Activities

Activities: 'It carries out activities or services itself'

Purposes: 'the advancement of education'

What the charity does: Engage Nepal with Science collaborates with research scientists from diverse disciplines with strong science communication skills to promote science education and literacy. Our mission is to foster a culture of curiosity and engagement with science and scientific research. Through interactive, hands-on workshops, we connect British and Nepalese communities to STEM (Science, Technology, Engineering, and Mathematics), aiming to inspire, empower, and build confidence in these fields. We believe that strengthening STEM engagement nurtures critical thinking, problem-solving, and curiosity—skills essential for understanding the world, making informed decisions, promoting equity and inclusion, and driving positive social change.

Beneficiaries: 'No specific group, or for the benefit of the community'

Objectives: Engage Nepal with Science works with research scientists from different fields and with strong science communication skills to advance education by spreading the culture of engaging with science and scientific research. Engage Nepal with Science aims to engage Scottish and Nepalese communities with science by delivering hands-on workshops to empower, inspire and build confidence in STEM (Science-Technology-Engineering-Mathematics).
