Activities

Activities: 'It carries out activities or services itself'

Purposes: 'the advancement of citizenship or community development', 'the advancement of the arts, heritage, culture or science', 'the advancement of environmental protection or improvement'

What the charity does: The charity was set up to demonstrate and research the marine protected area around Fair Isle by identifying research priorities. FIMRO is the community voice and representation for the DR MPA. We work closely with the community to ensure our objectives are current and meet the communities aspirations for the DR MPA. We undertake locally based research projects, with citizen science a key to engaging the community and wider public. Funding support allows for larger research projects with the information/data and other outcomes feeding into the DR MPA. Ultimately data etc may identify management measures or local agreements to support further research. We actively update the community with DR MPA activities via the Fair Isle Times, newsletters, WhatsApp, meetings and events, and also via the FIMRO website. Presentations and talk around current and new research are popular and well attended.

Beneficiaries: 'No specific group, or for the benefit of the community'

Objectives: 4 The purposes of the organisation are: 4.1 The advancement of environmental protection or improvement primarily by: 4.1.1 Working to better understand the marine and coastal habitats of Fair Isle, the biological interactions within these environments and the impact of human activity upon them. 4.1.2 Representing the view and interests of Fair Isle residents with regards to the protection and use of Fair Isle's marine and coastal natural heritage 4.1.3 Promoting the value of Fair Isle's coastal and marine natural heritage to the wider public, both independently and through co-operation with other relevant organisations. 4.2 The advancement of citizenship or community development (including rural or urban regeneration) primarily by: 4.2.1 Working to explore the potential for sustainable economic development linked to Fair Isle's natural marine and coastal resources 4.2.2 Empowering the community to contribute to discussions regarding the use and protection of its natural marine and coastal resources and heritage. 4.3 The

advancement of the arts, heritage, culture or science primarily by: 4.3.1 Carrying out biological research and monitoring work within the boundaries of the Fair Isle Marine Protected Area during this projects lifetime 4.3.2 Supporting research conducted by other bodies within the boundaries of the Fair Isle Marine Protected Area during this projects lifetime 4.3.3 Commissioning and/or supporting research projects that may from time to time arise or be deemed necessary to further the aims of better understanding and contributing to the protection of Fair Isles marine and coastal environment, but that fall out with the scope of the Marine Protected Area project 4.3.4 Seeking to promote a better knowledge and understanding of scientific research conducted on the isle, both to the local community and visitors to Fair Isle.

Objectives and Activities

In October 2016, the Fair Isle community was notified that their proposal to create a marine protected area in the coastal waters surrounding the isle had been accepted, and the Fair Isle Demonstration and Research Marine Protected Area officially designated. This was the culmination of over twenty years campaigning by members of the Fair Isle community to gain some form of protection for their immediate marine environment, following substantial and sustained declines in the isle populations of a number of breeding seabird species.

The proposal was unusual in that it was developed by the community, principally the Fair Isle Marine Environment and Tourism Initiative (FIMETI), a non-constituted partnership of isle community members, the Fair Isle Bird Observatory Trust and the National Trust for Scotland, the latter being the isle landlords. Following designation, the community members responsible for operating FIMETI felt that the time had come to step down. The newly-designated marine protected area was to be governed by a Steering Committee, representing the major stakeholders, including a range of local/national fisheries organisations and conservation bodies. With the dissolution of FIMETI, the Fair Isle Bird Observatory Trust and National Trust for Scotland were represented on the Steering Committee as independent organisations, but it was recognised that having originated with the Fair Isle community, representation of their views and interests on the committee was vital.

A new, properly constituted body was needed, leading to the establishment of the Fair Isle Marine Research Organisation (SCIO) in June 2018, with three isle residents as trustees. The hope was that such an organisation could in the first instance act as a representative of the community on the Steering Committee of the Fair Isle Marine Protected Area, enable the employment of a local project officer and in time develop a range of research projects, independently and with other committee partner organisations that would bring socio-economic and environmental benefits to Fair Isle.

