CJT Projects - Chairmans Report for AGM – 6th November 2025

We started 2025 with a series of successful workshops looking at how to reduce food waste. It was good to see that there were some that very popular and they attracted people that haven't previously attended CJT events. It was good to hold active events within the community.

The Highland Energy Community Partnership (HECP) with National Lottery funding has started and we are delighted that Anna Scott has taken up the role of the Energy Officer for Contin, Jamestown & Tarvie Projects. She has made an enthusiastic start – and has already engaged with people within the community. At the moment it's about building relationships with people and trying to engage with the community to present viable options for them. Anna is directly managed for us by Garve and District.

The Connecting Communities Project is now reasonably well established. There is a part time driver that engages every Wednesday to Friday. The bus has been used by local residents for hospital and doctor trips as well as shopping and social events. Further funding is being obtained to extend the service to cover all days of the week as well as obtaining a second (electric) bus. It would be good if there could more engagement from members of the Contin community.

Phil meanwhile has been leading the charge to develop artistic projects of interest. He is mid seeking funding to develop a community song writing project and then record them in Contin Church in Summer 2026.

We remain small in number and limited by the time available from Board members but we are managing to pursue strong and interesting projects for the community – looking to enhance the lives of CJT residents. Whilst we have had approaches to join with Contin Community Trust (Contin Hall), the aims of the two remain distinct at the moment.

Thank you to all the board members for their continued involvement and inspiration. We would still like to seek to recruit new directors to be able to support and develop these projects.

Signed: *Elizabeth Kerr*

CJT Projects - Chairmans Report for AGM – 30th September 2024

Although a quieter year in many respects in terms of events held, CJT Projects are starting to play pivotal roles in some larger projects, that mean that this year has proven rather productive.

Firstly, we continued a successful lunch club through the winter season with the money that had applied for last year. These were well attended by local people and much appreciated. The change in day to a Monday did affect numbers a bit, but with the date and time being more convenient for volunteers. We helped provide a 2-course hot lunch for 16 weeks and welcomed young and old to the Contin Hall. Unfortunately, we felt that we would be unable to obtain volunteers for this forthcoming year and so haven't been able to continue offering this going forward.

We also managed to finally use up the money from Foundation Scotland for the Join in and Connect project from 2020. We had a series of craft workshops that were generally well attended and a positive offering for the local community.

Turning to the two impending projects there is the Connecting Communities Project with Garve and the Highland Energy Community Project.

Norma has worked together with [REDACTED] and the project officer Ewen to progress this project. They are now poised for launch, with the hope that this might happen in the next few months. Initially this may well be a hired vehicle, but the bus from Highland Council and the purchase of an EV bus are pending for the first quarter of 2025. There are still many details to work out, but it is great to see that this may soon become a reality. The aim will be to provide a discounted door to door service.

In the meantime, [REDACTED] have been engaged with Changeworks and Home Energy Scotland and a number of other communities across the Highlands in applying for funding to the National Lottery to fund a 5-year project to change the face of energy efficiency across the Highlands. We have recently learnt that this has been successful. What this means is that CJT will be employing a part time member of staff as an Energy officer to look to engage local members of the community in applying for and improving their properties to make them more energy efficient and cheaper to run. This will also look to support the growth of providers that can complete the necessary works. With confirmation of funding in place, the first board meeting will take place on 10th October and we can then begin the work of recruiting. This will be another project run in conjunction with Garve.

Although we may be small in number, and we have proven to be quietly mighty this year. Well done and thank you.

Looking to the future, this is likely to be a busy year with these two projects taking off and starting to try and engage the local community. It will become more important to seek to recruit new directors to be able to support and develop these projects.
