Objectives: The advancement of education We believe in life-long education and want to engage citizens of all ages in cultural activities to learn about other cultures and connect with the wider world. For this reason KulturCollective will work together with national and international artists and musicians, academic institutions and cultural centres. KulturCollective aims to create a space for participation and collaborative learning in which the experience of music, art and literature will be multi-sensory and can give the audience a deeper understanding for the purpose of Art. This educational purpose of KulturCollective will become apparent in a planned festival that connects Aberdeen with Scandinavian countries. The advancement of citizenship or community development KulturCollective aims to engage as many citizens as possible through the open and socially inclusive activities. The organisation will involve the local community to work alongside with national and international artists in order to create Art projects that the community can identify with, feel connected and share a pride for their neighbourhood. For this purpose, some workshops will be held where youth and different entities will work side by side with KulturCollective to provide cultural events in areas such as Tillydrone. One of the activities will be a music workshop where young people will work with Scandinavian bands. We hope that an active citizenship will result from a greater sense of connection between Scotland and Scandinavia, realising commonalities and shared heritage.