Our charitable purposes include:

- the advancement of citizenship or community development
- the advancement of the arts, heritage, culture or science
- the advancement of environmental protection or improvement

We aim to fulfil these purposes by:

- Working to better understand the marine and coastal habitats of Fair Isle, the biological interactions within these environments and the impact of human activity upon them.
- Representing the view and interests of Fair Isle residents with regards to the protection and use of Fair Isle's marine and coastal natural heritage
- Promoting the value of Fair Isle's coastal and marine natural heritage to the wider public, both independently and through cooperation with other relevant organisations.
- Working to explore the potential for sustainable economic development linked to Fair Isle's natural marine and coastal resources
- Empowering the community to contribute to discussions regarding the use and protection of its natural marine and coastal resources and heritage.

- Carrying out biological research and monitoring work within the boundaries of the Fair Isle Marine Protected Area during this project's lifetime
- Supporting research conducted by other bodies within the boundaries of the Fair Isle Marine Protected Area during this project's lifetime
- Commissioning and/or supporting research projects that may from time to time arise or be deemed necessary to further the aims of better understanding and contributing to the protection of Fair Isle's marine and coastal environment, but that fall out with the scope of the Marine Protected Area project
- Seeking to promote a better knowledge and understanding of scientific research conducted on the isle, both to the local community and visitors to Fair Isle.

Structure, governance and management

Governing document: Constitution of Fair Isle Marine Research Organisation SCIO

Trustee recruitment and appointment: Fair Isle is a small community, with c50 people currently resident on the isle. Much of the work by residents to support and develop the community is achieved by means of committees reporting to a constituted body, the Fair Isle Community Association. To reduce the potential for conflicts of interest, given the small size of the community, the significant number of family relationships and the multiple paid and voluntary roles undertaken by residents it was agreed that a single-tier structure would be adopted by the Fair Isle Marine Research Organisation. Since there would be no additional membership beyond that of the trustees under this arrangement, it was further agreed that accountability to the local community would be maintained by voluntary reporting to the Fair Isle Community Association. Three trustees, all individuals who had been involved in the process of obtaining marine protected area status and the subsequent process of applying for SCIO status, were duly appointed.

Achievements and Performance

Trustees attended all Fair Isle Marine Protected Area Steering Committee meetings via Teams and in person. These meetings are generally biannual. One trustee has chaired the majority of meetings. Our Project Officer has provide updates to the Fair Isle Times, Newsletters to the community, and via the FIMRO website <https://www.fair-isle-marine.org.uk>.

Trustees have attended all Fair Isle Committee quarterly meetings in person to report DR MPA updates, with minutes circulated to the community. The community remain both interested and supportive. FIMRO welcomed a new Trustee spring 2025. Steven Wilson is very knowledgeable, and passionate about the DR MPA.

Trustees have been involved in supporting research undertaken in Fair Isle during the 2024/25 fieldwork season in relation to the DR MPA, in partnership with NatureScot, Royal Society for the Protection of Birds (RSPB) and Fair Isle Bird Observatory Trust (FIBOT), University of the Highlands & Islands, and community members.

Island wide invasive species monitoring remains in place with regular inspection of monitoring equipment, with islanders and Ranger (based at Fair Isle Bird observatory) undertaking the role. This is particularly aimed at identifying any potential rat activity.

The Fair Isle Bird Observatory was opened in late spring 2025, with an official opening planned for June 2026. Renewed partnership working between the Fair Isle Bird Observatory and FIMRO is important to many aspects of the DR MPA. With more visitors, and numerous cruise ship passengers, there has been an opportunity for FIMRO to engage with the wider public. A banner and leaflets were produced giving information about the DR MPA.

Rock-pooling equipment continued to be made available to islanders to undertake local shore based species recording on events days, and to feed finds and information into the DR MPA. The Fair Isle Marine WhatsApp group for islanders, visitors, researchers and Bird Observatory staff/ranger to share and identify finds remains very popular, with over fifty plus members, and has helped with ongoing species identification. Islanders continue to include fishing activity and catch. This has inspired members of the community to become more engaged with the DR MPA.

