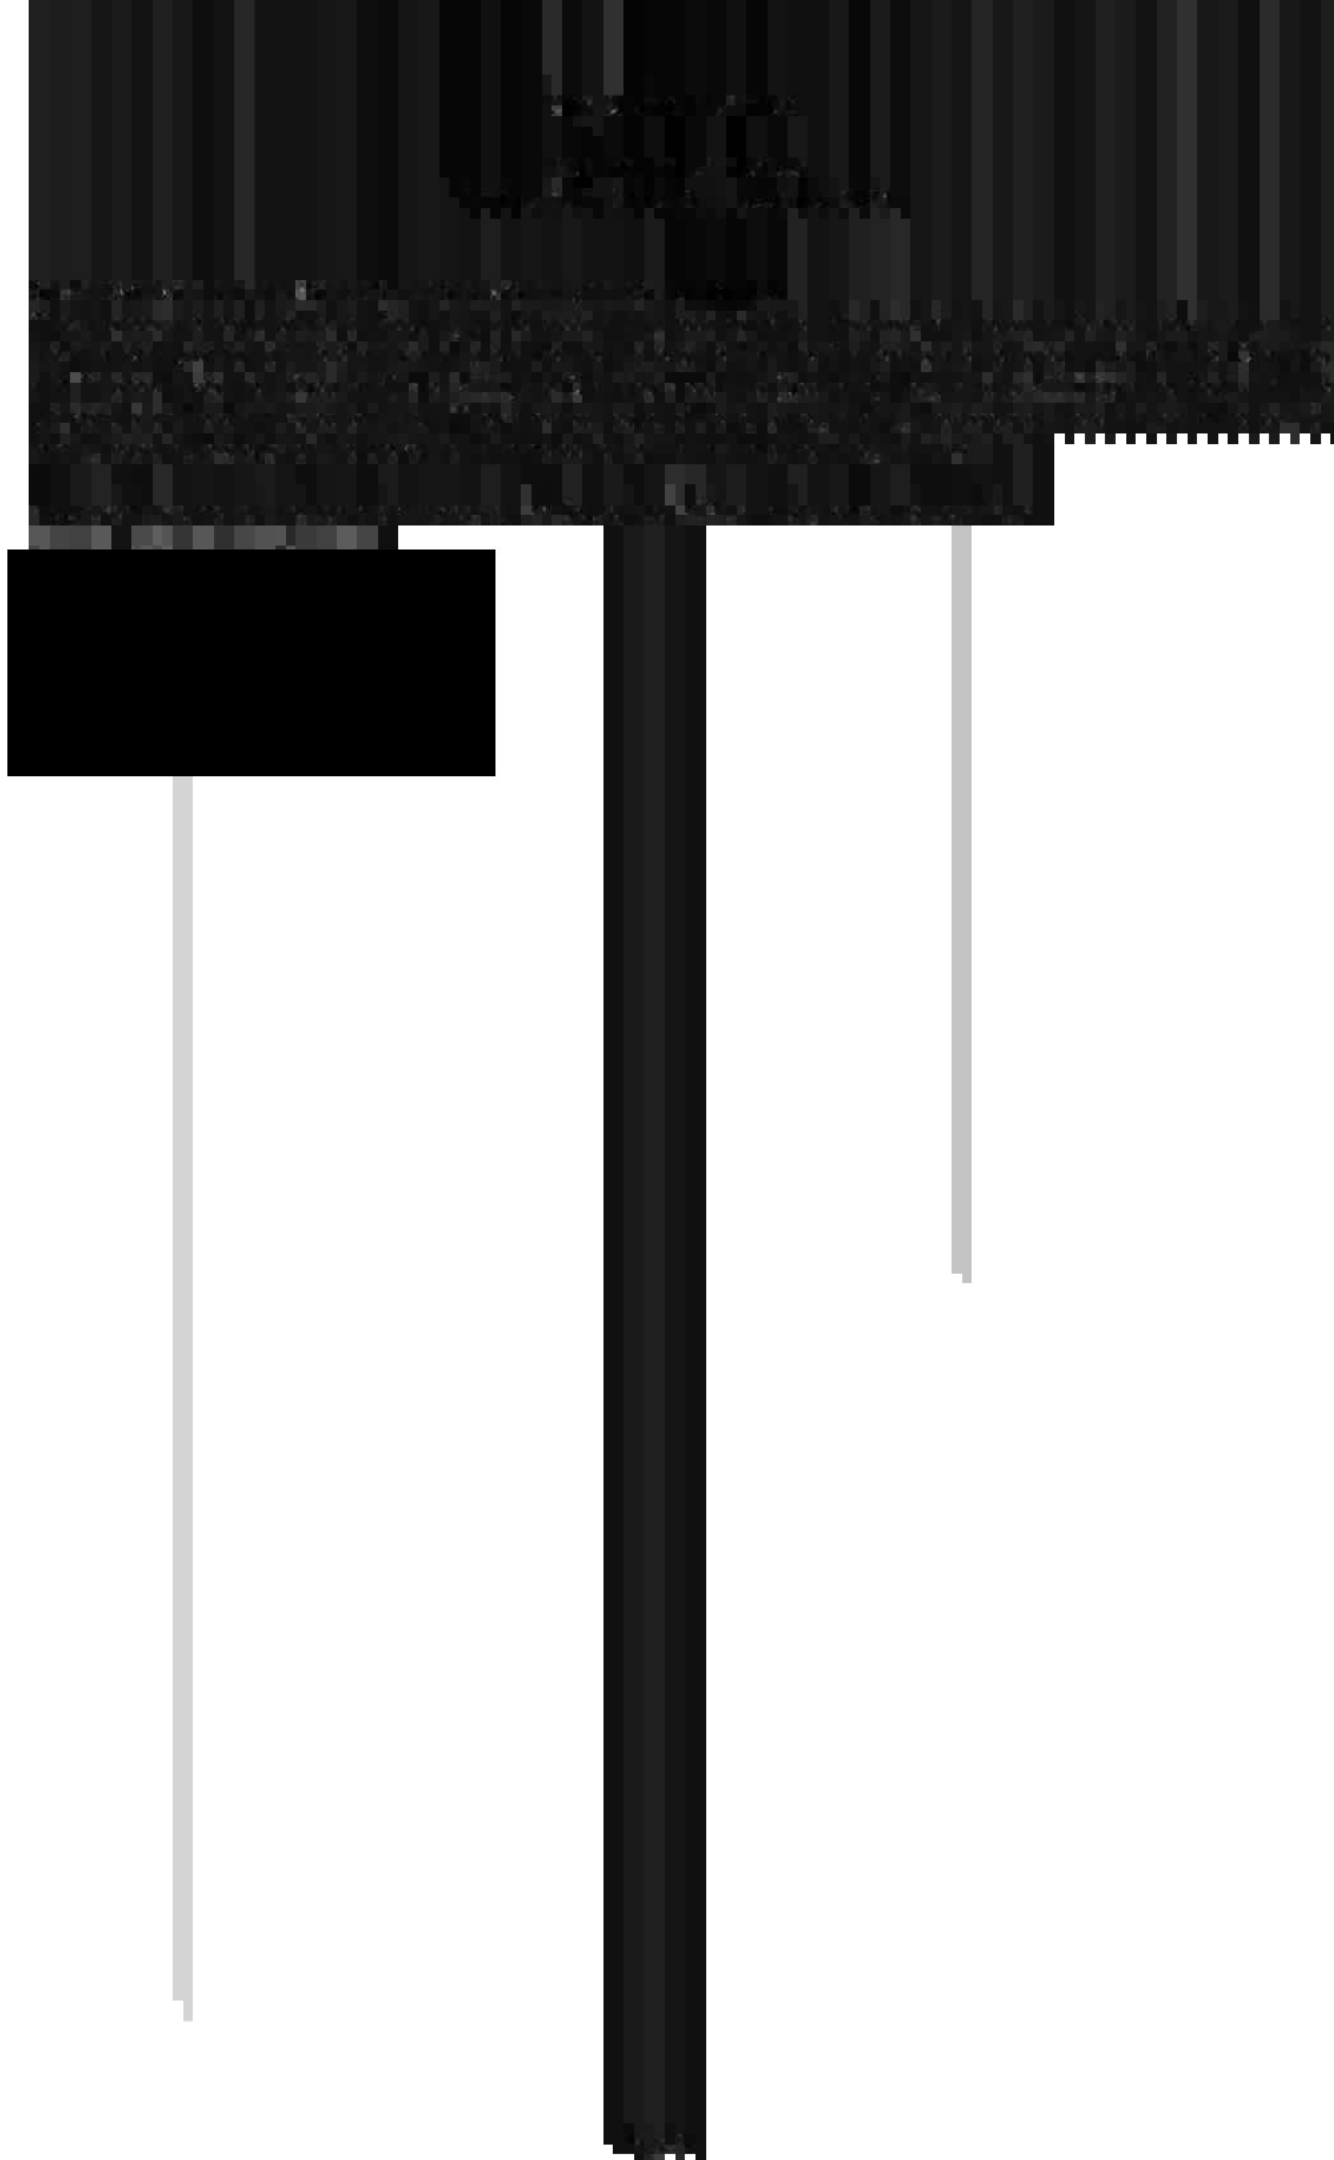

25. The twenty-fifth step is to pull the solution.

