

Flow Country Rivers Trust

Scotland · Charity number SC044673

Details

Known as	FCRT
Status	Active
Legal form	Company (the charity is registered with Companies House)
Registered	2014-02-19
Register	View on the OSCR register

Contact

Address	North Calder Farm Thurso Caithness KW14 7XN
Website	www.fcrt.org

Activities

Activities: 'It carries out activities or services itself'

Purposes: 'the advancement of education', 'the advancement of environmental protection or improvement'

What the charity does: To maintain the pristine condition of the rivers of the far north east of Scotland for the preservation of the indigenous aquatic species therein. The bedrock of the Trust's work is scientific research, incl: habitat & electrofishing surveys to assess/monitor abundance. monitoring water quality (eg. stream chemistry, temperature, flow) & health of the aquatic insects within. monitoring the impact of external features (eg. climate change, installation and operation of terrestrial and marine infrastructure, particularly for renewable energy) in the vicinity of rivers and with potential to interfere with migratory salmon returning to native rivers). We work closely with local environmental organisations such as the Flow Country Partnership, fishery boards & academia, maintaining an extensive database of knowledge to support the region on aquatic issues, and providing advice / proposing solutions where feasible to maintain the integrity of our watercourses.

Beneficiaries: 'No specific group, or for the benefit of the community'

Objectives: A. To advance for public benefit the conservation and enhancement of native freshwater fish (including migratory salmon ids) and their environments (to include the flora and fauna proximate to the rivers and stillwaters) primarily but not limited to the inland and coastal waters connected to or forming a part of the 'Flow Country' of Caithness and eastern Sutherland including but not limited to the jurisdictional area of the Caithness and the Northern District Salmon Fishery Boards. B. To advance the education of the public and any association, company, local authority, administrative, or governmental agency or public body or

representative body in:- (1) The understanding of aquatic ecosystems, including their fauna, flora and economic and social activity, and river catchment management. (2) The need for, and benefits of, protection, conservation, rehabilitation and improvement of aquatic environments.

Geography

- **Main operating location:** Highland
- **Geographical spread:** Wider, but within one local authority area