To build on this enthusiasm, we worked on the development of an Education Officer Post aimed at promoting island wide community citizen science projects. The post was a pilot project focused on, and facilitating, opportunities to engage in citizen science, including shore watch activities, beach surveys/monitoring, species identification, and planned events over a ten week period (with a degree of flexible working). The post was advertised and we successfully recruited a well-qualified island resident who began work early June 2025. Apart from gathering and sharing information & data towards the DR MPA we hope that participants learn and build on their own knowledge base, and find the experience both enjoyable and sociable. If successful, FIMRO would be keen to further develop the Education Officer role into 2026

The Inshore fisheries survey will be published late 2025. The North Atlantic Fisheries College, through the University of the Highlands & Islands, undertook this work and presented their findings to the DR MPA Steering Committee and the community during the period. If funding allows we would like to see this work continued into 2026. Benthic habitat surveys conducted in the summer of 2024, with research findings published in spring 2025, and a Sandeel research project, again through the North Atlantic Fisheries

College, began in May 2025, with the expectation that further work will be undertaken during 2026. These research projects highlight how we are progressing the research priorities identified. Presentations have been well attended by islanders & visitors. Presentations/events are timetabled to allow our very engaged school age children to participate. Other stakeholders have joined or delivered content via teams. Film footage of Flapper Skate remains very exciting. It is clear that further investigation into skate activity and populations in Fair Isle waters is required.

Other 2025 research included cetacean monitoring, using FPODS for acoustic monitoring and visual observation, for an MSc research project undertaken by Fergus McCormick. Steven Wilson deployed the FPODS for the project, which was very much weather dependent. We look forward to seeing what acoustic data can be retrieved and Fergus's final report/dissertation. Cetacean siting's cause a huge amount of excitement, with orca becoming a regular feature. FIMRO website has some fantastic pictures.

Our Project Officer Katie Cubbon, based in Orkney, continues to be huge asset to FIMFO and the DR MPA. We have benefitted enormously from her skill set and enthusiasm. Much of the Project Officers work in the period was to engage with the DR MPA Steering Committee, FIMRO and the local community to further identify research priorities, move ongoing research projects forward, and in particular identify funding. The project officer post is funded by the Coastal Communities fund and National Trust for Scotland.

Work continues to further develop a communications plan, and maintain the website. Workshops were delivered and FIMRO trustees, with help from the Project Officer, and Peg Shaw (FFI) looked at capacity building, organisational development and resilience. This work was also supported by the advisory group (FIMRO, NatureScot and FFI) and aims to promote DR MPA, look at locally based projects, attract future funding, and deliver on some of the smaller research activities.

Our own monthly FIMRO meetings are well attended. Clear agendas and prompt follow up on actions required keep us all focused especially when investigating funding options.

Financial review - All funding and claims are managed by FIMRO trustees. We are supported by the Project Officer in identifying funding opportunities and application processes associated with all ongoing and new projects planned for 2025/26. FIMRO will consider engaging an accountant to ensure monies are managed effectively and for the purposes of annual reporting to OSCR.

A Receipts and Payments account will be submitted with the annual return for the period.

Future plans

As trustees of the Fair Isle Marine Research Organisation we have gained in experience and capacity, attending and facilitating meetings, understanding our partner organisations, and supporting each other. We want to build on the increasing community engagement with more events and activities and further develop the website to promote wider engagement in the DR MPA.

Building on FIMRO's achievements to date and especially as we begin to plan for the next five years we hope that other community members may consider becoming trustees.

In 2026, with advisory group help, we are keen to re-engage with fishers. Both the Shetland Fishermen's Association and Scottish Fisherman's Federation are part of the DR MPA steering committee. We value their contribution and would like to enhance the relationship.

FIMRO continues to present any revised research priorities and activities planned to the community, and consult with residents to ensure we are clear about their priorities and aspirations for the DR MPA. It remains our desire to ensure the community remain at the heart of the Fair Isle Marine Protected Area.