26. The twenty-sixth step is to push the solution.

27. The twenty-seventh step is to commit the solution.

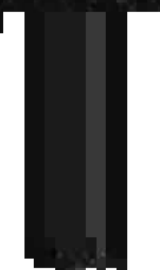

28. The twenty-eighth step is to revert the solution.

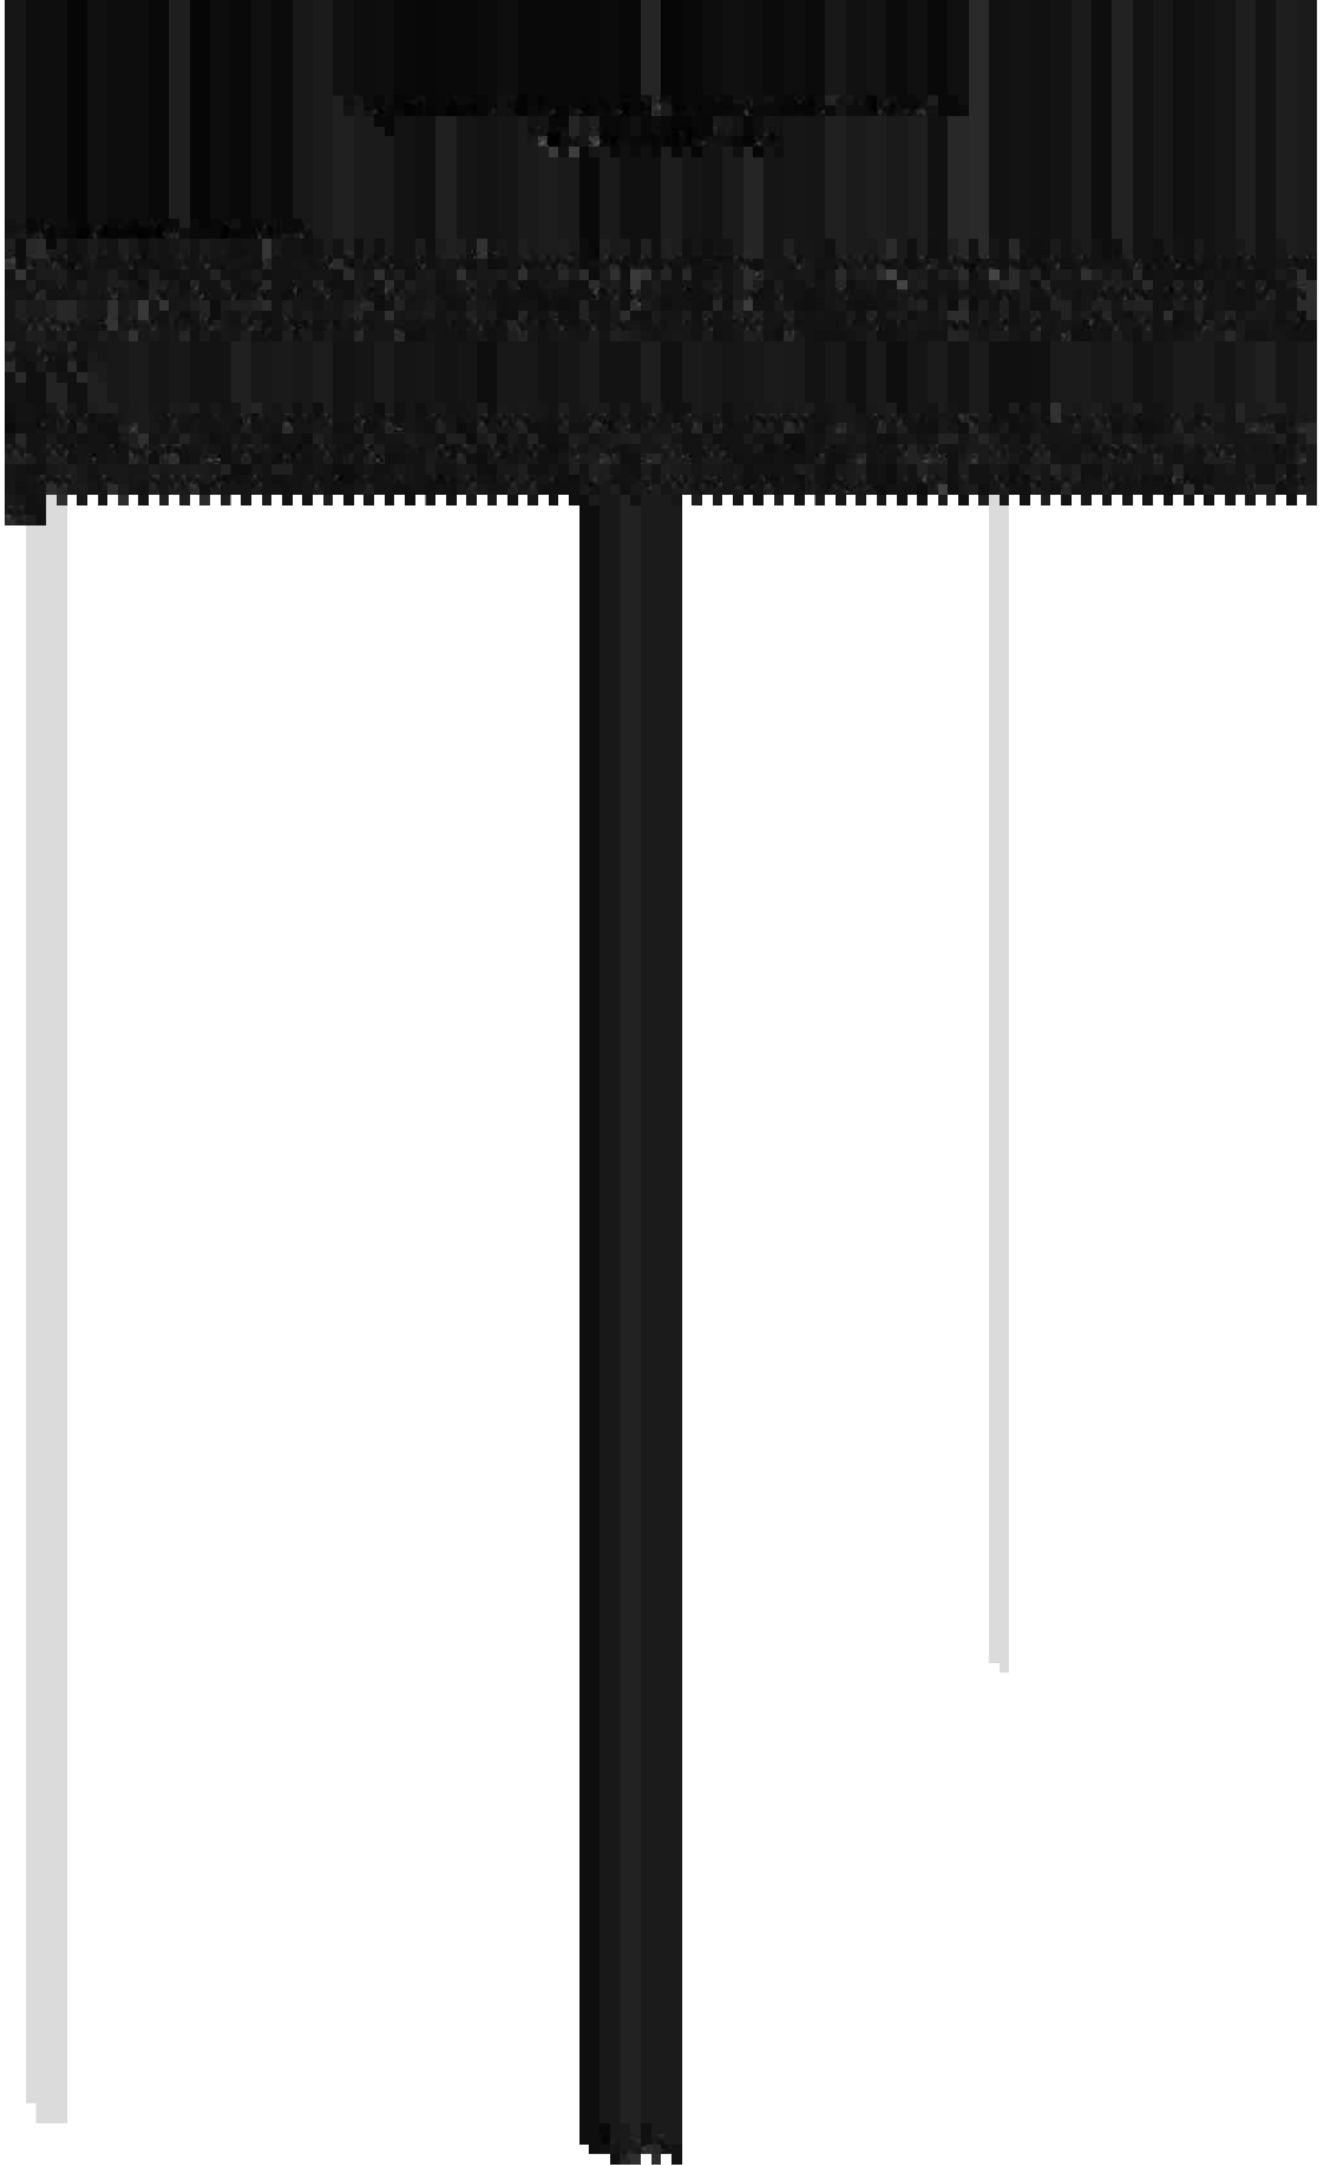

29. The twenty-ninth step is to checkout the solution.