		Independent examiner's report on the accounts						v2
Report to the trustees/members of	Charity name	FAIR ISLE MARINE RESEARCH ORGANISATION						
	Registered charity number	SC 048485						
	On the accounts of the charity for the period	Period start date				Period end date		
	Day	Month	Year	to	Day	Month	Year	
	30	06	2024		30	06	2025	
Set out on pages								(remember to include the page numbers of additional sheets)
Respective responsibilities of trustees and examiner	The charity's trustees are responsible for the preparation of the accounts in accordance with the terms of the Charities and Trustee Investment (Scotland) 2005 Act and the Charities Accounts (Scotland) Regulations 2006 (as amended). The charity trustees consider that the audit requirement of Regulation 10(1) (d) of the Accounts Regulations does not apply. It is my responsibility to examine the accounts as required under section 44(1) (c) of the Act and to state whether particular matters have come to my attention.							
Basis of independent examiner's statement	My examination is carried out in accordance with Regulation 11 of the 2006 Accounts Regulations. An examination includes a review of the accounting records kept by the charity and a comparison of the accounts presented with those records. It also includes consideration of any unusual items or disclosures in the accounts and seeks explanations from the trustees concerning any such matters. The procedures undertaken do not provide all the evidence that would be required in an audit and, consequently, I do not express an audit opinion on the view given by the accounts.							
Independent examiner's statement	In the course of my examination, no matter has come to my attention [other than that disclosed on the attached page*] - which gives me reasonable cause to believe that in any material respect the requirements: - to keep accounting records in accordance with section 44(1) (a) of the 2005 Act and Regulation 4 of the 2006 Accounts Regulations, and - to prepare accounts which accord with the accounting records and comply with Regulation 9 of the 2006 Accounts Regulations have not been met, or - to which, in my opinion, attention should be drawn in order to enable a proper understanding of the accounts to be reached.

FAIR ISLE MARINE RESEARCH ORGANISATION [SCIO]

TRUSTEES ANNUAL REPORT

June 2023 – June 2024

Charity Contact Information

Scottish Charity Number: SC048485

Objectives and Activities

In October 2016, the Fair Isle community was notified that their proposal to create a marine protected area in the coastal waters surrounding the isle had been accepted, and the Fair Isle Demonstration and Research Marine Protected Area officially designated. This was the culmination of over twenty years campaigning by members of the Fair Isle community to gain some form of protection for their immediate marine environment, following substantial and sustained declines in the isle populations of a number of breeding seabird species.

The proposal was unusual in that it was developed by the community, principally the Fair Isle Marine Environment and Tourism Initiative (FIMETI), a non-constituted partnership of isle community members, the Fair Isle Bird Observatory Trust and the National Trust for Scotland, the latter being the isle landlords. Following designation, the community members responsible for operating FIMETI felt that the time had come to step down. The newly-designated marine protected area was to be governed by a Steering Committee, representing the major stakeholders, including a range of local/national fisheries organisations and conservation bodies. With the dissolution of FIMETI, the Fair Isle Bird Observatory Trust and National Trust for Scotland were represented on the Steering Committee as independent organisations, but it was recognised that having originated with the Fair Isle community, representation of their views and interests on the committee was vital.

A new, properly constituted body was needed, leading to the establishment of the Fair Isle Marine Research Organisation (SCIO) in June 2018, with three isle residents as trustees. The hope was that such an organisation could in the first instance act as a representative of the community on the Steering Committee of the Fair Isle Marine Protected Area, enable the employment of a local project officer and in time develop a range of research projects, independently and with other committee partner organisations that would bring socio-economic and environmental benefits to Fair Isle.

Our charitable purposes include:

- the advancement of citizenship or community development
- the advancement of the arts, heritage, culture or science
- the advancement of environmental protection or improvement

We aim to fulfil these purposes by:

- Working to better understand the marine and coastal habitats of Fair Isle, the biological interactions within these environments and the impact of human activity upon them.
- Representing the view and interests of Fair Isle residents with regards to the protection and use of Fair Isle's marine and coastal natural heritage
- Promoting the value of Fair Isle's coastal and marine natural heritage to the wider public, both independently and through cooperation with other relevant organisations.
- Working to explore the potential for sustainable economic development linked to Fair Isle's natural marine and coastal resources
- Empowering the community to contribute to discussions regarding the use and protection of its natural marine and coastal resources and heritage.
- Carrying out biological research and monitoring work within the boundaries of the Fair Isle Marine Protected Area during this project's lifetime

- Supporting research conducted by other bodies within the boundaries of the Fair Isle Marine Protected Area during this project's lifetime
- Commissioning and/or supporting research projects that may from time to time arise or be deemed necessary to further the aims of better understanding and contributing to the protection of Fair Isle's marine and coastal environment, but that fall out with the scope of the Marine Protected Area project
- Seeking to promote a better knowledge and understanding of scientific research conducted on the isle, both to the local community and visitors to Fair Isle.

Structure, governance and management

Governing document: Constitution of Fair Isle Marine Research Organisation SCIO

Trustee recruitment and appointment: Fair Isle is a small community, with c50 people currently resident on the isle. Much of the work by residents to support and develop the community is achieved by means of committees reporting to a constituted body, the Fair Isle Community Association. To reduce the potential for conflicts of interest, given the small size of the community, the significant number of family relationships and the multiple paid and voluntary roles undertaken by residents it was agreed that a single-tier structure would be adopted by the Fair Isle Marine Research Organisation. Since there would be no additional membership beyond that of the trustees under this arrangement, it was further agreed that accountability to the local community would be maintained by voluntary reporting to the Fair Isle Community Association. Three trustees, all individuals who had been involved in the process of obtaining marine protected area status and the subsequent process of applying for SCIO status, were duly appointed.

Achievements and Performance

Trustees attended all Fair Isle Marine Protected Area Steering Committee meetings via Zoom & Teams. These meetings are generally biannual. Some research projects were identified where further meetings and sub-group meetings were felt to be useful. Other Steering Committee members were able to meet in person. One trustee has chaired a number of these meetings. Our Project Officer has provide updates to the Fair Isle Times and Newsletters to the community.

Trustees have attended all Fair Isle Committee quarterly meetings in person to report on updates in relation to the Marine Protected Area. These meetings were also attended by our Project Officer for the DR MPA. The community remain both interested and supportive.

A publication 'Sea Area Fair Isle' by islander [REDACTED] features information about FIMRO. Sale proceeds have be gratefully received by FIMRO especially as we look to generate income in the future.

Trustees have been involved in supporting research undertaken on Fair Isle during the 2023/24 fieldwork season in relation to the Marine Protected Area, in partnership with NatureScot, Royal Society for the Protection of Birds (RSPB) and Fair Isle Bird Observatory Trust (FIBOT).

Projects included ongoing survey work of sea caves around the coast of Fair Isle, with a view to further developing this work in future seasons in conjunction with local residents, including Neil Thomson (FIMRO trustee) and Fair Isle Bird Observatory staff and Ranger. A presentation on Fair Isle sea caves was well attended. Shore watch activities, rock-pooling, and other events were also well attended.

Island wide invasive species monitoring remains in place with regular inspection of monitoring equipment, with islanders undertaking the role. This is particularly aimed at identifying any potential rat activity.

The Fair Isle Bird Observatory Trust rebuild programme now has a proposed opening date in spring 2025. We very much hope the official opening will see renewed partnership working between the Fair Isle Bird Observatory and FIMRO, and a base for researchers.

Rock-pooling equipment was made available to islanders to undertake local shore based species recording, on events days, to feed into the DR MPA. The Fair Isle Marine WhatsApp group for islanders, visitors, researchers and Bird Observatory staff/ranger to share and identify finds remains very popular, with over forty plus members, and has helped with ongoing species identification. Islanders continue to include fishing activity and catch. This has inspired members of the community to become more engaged with the MPA. We hope this generates enthusiasm within the community to explore and share finds and information with the wider community, FIMRO and the Steering Committee. We are now looking to develop citizen science projects, and in particular to investigate cetaceans in the Fair Isle area using acoustic equipment. This will be supported through Shetland Islands Council 'Coastal Communities Fund', National Trust for Scotland and NatureScot.

We continue to use small GoPro cameras at the main harbour. Land-based cetacean recording is an exciting opportunity for all, with sightings recorded by Fair Isle Bird Observatory staff. Likewise, sightings from our island ferry. Inshore fisheries surveys have progressed, identifying species, alien species and activity, and including stomach content analysis of some species. The North Atlantic Fisheries College, through the University if the Highlands & islands, undertook this work and presented their findings to the DR MPA Steering Committee and the community during the period. Presentations have been well attended by islanders & visitors. Presentations/events are timetabled to allow our very engaged school age children to participate. Other stakeholders have joined or delivered content via teams. Film footage of Flapper Skate has been very exciting, and there will be further investigation into skate activity and populations during 2025.

A new Project Officer was appointed in August 2023. [REDACTED] based in Orkney, has become a huge asset. We have benefitted enormously from her skill set and enthusiasm.

Much of the Project Officers work in the period was to engage with the DR MPA Steering Committee, FIMRO and the local community to further identify a priorities list for research work, and move research projects forward, and to identify funding. A priorities list has been agreed, and we are also working to develop a communications plan. Continued consultation (and workshops) were delivered and FIMRO trustees, with help from the Project Officer, facilitated the process which will further identify research areas we would like to develop. Trustees have benefitted from support and training delivered through Coastal Communities Network.

FIMRO, NatureScot and FFI maintained the small advisory group that aims to promote DR MPA, look at locally based projects, attract future funding, and deliver on some of the smaller research activities. FFI worked with Trustees to primarily develop capacity and in 2025 this will focus on more defined activities. FIMRO has also engaged and participated in online training events/seminars delivered by Coastal Community Network.

FIMRO commissioned a series of short films - offering a virtual tour of Fair Isle, now available on the FIMRO website, allowing islanders and visitors to access film content and information they may be interested in, or wish to become actively involved in.

Financial review – FIMRO now has an operational bank account and in March 2023 £4998.00 was deposited into the account. This award was given by the Fair Isle Community Association to further the DR MAP and FIMRO aspirations. This was used to progress website in August/Sept 2023. FIMRO submitted a Receipts and Payments account (from OSCR) Oct 2024.

A Receipts and Payments account will be submitted with the annual return for the period.

Future plans

As trustees of the Fair Isle Marine Research Organisation we have gained in experience and capacity, attending and facilitating meetings, understanding our partner organisations, and supporting each other. We want to build on the increasing community engagement with more events and activities. We want to further engage in digital platforms introduced for partners/steering committee members and FIMRO. This will allow us to explore project ideas and the processes required to deliver on MPA objectives eg project ownership, finance, target groups etc.

FIMRO want to further develop the website to promote wider engagement in the DR MPA. We are also looking to acquire more GoPro cameras as we identify suitable tidal/shore sites for local monitoring.

One ongoing objective for the 2024/25 is to build on our relationship with the local Development Company to deliver on shared projects where they may be able to assist with funding, and expertise. We plan to take on the management of all funding and claims associated with citizen science projects planned for 2024/25. We are grateful to the Development Company for their assistance and ongoing support.

In 2025 FIMRO plan to present a revised research priorities list to the community, and consult with residents to ensure we are clear about their priorities and aspirations for the MPA.

FIMRO, with advisory group help, are keen to re-engage with fishers. Both the Shetland Fishermen's Association and Scottish Fisherman's Federation are part of the DR MPA steering committee. We value their contribution and would like to enhance the relationship, especially as Government review MPA's.

It remains our desire to ensure the community remain at the heart of the Fair Isle Marine Protected Area.

Respective responsibilities of trustees and examiner

The charity's trustees are responsible for the preparation of the accounts in accordance with the terms of the Charities and Trustee Investment (Scotland) 2005 Act and the Charities Accounts (Scotland) Regulations 2006 (as amended). The charity trustees consider that the audit requirement of Regulation 10(1) (d) of the Accounts Regulations does not apply. It is my responsibility to examine the accounts as required under section 44(1) (c) of the Act and to state whether particular matters have come to my attention.

Basis of independent examiner's statement

My examination is carried out in accordance with Regulation 11 of the 2006 Accounts Regulations. An examination includes a review of the accounting records kept by the charity and a comparison of the accounts presented with those records. It also includes consideration of any unusual items or disclosures in the accounts and seeks explanations from the trustees concerning any such matters. The procedures undertaken do not provide all the evidence that would be required in an audit and, consequently, I do not express an audit opinion on the view given by the accounts.

Independent examiner's statement

In the course of my examination, no matter has come to my attention [other than that disclosed on the attached page*]

1. which gives me reasonable cause to believe that in any material respect the requirements:
 - to keep accounting records in accordance with section 44(1) (a) of the 2005 Act and Regulation 4 of the 2006 Accounts Regulations, and
 - to prepare accounts which accord with the accounting records and comply with Regulation 9 of the 2006 Accounts Regulations

have not been met, or

2. to which, in my opinion, attention should be drawn in order to enable a proper understanding of the accounts to be reached.
